

Apricot Software

we help people transform lives

An Introduction to Apricot

“Apricot is has become an indispensable organizational tool. We are now taking scattered data—paper records, spreadsheets, and data files—and systematically pulling them into a single data system.”

— Brent Schondelmeyer,
Deputy Director of
Community Engagement,
Local Investment Commission (LINC)

No matter what part of the globe your organization is in, almost every nonprofit is faced with the same reoccurring obstacles. Funds are stretched thin, budgets are tight, and your organization needs to prove that the work it’s doing is making a measurable difference. Apricot software is an all-in-one solution, which offers case management, data tracking, and outcomes management. The best part? It can be tailored to meet the unique needs and requirements of any nonprofit, with the option to come pre-configured for case management.

Apricot login uses a secure user name and password, with one system to manage whatever information your staff, clients, and funders need. Apricot is web-based, allowing you access your database from a desktop or on the go through a mobile device.

Organizations are also provided with the following IT support:

- 24/7 database access
- Continual real-time data backups
- Data transfer and storage security
- Permissions-protected tools
- 100% Disaster Recovery
- Transfer tools for moving historic records into a new database

With added IT resources for your organization, you and your nonprofit can devote more of your time to helping the people you serve. Apricot software allows you to easily collect data, as well as create and edit forms and reports for your organization without any added fees or wait times. Your reports even update in real-time as you collect new data. As your programs grow, you are able to easily customize any form or report to reflect the changing needs of government entities, various funders, or key stakeholders.

Data and reports from Apricot software gives your nonprofit the chance to view your organization from a new, enlightened perspective. By understanding the components behind successful outcomes planning, your organization will be able to make informed, evidence-based decisions about where you should allocate resources for future programs, and best-practices for increasing donations in the future.

Apricot has been implemented across the globe, and is currently being used by:

- Metrocenter YMCA of Seattle
- United Way of Greenville County
- Catholic Charities Archdiocese of Denver
- Local Investment Commission
- Criminal Justice Coordinating Council
- US Committee for Refugees and Immigrants
- Ceridian TSS
- Gallery Partnership Ltd.
- And many more!
