

Cryoserver at a Glance

“Cryoserver is like a comfort blanket, it gives us reassurance of authenticity in every detail of company communication inside and out”

**Mike Kenyon,
Group IT Director,
Arnold Laver**

“I’d absolutely recommend Cryoserver”

**Steve Allen,
Silchester**

“From a personal point of view I don’t have to worry so much about managing my emails, which is great”

**Employee, North
Warwickshire
Borough Council**

“In terms of searching, Cryoserver has saved hours of people’s time”

**Martin Vogwell,
IT infrastructure
manager,**

Whatever your business or organisation, we can configure Cryoserver to suit it.

Email archiving is all we’ve ever done. It’s made us experts. Our single-minded focus delivers a best-of-breed solution – one that’s uniquely flexible to suit your business. Cryoserver is expertly simple, doing exactly what email users and IT departments need. And it’s supported by a team of experts whose customer service is miles better than competitors’.

Save time and money

- Search millions of emails in seconds
- Slash time and cost of eDiscovery, SAR and other formal searches
- Rely less on your IT Department to find lost email
- Make migration to new mail servers easier
- Reduce server management costs
- Cut premium storage costs on your mail server by up to 75%
- Enable email usage even when your mail server is down

Stay compliant with a solution that:

- Acts like a “black box flight recorder” for email
- Protects emails so that they’re tamper-evident and court-admissible
- Searches quickly and accurately – perfect for eDiscovery
- Meets sector-specific regulations, data privacy and human rights legislation
- Allows policy-based access rights and role-based access
- Keeps a tamper-evident audit trail

Find emails more easily

- Empower end users with intuitive, super-fast search screens
- Integrate our solution seamlessly with Outlook
- Combine searches, like a Venn diagram, for more accurate and refined searches
- Replicate your Outlook email folders within the Cryoserver interface
- Access emails remotely via Cryoserver Mobile App (iOS & Android)

Email archiving to suit you

There's a Cryoserver configuration to suit every enterprise, business and organisation

Boost Employee Productivity

Cryoserver empowers end users to retrieve their own lost email from the archive.

Eliminate PST's

Cryoserver assimilates legacy PST files into a single, searchable, secure archive.

Increase Efficiency

Cryoserver compresses, deduplicates and encrypts email, and archives it on a separate server.

Superior Discovery

Find emails in seconds. Cryoserver's super-fast delegated search and intuitive search.

Faster Archiving

Cryoserver streamlines mail server migration. It provides data capture and import utilities that manage legacy email data

Compliance

Cryoserver helps dispute resolution and reputation management.

Cryoserver Overview

On-Premise
Deployment

Cloud Deployment

Software
Deployment

- Delivers flexible, scalable, high performance email archiving
- Integrates seamlessly with all leading email applications
- Available as on-premise solution, as either a plug-and-play appliance or software deployed on dedicated hardware or virtual server
- Also available as a cloud-based SaaS (software as a service)
- All versions provide the same safe, secure, and reliable end-user experience
- Makes a secure, real-time copy of every message received by the mail server
- Has super-fast, user-friendly search screens
- Puts you in charge of your email
- Saves you time and money
- Keeps you compliant
- Serves as a productivity tool that benefits everyone in your organisation
