Welcome to

AdvancedRx.

Family!

AdvancedRx started with a vision of being a results-driven pharmacy solution provider, and today it has grown itself in every vertical and serves a wide variety of organizations across countless industries and amazing clients. We are one of the leading software vendors for retail and long term care pharmacies delivering best-in-class technology solutions. We strive to innovate in order to meet the customer requirements and challenges of the market. Our creative strategies and client-centric approaches help our user to grow their businesses and stay ahead of the competition. We utilize latest technology and proven techniques to engineer apt e-tools for your business. These tools not only ease your management, but also create an entirely new identity of your brand among your targets.

Content.

Our Products:

- **AdvancedRx (RX Processing Software)**
- **AdvancedPOS (Point of Sale Software)**
- **Smart Fax (Windows Fax Application)**
- **Smart Delivery (Delivery Application – Android)**
- **Smart Access (Pharmacy Report – Web Application)**
- **Smart Refill (Manage Refills – Web Application)**
- **Smart Signature (Windows Application Integrates with Signature Device)**
- **Central Store Management (Manage Data Across Multiple Stores)**
- **AdvancedConnect (Prescription Delivery Portal for Prescribers)**

Additional Modules & Interfaces:

- **Inventory Management Module**
- **Long Term Care Module**
 - **Electronic MAR (Powered By APD, Blue, Simple, Eldermark, Yardi, Sushoo)**
 - **Packaging System Interface (Powered By Dispill, Parata, MOT, Omnicell etc.)**
- **Tele-Pharmacy Module**
- **Adherence/Reporting Module**
- **Charge Account Management Module**
 - **Statement & Document Processing (Powered By VFI Statements)**
- **Reconciliation Module & Interface**
 - **Third Party Reconciliation (Powered By Rx-Net & FDSRX – Enliven Health)**
- **Prior Authorization Interface (Powered By CoverMyMeds)**

Exclusive Third Party Add-ons:

- **Data Migration (Powered By 2Point & InfoWorks)**
- **Smart Texting (Powered By Everyware.)**
- **eFax (Powered By Concord Fax)**
- **Meth-Check Module (Powered By Appriss Health)**
- **PDMP Check (Powered By Bamboo Health)**
- **Immunization Reporting (Powered By SMPRX – Tabula Rasa Group)**
- **Med-Guides (Powered By CarePoint PDR)**

- **EPL Downloads & FSA/HRA Processing (Powered By Sig-is)**
- **Dispense Data Reporting (OHM Data, Prescribe Wellness, GeriMed and much more)**
 - Data Reporting to Prescribe Wellness
 - Data Reporting to Gerimed
 - Data Reporting to Atrium
 - Data Reporting to OHM Data
 - Data Reporting to Amplicare – Enliven Health
- **IVR – Interactive Voice Response (Powered By NexIPTeL)**

Shipping & Delivery:

- **Shipping (Powered By GoShippo)**
- **Shipping (Powered By UPS)**
- **Delivery (Powered By MedZoomer)**

Must Have, Important Services:

- **PDMP Reporting (Automatic)**
- **EDI (Drug Vendor Invoice Import)**
- **Drug Price Update (From Wholesaler)**
- **Cloud Backup Service (Powered By AdvancedRx)**
- **External Local Backup (Powered By AdvancedRx)**
- **EPCS & ePrescription (Powered By SureScripts)**
- **Online Prescriber Search (Powered By NPPES Registries)**
- **Claim Transmission Service (Powered By Relay Health, Emdeon & Rx-Linc)**
- **Pay By Text (Powered By Everyware)**
- **Online Drug (AWP, NDC, ACQ) Search (Powered By Medispan)**

On-Demand Useful Integrations:

- **On Demand Prescription Kiosk by MedifriedRx**
- **Order Management by Order Insite**
- **eCare Plan**
- **MTM Outcomes**
- **ScriptPro**
- **EZScriptRx**

Our Products

AdvancedRx: Your search for the best pharmacy management software ends here!

AdvancedRx Pharmacy Software offers independent pharmacies a user-friendly, robust, and affordable pharmacy management system with AdvancedRx. AdvancedRx is a Windows-based pharmacy management system that will help you manage your pharmacy more effectively by simplifying tasks such as claims processing, inventory management, reporting, labelling, and much more. Processing a new prescription or refill is quick and easy with AdvancedRx. It also allows you to print a variety of reports, from a daily log to a highly customizable report created by the user.

Additional features of the AdvancedRx system include:

- E-Prescribing. **(Including Control Rx's - EPCS)**
- Fast and flexible searching for patients, prescribers, drugs, insurance plans, and other information.
- Real-time claim adjudication. **(Internet ~2 secs)**
- Split billing for patients with multiple insurance plans.
- E1 Eligibility checks for Medicare Part D patients as well as commercial plans
- Allergy and Drug Interaction warnings.
- Paperless faxing for Refill Requests and Prior Authorizations.
- Auto Refill plus Refill Reminder log.
- Bar code scanning and printing.
- Automatic weekly price updates.
- Security—set access rights to prevent users from accessing certain parts of the system.
- Highly customizable labels.

AdvancedPOS: Fully compatible with Advanced Rx Processing Software, integrated point-of-sale is more than just a cash register. A multi-lane, Advanced POS can help you gain better control of your entire store and improve your pharmacy's front-end profits. The system helps boost profitability with improved inventory management features and electronic price updates keep item pricing current in your pharmacy business. Gain the ability to track sales trends and manage your own customer loyalty program.

- Credit/Debit Card Transactions. (Powered By Everyware & Above & Beyond)
- FSA/HRA Transactions. (Powered By Above & Beyond & Sig-is)
- Automatic EPL Download. (Powered By Sig-is)
- Automatic Inventory Update for OTC. (Powered By The Wholesaler)
- Customer Loyalty Program. (Powered By AdvancedRx & Cover My Meds)
- Charge Account & Charge Account Group Payments. (Powered By AdvancedRx)
- Profit & Loss Reports.
- Attendance Management System & Reports.
- Daily Batches (Open & Close)
- RX Electronic Signature.

Smart Fax: Smart fax software allows you to send and receive fax easily and seamlessly. It practically turns your computer into a fax machine a potentially big money and time saver. This is an advanced and relatively inexpensive piece of add-on software enabling your computer system to communicate with a fax machine. But, before you can start faxing, your computer needs to be properly equipped. Smart Fax lets you send and receive faxes over the Internet, from any device or system eliminating the troubles such as paper jams, busy signals or waiting by a fax machine.

Smart Delivery: Our e-Delivery platform offers an easy and efficient way to display, manage and deliver prescriptions of your customers. It is a focused and secure delivery system that manages information, increases productivity and reduces operations cost. E-Delivery is an apt an electronic delivery setup for any Android based product enhancing the workflow of your pharmacy. With this electronic system, the outcome of your business maximizes whereas the time spent on managing documentation minimizes.

Smart Access: This complete and intuitive pharmacy management system allowing retail pharmacies to stay connected as it enables them to access details of an Rx, prescription log reports, sales based reports and account billing from one central system via web or mobile phones.

Smart Refill: This complete and intuitive pharmacy management system allowing retail patient to stay connected as it enables them to access details of an Rx, Refills Remaining, and other important details from one central system via web or mobile phones called Smart Refill. It allows a patient to request a refill, without facing the hassle of being in queue at a pharmacy, right from the comfort at home.

Smart Signature: A perfect pharmacy software to get patient's signature and maintain an electronic log of your customer's data at the time of prescription pick-up. It eliminates the need of signature pad and manual paper storage and makes the check-out convenient. It is capable of operating independently and also as an add-on with POS system. It follows HIPAA compliance

regulations; therefore, it keeps all the data of patients confidential and away from access of other customers.

