# PCRecruiter

PCRecruiter is a web-based system for candidate sourcing and placement, that combines the core functions of candidate tracking, job publishing, customer and contact relationship management with salesforce automation.

The superior flexibility of PCRecruiter has made it an essential tool for over three-thousand companies just like yours, with tens of thousands of daily users in over seventy countries around the world.

Whether your business model involves permanent or contract placement, candidate sourcing, corporate candidates sourcing, RPO, or a hybrid somewhere in between, PCRecruiter is the right fit for your process and your budget.

Developed and Supported by Main Sequence Technology, Inc.

Founded in 1998, Main Sequence Technology has been managed and privately held by its founders since the company's inception. The company's headquarters are located in Northeast Ohio, USA and a service office is operated in Hawaii.

MST's approximately fifty employees include an award-winning support and training team, an in-house data conversion team, and a team of sales consultants with decades of combined experience in the recruitment solutions market. The company is self-capitalized, profitable, and consistenly growing, while maintaining focus on the satisfaction of both its customers and team members.

Key Features

COMPLETE SEARCH on resumes, data sheets, notes, and more. Find any name, job, or organization with Boolean search and keyword-tagging.

CUSTOM FORMS & FIELDS give you complete control. Add virtually unlimited fields. Create custom forms. Lay out your records and search results to suit your needs.

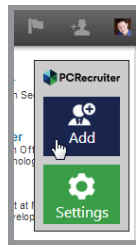

PCR Capture

PCR CAPTURE extension for the Google Chrome browser makes it easy to import and update contacts from popular websites.

JOB PORTAL displays your current opportunities online. Collect resumes and applications via your website or from third-party job boards.
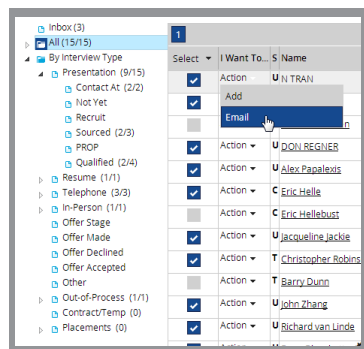

DRAG/DROP PIPELINE for moving applicants from one stage to the next, with configurable stages, complete history tracking, and automated form letters.

FLEXIBLE LISTS make it easy to sort records, send bulk email and perform changes to many names, organizations, or jobs at once.

Custom Candidate Tracking Pipeline

REPORT on your process, user activity, and more with standard and custom configured reports.

Technology

BROWSERS
Developed for Google Chrome, also compatible with current versions of Apple Safari, and MS Internet Explorer.

DEVICES
Mac or PC, laptops, and tablets. Some functions also available on Apple and Android handheld devices.

HOSTING
Use Main Sequence's secure, and convenient SaaS hosting, or as an enterprise installed option.

Services

TRAINING
Our consultants and trainers provide best-practice assistance, configuration, and product education.

DATA MIGRATION
The in-house conversion team can expertly migrate data from your previous system to PCRecruiter.

IMPLEMENTATION
Assistance with job board implementation, custom form creation, and other services.

Additional Options

HIRING AUTHORITY PORTAL allows limited views to clients, field managers, and others to track progress and view applicant info.

TIMESHEETS to collect and approve standard, overtime, on-call, holiday, double, vacation and sick hours from contractors.

REQUISITION APPROVAL is handled via simple email chains. Create a job, start the email chain, and get documented approvals from management before the job 'goes live.'

PORTAL FOR MS OUTLOOK means total integration of contacts, emails, and schedule - no more switching between your recruitment CRM and your email app.

PCRecruiter Portal for MS Outlook

IMAP / EMAIL CLIENT to log all incoming and outgoing email with the relevant contacts. Use the built-in email client or your own desktop or mobile email client.

RESUME INHALER converts resumes attachments from your inbox or Windows folders into searchable names instantly.

EEO & OFCCP compliance forms and reporting tools.

Partnerships

PCRecruiter's flexible public API makes it easy for developers to securely integrate your data with third-party services. Our growing list of out-of-the-box connections and partnerships includes:
