CUSTOMIZABLE SERVICE PLANS

DEDICATED SUPPORT TEAM

Our Core Services

- **MANAGED IT SERVICES**

Our cost-effective IT managed services cover both on-premise and cloud environments, ensuring your IT infrastructure is reliable and efficient.

- **INFORMATION SECURITY**

Nebosystems offers comprehensive information security services to protect your organization's data and systems from cyber threats.

- **IT COMPLIANCE AND AUDIT**

We help you navigate the complex regulatory landscape, ensuring compliance with standards such as NIS2, DORA and GDPR.

- **SYSTEM INTEGRATION**

Seamless integration of your IT infrastructure, connecting various systems and applications to improve efficiency and productivity.

- **CYBERSECURITY MEASURES**

We implement advanced cybersecurity solutions, including SIEM, WAF, NGFW and DLP, to safeguard your business from cyber threats.

- **SYSTEM AUTOMATION & DEVOPS**

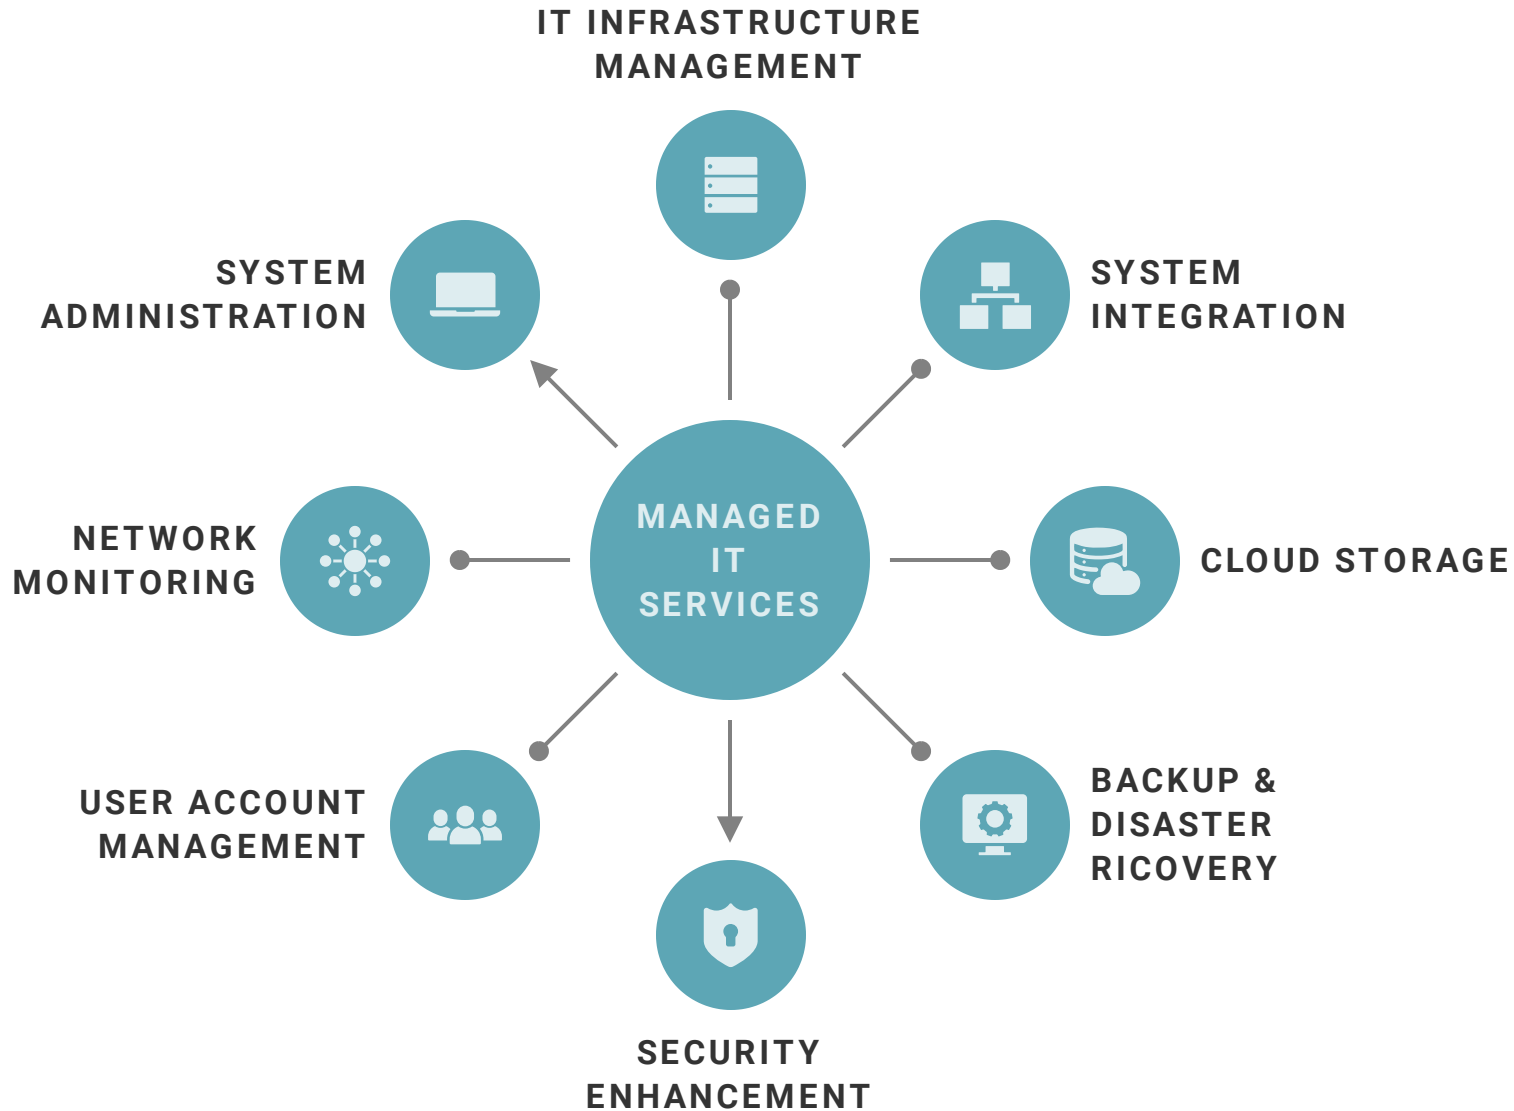

Our experts help you streamline your IT operations through system administration automation and DevOps practices.

- **PRIVATE CLOUD SERVICES**

Nebosystems can help you build your own on-premise cloud infrastructure, tailored to your specific needs.

- **SERVER COLOCATION**

Secure and reliable hosting of your servers in state-of-the-art data center, with redundant power supplies, advanced cooling systems and high-speed connectivity.

Managed IT Services

