

 part of  **Projectmates**
Construction Program Management Software

**Manage All of Your
Construction Projects,
From Concept to Closeout,
in One Platform.**

“

I have been using Projectmates since 1999. This product was developed by Architects who really understand the intricacies of project management. The 'system' is easy to use and the modules are intuitive.

– James C., CEO

DPPM
PROJECT MANAGEMENT

The Projectmates Difference

On average, our clients see:

100%

Of Projectmates is paid off within a few months of using the software.

\$100,000+

Saved annually in printing and shipping costs of documents.

70%

Time savings on invoice approvals.

87%

Decrease in overall bid processing time.

4x

Faster project scheduling.

74%

Reduction in delays caused by RFIs.

The Most Configurable Solution for Owners

Projectmates includes more than 40 ready-to-use tools and modules to solve your unique business needs.

Cost Tracking

Track each step of your financial process from budgeting to bidding all the way through contracts, change orders, and invoicing. With real-time anticipated, committed, and actual construction costs, you can be proactive instead of reactive.

Document and Design Management

Centralize and organize drawings, documents, photos, and project files for easy access, version control, markups, and collaboration. Plus, view and share CAD files and design models. Explore spaces, inspect elements, measure distances, add comments, and collaborate without needing additional software.

Construction Management

Gain real-time transparency across your entire construction program to identify and resolve issues before they escalate. RFIs, submittals, daily field reports, and punch lists can be easily managed with custom or pre-built automated workflows.

Schedule Management

Create your own or import schedules from 10 different formats to track schedule progress against your budget and gain insight into missed deadlines. Set task predecessors, assign responsibilities, send automatic reminders, compare baselines, and more. The critical path Gantt chart enables quick milestone tracking across your entire construction program.

Analytics and Reporting

Get the data you need, when you need it. Pre-built and customized reports give you critical real-time insights to make smart decisions. Drag-and-drop functionality makes it simple to design the exact report you need — no coding required.

Capital Planning

Manage the complete lifecycle of capital construction projects and multiple funding sources in one platform for project transparency and alignment between Planning and Construction. Funding reports deliver an easy view of projected costs, committed amounts, and actual costs in real time.

Bid Management

Provide your contractors with an intuitive platform to submit bids and securely access the latest drawings and plans. The analysis grid breaks down each of your vendor bids side-by-side so you can quickly see the front runners and then convert winning bids to contracts.

Custom Apps

Enhance efficiency and oversight by centralizing project workflows within a single accessible platform without the need for coding expertise. Generate custom forms tailored to your specific business needs, including permit tracking, contingency use requests, council actions, and risk registers.

Projectmates provides the tools you need to manage your projects through every project phase, from concept to closeout, all on one central platform.

When you have a multitude of various software platforms managing your projects, you need to figure out how to make them work together — because non-integrated, siloed systems will require double-data entry and manual reconciliation and updates. This is where having Projectmates, an all-in-one software, provides tremendous value. It's a proven way to help your projects come in on time and under budget.

#1 in Client Satisfaction

“

Projectmates provides us a central, collaborative platform to connect our different teams to ensure our projects go smoothly and remove the need for manual tracking of spreadsheets.

– Jon N.

“

The best software to manage construction jobs from start to finish! Projectmates invoice workflow cut down at least 40% of my work.

– Dawn Y.

“

Projectmates eliminated other tools and programs that were inefficient and labor intensive. We definitely could not have done it without the support and partnership with Projectmates.

– Jonathan L.

“

Projectmates' archiving feature with backup and archive module gave us peace of mind that we wouldn't have with the competition.

– Marie F.

“

The more I use the software the more I like it. It's really simple the way they've laid it out. Projectmates hit the sweet spot between ease of use and functionality.

– Alexis L.

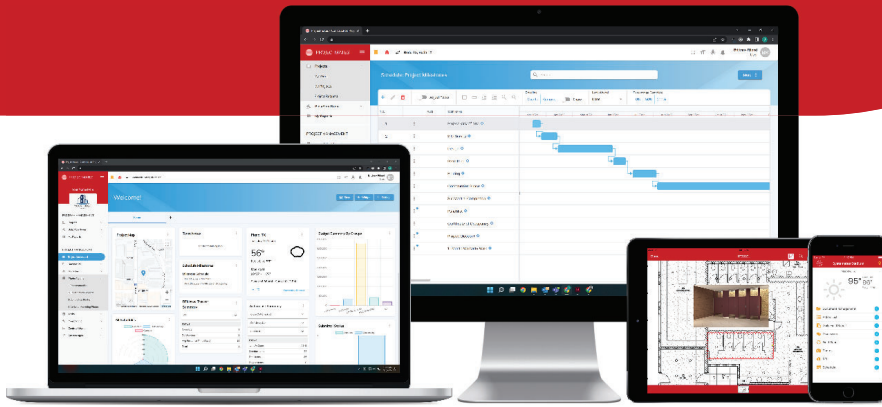

“

Projectmates gives us cost visibility on a per-project basis that we didn't have before. Now we can value cost our builds with an unprecedented level of clarity.

– Brian M.

Owners can achieve the business outcomes most important to them with Projectmates, the web-based construction project management software that's powerful yet easy to use. With the project transparency Owners want and the tools their teams need, Projectmates is a proven way to reduce misinformation, costly delays, and manual processes that are so common in the construction industry.

Since 2000, Systemates, Inc., the company behind Projectmates, has grown rapidly due to the support and valuable feedback from our customers. The software has been honed into a truly intuitive and highly functional project management solution that has reduced costs and saved valuable time for Owners. Projectmates is backed by Hexagon, a global leader in the rapidly evolving world of construction technology.

Today, Projectmates has an expansive client base — from traditional construction companies to real estate trusts, from healthcare facilities to modern educational institutes, and from public sector groups to leading retail businesses.

Benefits of Owner-Focused Construction Management Software

Manage your entire construction program, from pre-planning through closeout.

- ✓ Gain program transparency
- ✓ Avoid overbilling
- ✓ Ensure project consistency
- ✓ Save time
- ✓ Reduce rework
- ✓ Advance collaboration
- ✓ See more project success
- ✓ Deliver data-based decisions
- ✓ Be more efficient
- ✓ Maximize funds
- ✓ Control costs
- ✓ Improve productivity

Projectmates is the most complete construction program and project management software on the market today. For more than 25 years our award-winning software has helped owners manage projects from inception through completion.
