## Request & Approval Workflow

Prevent the uncontrolled creation of teams and provide your users with an easy and fully integrated approval solution.

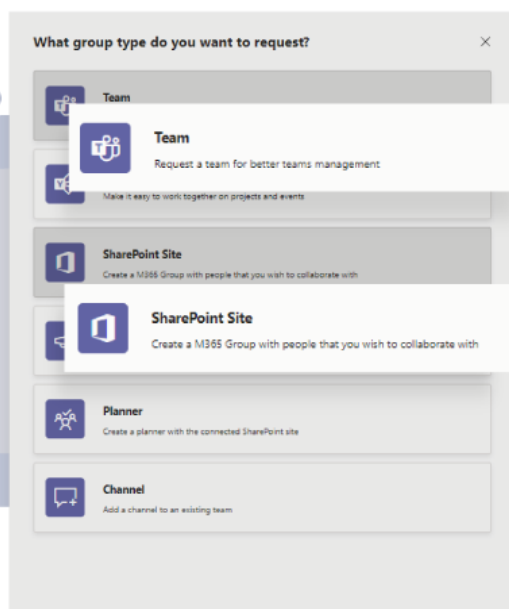

Simple request & approval process

Stay in control – prevent sprawl

Ask users for custom metadata

## Microsoft Teams Governance

Check your governance score with the Health Check. Create powerful governance policies in Microsoft Teams by combining lifecycle settings and naming conventions.

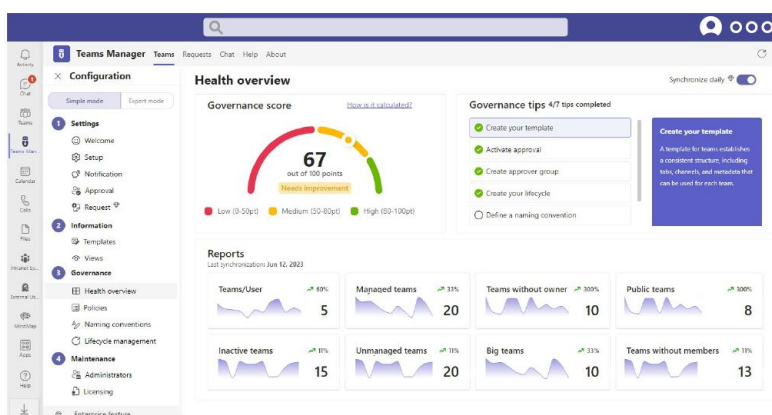

Governance Health Check: your guide to optimized governance

Lifecycles: archive or delete inactive teams

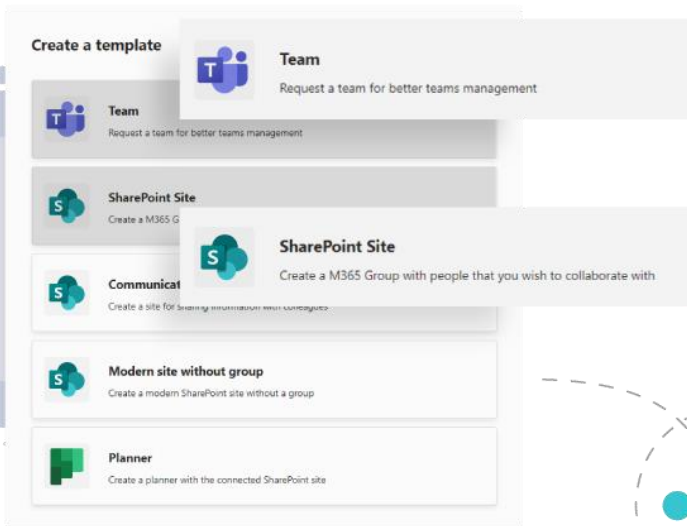

Naming conventions: uniform names for a better overview

## Teams Templates & Provisioning

Create a variety of team templates with just a few clicks and give your users the structure they need to start working right away.

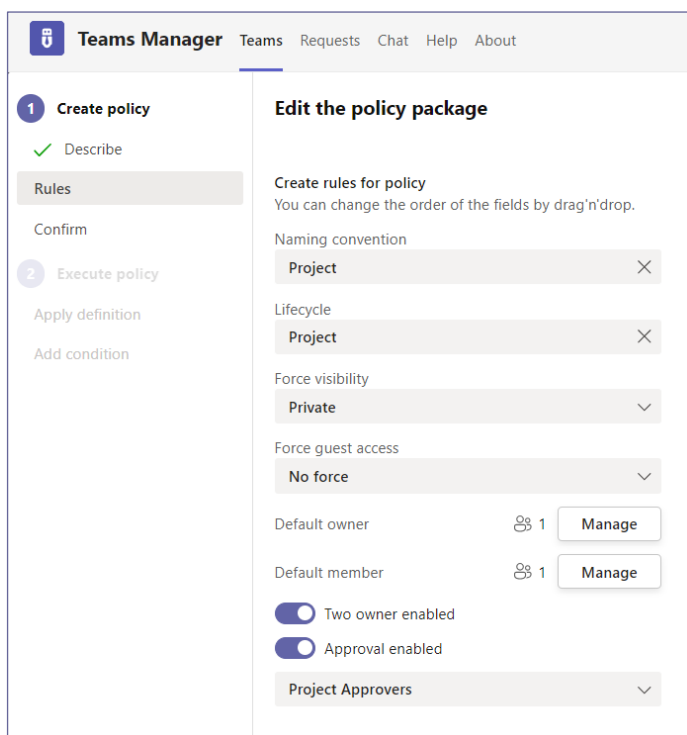

✓  
Easy to use –  
no coding necessary!

✓  
Provide a consistent structure  
for channels

✓  
Create templates with apps,  
settings, folder structures, member  
permissions, predefined OneNote  
and Planner content, and more

## Enterprise Edition

Teams Manager also meets even more elaborate requirements for your Microsoft Teams management.

✓  
Request workflow for channels

✓  
Create shared channels

✓  
Separate Team owner from  
SharePoint site collection admin

✓  
Different templates for  
different user groups

✓  
SharePoint provisioning

✓  
Create M365 groups

✓  
SharePoint List Sync

✓  
Multi Geo location

✓  
Webhook package for Flows &  
Azure functions