Managed IT Services from Nebosystems offers a comprehensive suite of solutions tailored to support and enhance your business operations. By outsourcing your IT infrastructure and management to us, you can free up internal resources, reduce costs, and ensure the reliability and security of your technology ecosystem.

**Implementation of Multi-Factor
Authentication (MFA)**

**Micro-Segmentation of
Networks Using VLAN and
VXLAN**

Malware Protection

DDoS Protection

Penetration Testing

**Protection of Mail Servers with
Antivirus and Antispam
Solutions**

Cybersecurity Solutions

Layer	Product Examples
Mission Critical Assets	Data Encryption, Backup Solutions
Data Security	DLP (Data Loss Prevention), FIM (File Integrity Monitoring)
Application Security	WAF (Web Application Firewall), CASB (Cloud Access Security Broker)
Endpoint Security	Antivirus, XDR (Extended Detection and Response), EDR (Endpoint Detection and Response)
Network Security	VPN (Virtual Private Network), NDR (Network Detection and Response)
Perimeter Security	NGFW (Next-Generation Firewall), IDS (Intrusion Detection System)
The Human Layer	Security Awareness Training, MFA (Multi-Factor Authentication), Phishing Simulations

- **SECURITY INFORMATION AND EVENT MANAGEMENT (SIEM)**

A comprehensive solution for real-time monitoring, analysis, and correlation of security-related data from multiple sources to detect and respond to security incidents.

