

# Get Difficult Things Done

CloverDX helps IT teams move fast when tackling data management challenges. The CloverDX Data Integration Platform gives organizations a robust, yet flexible environment designed to cater for iterative development and managing production and automated data pipelines.

## CloverDX Data Experience

CloverDX gives you a data integration platform backed by an in-house team of experts, who work closely with the product team and with you to deliver solutions fast with minimal risk.

### CloverDX Data Integration Platform

- Visual paradigm with strong coding capabilities
- Quick prototyping
- Deployment to dev/test/production
- Complex orchestration
- On-premise or cloud scaling

### CloverDX Professional Services

- Experienced tech support
- Team & skills augmentation
- Acceleration of delivery for tight deadlines
- Bespoke solutions
- “Masters of the difficult”

## What Can You Expect from CloverDX?

First and foremost, we're here for you. With CloverDX you're getting a mature product, the CloverDX Data Integration Platform, and access to experts that have been at the coalface of difficult data management projects for decades. You might never need our help, but for a simple support question, or longer engagement with our solutions team, we're always ready to help you succeed.

**We never let our customers fail.**

Your projects are different, yet one day, every single one encounters roadblocks, outliers and needs for creative solutions for the ever present “edge cases” – those that break your ideal architecture or idea of a process. CloverDX is designed to cope with these nasty parts, so that you have an easier job putting your project together, in one place with no need for workarounds.

## Typical Cases for CloverDX

You can use CloverDX for any structured or semi-structured data that come from a wide variety of sources, require complex transformations and joining along their way through complex workflows, and need to be delivered either in batch or near-realtime scenarios. Here's a few examples where CloverDX excels:

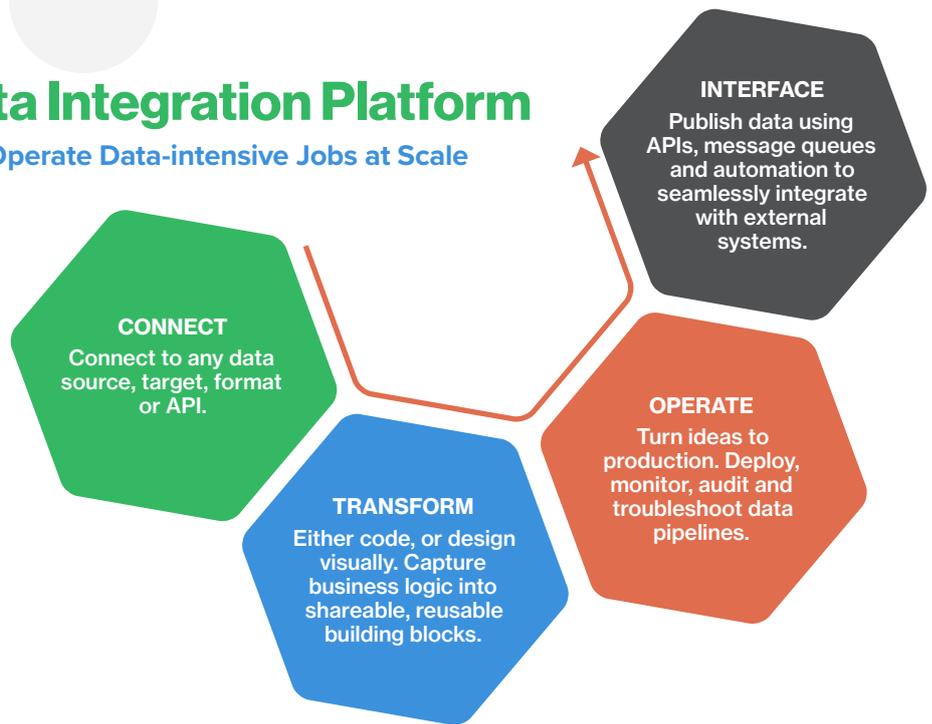

Data Migration at Scale	Data Ingestion at Scale	Customizable Data Pipelines
Data Warehouse and Data Lake	Feeding Data into Business Intelligence Applications	Data Quality
API Integration	Adapting Data for Analytics	Anonymization of Data

# CloverDX Data Integration Platform

Design, Automate and Operate Data-intensive Jobs at Scale

CloverDX is engineered to solve complex data challenges with a combination of a visual IDE for data jobs, flexibility of coding and extensible automation and orchestration features. CloverDX is a data integration platform for quick prototyping and operationalization of data transformations, replacing hand-built solutions and manual processes.

### CONNECT

Connect to any data source, target, format or API.

### TRANSFORM

Either code, or design visually. Capture business logic into shareable, reusable building blocks.

### OPERATE

Turn ideas to production. Deploy, monitor, audit and troubleshoot data pipelines.

### INTERFACE

Publish data using APIs, message queues and automation to seamlessly integrate with external systems.

## CloverDX Designer

**An IDE for data jobs that allows you to seamlessly work with visual flows and code when complexity needs it.**

- Visually design and debug data jobs
- Inspect and trace data flowing through your transformation
- Get instant feedback during development
- Hack and code as needed
- Share and reuse pre-built components
- CloverDX Designer lives on your desktop

## CloverDX Server

**Server is where your data jobs live and breathe. Deploy it to cloud or on-premise, scale to cluster for high availability or performance.**

- Deploy to development/testing and production environments
- Automate jobs (Internal or external scheduling, APIs, triggers)
- Orchestrate complex workflows
- Monitor job execution and track down problems
- Scale across a single node or multiple nodes
- Interface with external systems
- CloverDX Server can live on-premise or in cloud

## What Our Customers Say

**“CloverDX has gone beyond what we initially had purchased it to be – which was just something to move data – into a tool that really helps us develop process”**

“Something about the way CloverDX was presented made me feel that there

are some really clever guys behind the product. And you can talk to them. That’s important. That means you can do some really clever stuff.”

**“CloverDX...is one of the most transformative tools that we’ve employed in our business”**

“[The CloverDX team] are motivated and responsive to our needs as an organization. I know that if I need help or support, I can get the right person with deep knowledge of the product quickly.”