Central Store Management: One of simplified innovative ways to share data among various connected chain stores. Collaborate on files from anywhere, access your files across devices and edit your important documents. This efficient system lets you safely manage and share your information across all channels. Using this smart pharmacy software solution, you can keep everyone up to date and working together as a team. Multi-Store Connect is a user-friendly document management system providing reliable and secure way to share files and folders. It acts as a centralized repository, where you can upload and store all your documents and share them with multiple users within your chain network.

AdvancedConnect: AdvancedConnect is an appendage of Healthlink Solutions LLC. Investing a decade of innovations, Healthlink Solutions is a Leading Healthcare Software Provider across the country. As they say “an idea, just need a planning”, two enthusiastic and preminent Pharmacists by profession, started this venture to ease the access of Healthcare for every single American. This unbelievable decade of learning, research, development, designing, planning and implementation with an end result of enormous success starting from scratch, inspired us to join the pieces of Healthcare and make it available at a Patient’s doorstep. Healthlink Solutions recently introduced their first Masterpiece of Digital Health with the name of AdvancedConnect - Simplifying Healthcare powered by Healthlink Solutions integrating Pharmacies and Prescribers with a Pharmacy Network of its own kind, having 100+ Distribution Centers nationwide. At AdvancedConnect, engineers and innovators are continuously performing to give life to an idea. There is a lot more to introduce and much more to invent and produce, we are still testing and keep updating to avoid inaccuracy. To know more visit the link: <https://tinyurl.com/democonnect>

Additional Module & Interfaces

Inventory Management Module: The Inventory Management Module allows you to keep track of your inventory and pricing automatically just by receiving the EDI files from your wholesaler. Simply visit the Invoice Update section and select the files you have received and cross check the quantity received as per your order (edit if required), select and update the file, no manual data entry is required, be it any wholesaler. Not just that, AdvancedRx gives you an eligibility to receive drug price update, full catalog from the wholesaler automatically. This is just the beginning of the introduction, please check below for much more we can offer with our comprehensive Inventory Management Module:

- Return Inventory
- Inter-Store Inventory Transfer & Reports
- Regular Inventory Management
- Narcotic Inventory Management
- Reorder Inventory Management

Long Term Care Module: The Long Term Care module allows you to print out MAR forms and Physician Order forms for Long Term Care facilities. Gives you the ability to add facilities names and group patients according to those facilities right into LTC/Nursing Home Master in AdvancedRx. Healthlink Solutions as a company, believes in diversity and adherence, that's is why we have integrated with industry best machines and services for packaging and printing the precise MAR form to avoid human errors. Below are the few companies we are exclusively associated with:

✓ **Machine Interface**

- **Dispill:** Dispill® is a multi-dose packaging solution that helps improve patient's adherence to their medication regimen. Our solution allows the pharmacy to provide medication to patients in an all-inclusive blister pack. The cards come in both 28 and 32 cells and are a great solution for any patient taking multiple scripts at one time. The Dispill® card eliminates the need for pillboxes and unit dose vials so the patient is at less risk of mixing up their medication. Dispill® has been in business since 1995 and has a dedicated team available to help you when utilizing this

program. This includes support of the software, marketing of the program and answering any other questions you may have regarding the Dispill® program.