Trellix, SecureVisio, SolarWinds

- **DATA LOSS PREVENTION (DLP)**

A solution that helps organizations monitor, detect, and prevent the unauthorized access, use, or transmission of sensitive data, including intellectual property, personal information, and other confidential data.

Netwrix, Trellix, Fortra

- **NEXT-GENERATION FIREWALL (NGFW)**

An advanced firewall that combines traditional firewall capabilities with additional features, such as intrusion prevention, SSL/TLS inspection, and application-level control, to provide comprehensive network security.

Hillstone, Sophos

- **ENDPOINT DETECTION AND RESPONSE (EDR)**

EDR solutions monitor and analyze activity on endpoints, detect and investigate suspicious behaviors, and enable rapid response to identified threats.

Trellix, N-able, Bitdefender

IT Compliance and Audit

Ensuring Robust Compliance and Security

Compliance Standard	Description
NIS2 (Network and Information Systems Directive 2)	A European Union directive that establishes minimum security requirements for essential and important services providers to ensure the resilience and security of their network and information systems.
DORA (Digital Operational Resilience Act)	A European Union regulation that aims to ensure that financial entities can withstand, respond to, and recover from all types of information and communication technology-related disruptions and threats.
GDPR (General Data Protection Regulation)	A European Union regulation that governs the collection, use, and processing of personal data of individuals within the European Union.
ISO 27001	An international standard that provides a framework for establishing, implementing, operating, monitoring, reviewing, maintaining, and improving an organization's information security management system.

VPS Hosting Solutions

Sample specifications

VPS IMPERO

4 vCPU

8GB RAM

70GB SSD Storage;

Connectivity within Bulgaria –
1000 Mbits/s; International
connectivity 100 Mbits/s;

Backup and security features
(NGFW, IPS/IDS etc)

VPS MAIL

2 vCPU

4GB RAM

50GB SSD Storage;

Connectivity within Bulgaria –
1000 Mbits/s, International
connectivity 100 Mbits/s;

Backup and security features
(Anti Spam and Anti Virus
protection)

VPS BACKUP

1 CPU

2GB RAM

500 GB HDD;

Connectivity within Bulgaria –
1000 Mbits/s, International
connectivity 100 Mbits/s;

Archive history by preset period
Instant data recovery

Why Choose Us

- **COST EFFECTIVE**

Competitive pricing with high-quality service delivery.

- **EXPERT SUPPORT**

Access to a team of experienced professionals for seamless integration and support.

- **BUREAUCRACY-FREE WORKSPACE**

We provide an agile, streamlined approach that removes unnecessary bureaucracy, allowing us to respond quickly and effectively to our clients' needs.

- **COMPLIANCE ASSURANCE**

Ensuring your IT infrastructure meets industry standards and regulations.

- **CUSTOMIZED SOLUTIONS**

Tailored IT services to meet your unique business needs.

- **ADVANCED AUTOMATION**

We utilize advanced automation technologies to optimize processes, increase productivity, and offer our clients exceptional efficiency.

Testimonials

“Nebosystems’ system administration team has been a true partner to our organization. Their expertise in server administration and network management has been invaluable in ensuring the reliability and security of our systems. Additionally, their commitment to understanding our unique business needs sets them apart from other service providers. We have no hesitation in recommending Nebosystems to any organization looking for reliable and efficient system administration services.”

J POINT PLUS LTD
<https://j-point.net>

“We’ve been relying on Nebosystems for managed IT services for several years now, and they have consistently delivered exceptional service. Their team’s expertise and responsiveness have been critical in keeping our IT infrastructure running smoothly. Their proactive approach to system monitoring and maintenance has helped us avoid potential problems and ensure business continuity. We would highly recommend Nebosystems to any organization looking for reliable and efficient system administration services.”
