

DEVELOPED
SPECIFICALLY
FOR ACADEMIC
RESEARCH

The market-leading software that intuitively automates laborious and manual processes for research offices, including competitions, reviews, and approvals.

Overview

InfoReady™ is a self-service application management system originally developed for academic research and sponsored programs. The solution allows program administrators to easily configure and manage application and review processes without training or IT support. Clients use InfoReady to automate a range of application processes, including limited submission competitions, internal funding competitions, seed grants, travel grants, no-cost extensions and more. Since the platform was built for academic and research institutions, it takes a very different approach to applications from other tools on the market.

KEY DIFFERENTIATORS INCLUDE:

- **A Software-as-a-Service platform that is completely self-service, which allows for quick implementation and low ongoing costs, and encourages high user adoption rates.**
- **The ability to run an unlimited number of competitions with different administrators substantially decreases administrative time and cost, while promoting standardization of data across campus.**
- **Centralization of all funding data simplifies reporting, management, and oversight.**

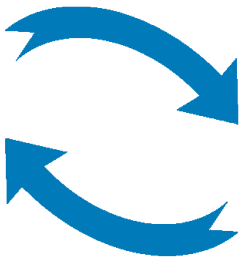

Solution Highlights

Solicitation and Intake of Application Materials

- Features a fully brand-able homepage which lists all opportunities by category, making it easy for applicants to locate and apply for available opportunities in a centralized location.
- Configurable application requirements allow administrators to choose what data they collect from applicants for a given competition and how that data is reported.

Routing / Reviews

- Allows administrators to easily configure automated routing of applications and proposals for review and approval.
- Provides a portal for reviewers to complete their review assignments quickly, easily, and without confusion.

Reporting

- Allows administrators to configure reporting requirements for a given competition.
- Automates the solicitation and intake of post-award forms to facilitate tracking of ROI, milestones, and outcomes.

Why People Love InfoReady™

- Cloud-based
- Securely accessible from anywhere
- Fast implementation – up and running in 2 weeks
- Easy to learn
- Simple to use for applicants, reviewers, and admins
- No IT support required
- Outstanding customer support from experts in the research community
- Extensive tracking and analytics
- Built from customer feedback

INFOREADY CUTS THE BUSYWORK ASSOCIATED WITH:

- Limited submissions
- Internal funding
- Seed and pilot grants
- Travel grants and approvals
- Bridge funding
- Poster competitions
- No-cost extensions
- Time-release requests

“Being a public university, we’re accountable to taxpayers and the state of Georgia. Anytime we invest in something, we want to leverage it as extensively as possible in order to maximize that investment.”

– GAIL SPATT & SUSAN ROCHE

What your peers say about InfoReady™

The medical school needed an online tool for limited submissions and bridge fund applications. We were struggling with using email and storing a large number of documents on various servers. It wasn't very open or transparent.

InfoReady™ has solved all of these problems for us.

Jessica Durkin | Associate Director of Research

We use InfoReady™ in multiple sites for Penn State. **It has changed my life!** I manage limited submissions in our office and InfoReady™ has been wonderful; I'm really happy we have it.

Michelle Hutnik | Director of Research Analytics and Communications

“... doing the work of three people for us. It's accepted by faculty, even those who've not previously used it, due to InfoReady's reputation as the number one research platform in higher education. And it's both user-friendly and conveys meaningful information. What I especially appreciate is how it connects systems-level work with what we do on a tactical, detailed level.”

Sarah Lain | Assistant Director of Research Innovation
