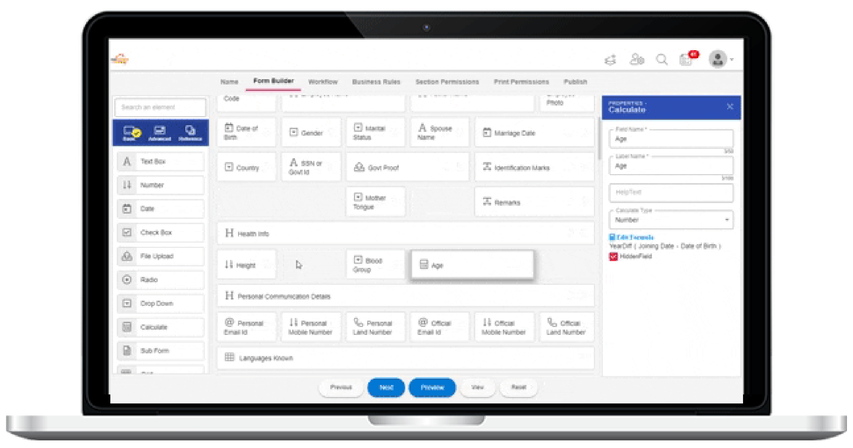
- Material Management
- Employee Performance Management System
- Inventory Management

Everything you need to build applications fast

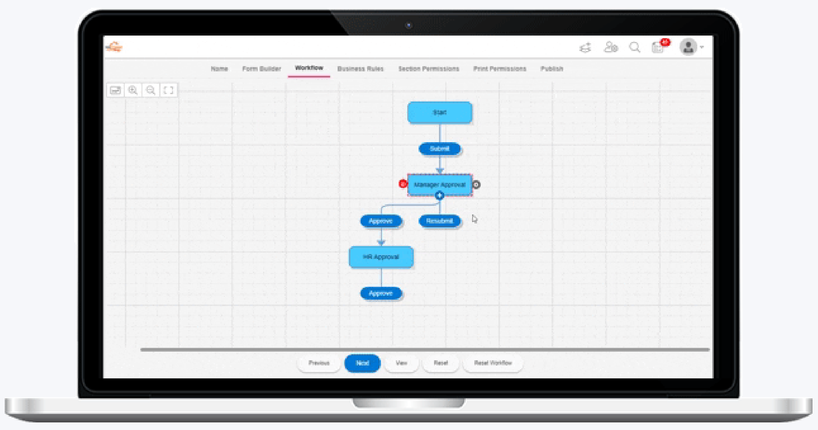
Ready-to-use templates and components

Use ready-to-go templates such as applicant tracking, employee onboarding, and more and modify per your organization's requirements.



Build User Interface the way you want it

Use Quixy's drag and drop UI builder to build the interface the way you want it with flexible design, 40+ form fields, grid controls, responsive design testing, and more.



Model processes and build workflows

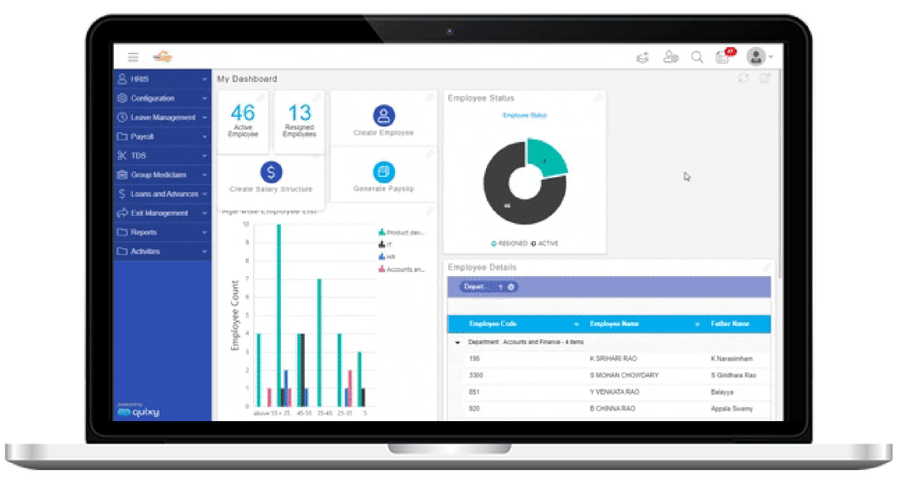
With Quixy, you can use an easy-to-use visual interface to model any process and build simple complex workflows in just a few minutes.

Seamlessly integrate and extend applications

Push data to third party systems or pull data from them using ready-to-use connectors and API Integrations. Connect to popular apps and move data between the systems seamlessly.

Reports that give you actionable insights

With Quixy's reports, users can monitor apps and process performance to uncover inefficiencies and bottlenecks in the system.



Build your own dashboard

Every user can build and configure their own dashboard with Quixy. They can choose the data, reports, and charts that they wish to see as soon as they log in to the platform.

Enterprise-Level Governance and Security

Secure and Scalable

Hosted on the cloud, Quixy provides the scalability any business may need. On the security front, Quixy is certified to be compliant with the strictest set of ISO / IEC 27001:2013 Information Security System controls and SOC 2 Type 2 requirements

Enterprise-Ready

Quixy's platform has the inbuilt controls to meet all enterprise requirements without any modifications. These include:

- Hosting on private cloud
- Roles and permissions
- Audit trail
- IP filtering
- SSO
- Custom password policies
- Two-step authentication
- White labelling
- Offline billing
