

Reduce Costs & Increase Revenues by Extracting Maximum Value from Every Contract.

Prodagio Contract optimizes revenues and lowers costs on both the buy and sell sides, and our pre-configured Industry Packages simplify the entire contract lifecycle process. By standardizing contract authoring, managing terms and risks, and adapting your contract process, Prodagio can help you extract maximum value throughout the entire lifecycle of every contract.

Automate Contract Lifecycle Management with Prodagio Contract:

Centralize Control and Visibility

Prodagio Contract offers a central repository so that any contract, amendment or source document is at your fingertips. You can find contracts fast and review audit histories to understand every action taken throughout a contract's lifecycle.

Leverage Industry-Specific Best Practices

Each Industry Package includes unique contract data models, standard workflow processes and pre-defined Analytics, and they have been developed based on accumulated best practices.

Simplify Contract Creation

A templates and clause library standardizes language, enabling organizations to more easily create consistent contracts. You can merge external data into contracts, and our Contract Wizard allows non-legal contributors to create contracts using pre-approved language.

Make Sure All Terms Are Met

With Prodagio Contract, you never need to miss a renewal or option and can ensure that all contracts terms are compliant and actively monitored. You can renew contracts you want to renew—and proactively cancel auto-renewing contracts.

Streamline the Contract Lifecycle

Prodagio Contract focuses on building a better and more efficient contract lifecycle. With this asset on your side, you can track each contract across all phases of its lifecycle: Create, Negotiate, Approve, Manage, Report and Search.

Use Powerful Analytics

Prodagio Contract Analytics allows you to explore and truly understand your contract portfolio. You can make smarter decisions on revenues, royalties and returns on every sell-side contract, and drive costs lower with enhanced visibility into buy-side contracts.

Features & Benefits

Pre-Configured Industry Packages

Industry Packages include contract data models, workflow processes and Analytics tailored to: Government, Healthcare, Oil and Gas, Media, Entertainment, IT Services, Food and Beverage, Pharmaceutical, Engineering and Education industries.

A Single, Secure Location for All of Your Contracts

A central repository for authoring, modification and reporting streamlines contract management and enables real-time visibility into your contract workflow.

Easy Authoring with Templates and Clause Library

You can create consistent contracts, standardize the use of language and minimize staff time by simplifying content creation with powerful Prodagio tools.

Seamless Integration With Your Existing Systems

Prodagio Contract seamlessly integrates with your existing ERP, CRM, procurement and BI systems, and Prodagio's secure hybrid cloud connects your datacenter with our SaaS application. The Secure Data Gateway allows you to eliminate wasteful re-entry of data from enterprise applications and lets you leverage Analytics to view transactional data.

Flexible Deployment Options

Prodagio Contract can be deployed in the cloud or on site.

Integration with Microsoft Word

Create and edit contracts in Microsoft Word, and upload them into the Prodagio repository so you can track them throughout their lifecycles.

3rd Party Paper Management

Easily import third-party contracts into the Prodagio repository with keyword search capabilities for easy information retrieval.

Intuitive, Adjustable Workflow

Quickly model business terms using a flexible data model, and implement a configurable approval workflow that allows you to ensure compliance. You can track a contract at every step in the process and minimize paper handling while accelerating contract approvals with electronic signatures.

Find Documents Fast with Full Text Search

Any contract, amendment or source document can be searched so you can find the text you need in seconds. Documents are automatically indexed as they are imported.

Automated Notifications and Reminders

Automated notifications ensure you never miss a date or term, and automated reminders alert you when key milestones are approaching.

Easy-to-use Analytics and Reporting Deliver Smarter Contracts Management

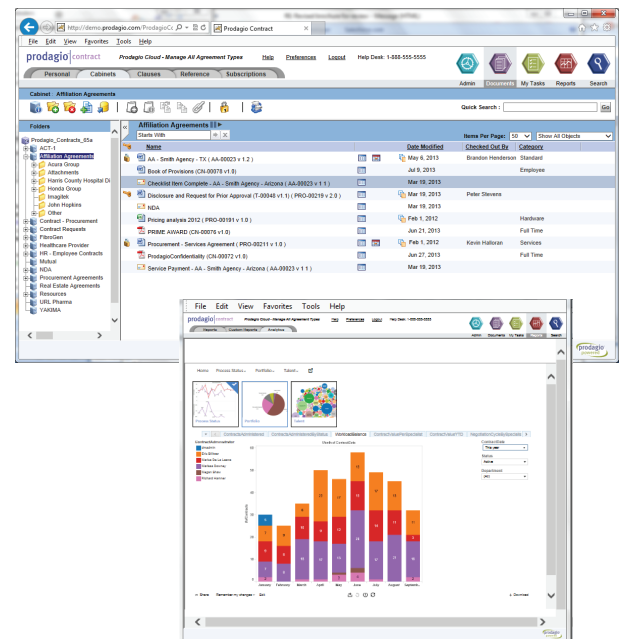

Analytics compiles data and creates an easy-to-understand pre-defined reporting environment for gaining insights into your contracts portfolio, workflow process and contract performance.

Seven-Level, Government-Certified Security

Control who can view contracts via a government-certified permissions and security model that allows you to protect access to your contracts.

About Prodagio

Prodagio Software offers intuitive, easy-to-use Contract Lifecycle Management (CLM) and Accounts Payable (AP) Automation applications. Over 40 million contracts and invoices are processed through Prodagio's business applications every year.