- **Parata:** Parata design, build, sell, and support technology solutions for pharmacies. Through the use of automation, pharmacists practice at the top of their license by engaging in pharmacist-led value-based care, improving medication adherence, and streamlining workflows. Our solutions are designed to help pharmacy teams spend less time counting pills so they can focus on what matters most – their patients.
- **Medicine on Time:** Medicine-On-Time offers compliance packaging and comprehensive clinical services for pharmacies and the communities they serve. Improving Medication Adherence is critical for your patients and your bottom line. Medicine on Time understands the challenges your pharmacy faces, and offers the solutions and expert support you need to start, grow, and master your medication adherence program and expand your clinical services.
- **Omnicell:** Automate retail and outpatient pharmacy for better patient care. Deliver better patient engagement and medication adherence, while ensuring improved health outcomes and long-term business success. Omnicell's proven technology solutions enable retail pharmacies to optimize their workflows, improve patient communications and automate repetitive, time-consuming tasks.
- **Kirby Lester:** Thousands of pharmacies that use Kirby Lester technology also service long-term care/extended care. Capsa Healthcare offers multiple solutions for superior medication management. Our four distinctive lines of medication carts excel in the areas that make the difference for nurses. Kirby Lester's unique NexsysADC™ is the most secure technology to manage controlled medications and 1st doses. Plus our Kirby Lester KL1 is the gold standard for keeping exact inventory counts in the narcotics vault. Explore Capsa's many options for pharmacies that support extended care.

✓ **MAR Interface**

- **APD MAR:** APD works with local organizations and private providers to support people who have developmental disabilities and their families in living, learning, and working in their communities. APD identifies the service needs of people with developmental disabilities, and those individuals may receive social, medical, behavioral, residential, and/or therapeutic services.
 - Agency Mission and Goals
 - Statement of Agency Organization and Operation
 - APD Glossary of Terms and Acronyms
- **QuickMAR:** QuickMAR has dramatically reduced medication errors, paperwork inefficiencies and administrative duties, while dynamically linking customers to their LTC pharmacy partners. Our portfolio of customers includes pharmacies, senior living facilities, rehab hospitals, group homes, correctional facilities, behavioral health providers and more.
- **Yardi eMAR:** Take paperwork out of medication administration. Yardi, Facilitate seamless communication between nursing staff and pharmacy partners with our

electronic medication administration record solution. Yardi eMAR eliminates risks and inefficiencies associated with paper records to improve resident care.

- **MANAGE MEDICATIONS SAFELY** - Charting workflows and reminders ensure medication accuracy.
- **MAINTAIN COMPLIANCE** - Adhere to government regulations with detailed, up-to-date records.
- **IMPROVE COLLABORATION** - Work seamlessly with pharmacies through built-in interfaces.
- **Eldermark:** When you have to manage medications separately from assessments and service plans, you're losing valuable time to duplicative data entry and creating unnecessary risk for your residents and community. By using the only Electronic Medication Administration Record (EMAR) directly connected to the rest of your clinical software and your preferred pharmacy, you'll create a complete, centralized picture of your residents' health and well-being. Plus, you'll mitigate medication errors, automatically update your EHR, and free up 20 hours for each one of your nurses every month!
- **SimpleMAR:** SimpleMAR's high performance software is fully integrated with major pharmacy systems. Its check and balance techniques reduce any potential errors and provide accurate reporting to enhance your profitability. Whether you are using your phone, tablet or computer, our system gives you secure and state-of-the art interface to do your tasks efficiently and effectively.
- **Sushoo MAR:** AL CloudCare. is a laser focused on helping you simplify your work, deliver better resident care, control your operating costs and increase your profitability. Every feature, update or change is done with this core goal in mind. Our strong team of leaders works every day to deliver on this promise.

Tele-Pharmacy Module: A retail tele pharmacy software module, enables remote prescription verification. A State of Art solution helping retail pharmacies provide quality pharmaceutical care at a local level. Remote tele pharmacies are staffed by certified pharmacy technicians, while a pharmacist reviews prescriptions and counsel's patients from a managing pharmacy. A single pharmacist can verify the prescriptions of multiple remote tele pharmacies, which are operated by certified pharmacy technicians. Sharing payroll costs over multiple stores will create an immediate and direct impact to your bottom line.

Feature: -

- Open tele pharmacies in remote areas.
- Share and maximize resources across locations.
- Offer convenient dispensing at the point of care.

Adherence/Reporting Module: This interface provides the foundation to improve the efficiencies and profitability of your current customer base while allowing you to grow your business and take on a more proactive role with your customers.

Charge Account Management Module: The accounts management interface is designed to manage your account setting and other related information online with an ease. It allows our client to transform raw consumer data into actionable customer insight. Some key highlights of solutions include:

- Real-time multi-channel customer interaction capabilities
- Customer database building, hosting and management
- Data cleaning, processing and enhancement
- Consumer data assets including classifications, prospects and credit data
- Self-service tools for accounts analysis, prospect targeting, data cleansing and enhancement

✓ **Machine Interface:**

VFI Statement Processing could be your one-stop-source for statement and document processing services. With industry experience and the latest technology, VFI brings cost effective solutions that will exceed your business process outsourcing needs. We offer document customization, postal optimization, NCOA (national change of address) service, data processing and reporting as well as intelligent inserting so that your documents enter the mail stream accurately, efficiently and at the lowest cost. Our 25,000 square foot facility operates seamlessly to mail well over 1 million pieces monthly to customers in a variety of industries.

In addition to physical document processing we offer web-based viewing of these documents to allow our customers to search and find any document that we have mailed for them. This system may assist a customer support operation that handles many calls regarding the documents we mail. We also work with customers to provide customized web-based solutions for their document management.

Reconciliation Module & Interface: This interface is designed to reconcile receipts and payments that originate in applications other than Receivables, Payables, and General Ledger. Let's say, if you use a proprietary accounts receivable system with, General Ledger, and Cash Management, you can easily reconcile and clear your receipts by using the reconciliation interface.

The Reconciliation Interface allows you to:

- Manually or automatically reconcile open interface transactions to bank statement lines in Cash Management.
- Find open interface transactions that are available for reconciliation
- Find reconciled open interface transactions

Prior Authorization Module: Optimal decision making for authorization requests requires speed and accuracy, but reliance on paper-based processes works against both. Therefore, Prior Authorization Interface is built to streamline authorization processing with better customer service and higher productivity.

✓ **Machine Interface:**

CoverMyMeds solves medication access challenges for patients throughout every step of their journey through a unified brand that now encompasses RelayHealth, RxCrossroads by McKesson, McKesson Prescription Automation and CoverMyMeds.

Our combined experience spans nearly 90 years and together, we're applying our expertise to solve big problems in healthcare. We accelerate innovative solutions for problems like medication access, affordability and adherence in a way that everyone can participate from providers to pharmacies, payers to biopharma and, especially, patients.

Exclusive Third-Party Add-ons

Data Migration: Data migration is the responsibility of our technical team; they install the solution and easily transfer your data from your existing software to Advanced Rx. The process is initiated by setting up a demo version of the software and then analyzing the existing application for migration. After analyzing the application data and receiving a written confirmation from the client's end, we start the migration process. Once the migration is done, we make the data live and set up the work flow and reports. The entire installation time required for any New Retail Pharmacy is one week, whereas for other retail pharmacies with some other software, it takes around two to four weeks depending upon the size and complexity of data.

✓ **Machine Interface:**

Two Point is the leading provider of health data extraction, analysis and transformation services for health record conversion and archiving. With over 30 years' experience working with health systems and pharmacies to securely migrate patient or employee data, documents and images, and help you meet your compliance goals under state board and federal HIPAA regulations so that you can rest easy knowing your health legacy data is available.

✓ **Machine Interface:**

Since 1997, InfoWerks has been providing pain-free data management solutions for healthcare. Whether you are migrating to a new system, need to archive from a legacy platform, or require data analytics, we're here to ensure your data is seamlessly and securely accessible with no downtime. We know your data is vital to your operations, so we treat it with the same care you would.

Smart Texting: A feature that enables you to send and receive text messages within the software bifurcating all your patients at one place. You can also automate the text messages for promotions, Will call Reports or Birthdays to suit your needs

Features:-

- ✓ Automated/Manual Text Assist
- ✓ Retail/LTC differentiation
- ✓ Custom Generated Number

E-Fax: Along with converting your hard faxes to Soft Faxes, you can now use E-Fax from AdvancedRx. E Fax eliminates the need for a hard fax machine or a modem to connect and send faxes. With E Fax you can just register online and start using faxes as usual. Most interestingly it's now a part of AdvancedRx.

Features:-

- ✓ No more Hardware Modem.
- ✓ Port your existing number or Order New.
- ✓ Integrated with AdvancedRx.

Meth Check Module: A State-of-the-Art feature that enables you to bill, dispense and report Pseudoephedrine medication all at one place.

Features:-

- ✓ Dispense and report Pseudoephedrine.
- ✓ Check Patients drug dispensed status.
- ✓ Real Time dispensing in POS

PDMP Check Module: This technology enables you to check Patient PDMP history in AdvancedRx itself. A program supported by individual State PDMP's and in association with Bamboo Health this feature can save a lot of your valuable time.

Features:-

- ✓ In association with Bamboo Health.
- ✓ Check every controlled drug dispensed.
- ✓ One Click Integration with AdvancedRx.

Immunization Reporting: Immunization Registry Reporting, including mandated and voluntary compliance, is an important initiative for pharmacies to improve public health records which provides better patient-care information for the pharmacy and the community.

Script Management Partners, SMP, provides pharmacies, of all sizes, an affordable, technology service solution that is designed to connect, automate and report accurate immunization records to State/Local Immunization Registries that ensures complete, compliant and accurate immunization reporting, electronically.

Med Guides: CarePoints is a targeted, point-of-dispensing messaging program that includes sponsored messages, patient education, and medication guides for you to provide to your patients when they pick up their prescriptions. The final component, ValueAdd, provides complimentary in-store promotion that drives customer loyalty. The intent of CarePoints messaging is to provide:

- Patient education
- Support to help improve medication adherence
- Improved health outcomes
- Patient engagement and customer loyalty

All CarePoints and MedGuide messages print from your pharmacy printer on plain white paper and are collated with the label, prescription information, and/or drug monograph. All printouts should be included with the medication at the time of dispensing for customer pickup

EPL Download & FSA HRA Processing: SIGIS's solution allows for the acceptance of health benefit card payment transactions in accordance with government regulations. SIGIS is a leader in providing industry standards as well as knowledge and expertise in health care payment cards. Members of SIGIS receive exclusive benefits.

- **FSA, HRA and HSA Compliance Standards**
SIGIS has established IIAS certification and 90% registrations programs for its members. Additionally, SIGIS oversees compliance with the SIGIS standards to ensure adherence to the requirements.
- **Programs and Support Tools**
SIGIS provides a range of Programs to enable its members to operate in compliance with regulations governing health care payment cards.
- **Regulatory Information and Alerts**
While new regulations can translate into changed requirements, SIGIS is a vital source of information to its members – communicating what's new and when changing requirements must be supported.

Data Reporting: AdvancedRx is associated with Industry Leading technologies and companies to help pharmacy improve its revenue and adherence, just by reporting the dispense data with one click integration. Below are some companies, AdvancedRx can help you report data on-demand:-

- Data Reporting to Prescribe Wellness
- Data Reporting to Gerimed
- Data Reporting to Atrium
- Data Reporting to OHM Data
- Data Reporting to Amplicare – Enliven Health

IVR (Interactive Voice Response): The NexIPTTEL phone system is the premier choice for pharmacies because it helps your staff streamline the flow of information from customers and doctors into one consistent system, which improves your overall profitability by eliminating wasted time. NexIPTTEL is not just a phone system. NexIPTTEL is a complete management system

that improves the function of your business through improved customer contact coupled with business marketing and reporting functions.

The NexIPTEL phone system is the premier choice for pharmacies because it helps your staff streamline the flow of information from customers and doctors into one consistent system, which improves your overall profitability by eliminating wasted time. NexIPTEL is not just a phone system. NexIPTEL is a complete management system that improves the function of your business through improved customer contact coupled with business marketing and reporting functions.

Shipping & Delivery

Shipping: AdvancedRx simplifies the Shipping Module as per the pharmacy need, be it a retail, compounding, community, tele or mail order pharmacy, AdvancedRx offers a dedicated Shipping Module for every unique requirement. We at AdvancedRx believes in diversity and we always share the credit our Shipping Partners. Checkout a few words about our impeccable Shipping Partners:

✓ **GoShippo:**

Shipping is more than moving packages It's an integral part of the online shopping experience — with speed, infrastructure, and consumer expectations rolled into one. We're here to show businesses they don't have to be the size of Amazon to have a platform that can help them ship like one.

- **Powering Shipping for Platforms & Marketplaces:**
Shippo is doubling down on out-of-the-box experiences for platforms and marketplaces to offer shipping as a default feature for customers.
- **Ramping Up International Carrier Coverage:**
We're building a universal connectivity layer on top of carrier APIs to accelerate international expansion and become the largest network of shipping carriers on a single platform.
- **Continuous Core Product Improvements:**
Our teams are continuously focused on the core functionality that helps our customers grow — working with over 100,000 small businesses to make shipping more frictionless.

✓ **UPS:**

United Parcel Service (UPS, stylized as ups) is an American multinational shipping & receiving and supply chain management company founded in 1907. Originally known as the American Messenger Company specializing in telegraphs, UPS has grown to become a Fortune 500 company and one of the world's largest shipping couriers. UPS today is primarily known for its ground shipping services as well as the UPS Store, a retail chain which assists UPS shipments and provides tools for small businesses. In addition, UPS offers air shipping on an overnight or two-day basis and delivers to post office boxes through UPS SurePost, a subsidiary that passes on packages to the United States Postal Service for last mile delivery.

Find Peace of Mind. UPS Tracking Solutions Show You the Progress Every Step of the Way. Helping You Save Time and Reduce Cost, Accelerate Your Business with UPS.

Delivery: Our intuitive Medication Delivery MedZoomer is Helping Pharmacies Provide Secure Medication Delivery for Their Customers. Enable your Pharmacy with the power to provide better care for your patients by partnering with Medzoomer. HIPAA certified 1099 couriers take care of your patients by delivering their prescriptions directly to their door.

See how MedZoomer can help a pharmacy manage the deliveries and grow simultaneously:

- Integrate our platform into your existing workflow.
- An electronic signature and state ID is required upon delivery.
- Optimal driver routes meet consumer timelines and allow driver tracking.
- Ensure customer privacy and security with patented tamper-evident packaging.
- Every transaction is HIPAA compliant using custom built encrypted technology.

Checkout the partners benefits as well:

- Medzoomer helps you differentiate yourselves from the competition to drive in new revenue.
- Easily track and optimize your platforms performance with our proprietary tracking software.
- Couriers deliver your patient's medications to their door on demand within 2 hours of their order.
- No more excuses for orders not being picked up from your stores.
- We provide our partners with revenue sharing capabilities from every delivery that comes through their network.
- Have your questions answered and concerns taken care of by our 24-hour support team.

Must Have & Important

PDMP Reporting: A state of art technology, well designed and developed in inside AdvancedRx, allows pharmacies to auto report controlled RX's to State PDMP seamlessly. The service runs automatically on a daily basis and all the controlled RX's are reported to State PDMP, without even a click. Not just that, AdvancedRx automated reporting system make sure that even a void report should not be missed. AdvancedRx gives you the eligibility to send revised reports in case of any changes to prescription. Not just that our technology enables you to check Patient PDMP history in AdvancedRx itself. A program supported by individual State PDMP's and in association with Bamboo Health this feature can save a lot of your valuable time.

Here are some more valuable and pre-integrated services our technology partner, Bamboo Health provides, in association with AdvancedRx:

✓ **NarxCare:**

NarxCare is a robust analytics application and clinical decision support tool that helps prescribers and dispensers analyze controlled substance data from prescription drug monitoring programs (PDMPs), assess overdose risk, and manage substance misuse or substance use disorder (SUD)—resulting in more informed prescribing and dispensing decisions.

Pharmacists and clinicians use NarxCare scores as indicators to further review details in the patient's prescription history as they attend to the patient. NarxCare scores and reports are intended to aid, not replace, medical decision-making. None of the information presented should be used as sole justification for providing or refusing to provide medications.

✓ **PMP AWARe:**

PMP AWARe is the technology that provides state government agencies with accurate, near real-time data that is compliant with their regulations—providing the most complete picture of controlled substance use. The application helps states overcome many common, yet critical challenges including inaccurate and outdated information and slow response time around patient queries.

✓ PMP Gateway:

PMP Gateway makes accessing data and analytics solutions for care team members easy by integrating it directly in the clinical workflows of electronic health records (EHRs), pharmacy management systems, and health information exchanges (HIEs)—saving state health departments money, saving clinicians time, and enhancing patient care.

EDI (Drug Vendor Invoice Import): AdvancedRx DVII technology enables the Pharmacy to seamlessly integrate with Drug Wholesale's EDI be it Cardinal, Smith, McKesson, Amerisource Bergen, or any other industry leading names. EDI helps a pharmacy to save time when it comes to Inventory Management. AdvancedRx helps a pharmacy adapt the best practices leaving the traditional practices and using the new Electronic Data Interchange technology. We help pharmacies receive all industry standard files such as 810, 832, and 850 etc. securely using the DVII technology.

Drug Price Update (AWP): With AdvancedRx pharmacies can automate the Drug Price Update (AWP), be it a regular update or a full catalog, AdvancedRx users does not really have to do anything manually or even click a single button to update the Drug Price into their PMS. At AdvancedRx, we always ask the wholesaler to send us the full catalog looking at a pharmacy's contract with the wholesaler to get the precise AWP update each time.

Cloud Backup: Cloud Backup service is provided by AdvancedRx is powered by Google Cloud Console. We believe that the data security should be on the top, so that a pharmacy should never face a data loss and improve the chances of a successful audit each time from the DEA. At AdvancedRx, we take the initiative to back up pharmacy data over a secure cloud server, keep a back of last three days at least to ensure the maximum retention ability in a worst case scenario. The best part is this Cloud Backup Service runs automatically each morning and perform a successful backup, on the other hands our pre-eminent team ensures the manual checks to be done on a daily basis to give it another layer of security.

External Local Backup: When we say another layer of security, it was not the least we could do, we also make sure that each day we also backup your data, locally on an external hard drive to completely close the loop holes. AdvancedRx set a pharmacy 100% worry free when it comes to the data privacy, safety and security. This external back up service also runs each morning to ensure a strict safety and security environment for a pharmacy.

E-Prescription (EPCS): AdvancedRx Pharmacy Management Software is 100% EPCS certified by SureScripts to ensure that pharmacies should be able to receive e-RX sent by the prescribers seamlessly. Not just that, comprehensive AdvancedRx features allows a user to

eliminate the manual data entry completely while filling an e-RX into the PMS, as well as perform extra ordinary tasks, such as Fill RX on Hold, Print, Export, fill RX, and much more.

Online Prescriber Search (Powered by NPPES Registries): NPI Registry Public Search is a free directory of all active National Provider Identifier (NPI) records. Healthcare providers acquire their unique 10-digit NPIs to identify themselves in a standard way throughout their industry.

Individuals or organizations apply for NPIs through the CMS National Plan and Provider Enumeration System (NPPES). After we supply an NPI, we publish the parts of the NPI record that have public relevance, including the provider's name, specialty (taxonomy) and practice address.

AdvancedRx is completely integrated with NPPES Registries through an [Application Programming Interface \(API\)](#), which allows a user to search Prescribers from across United States without leaving their Pharmacy Management Software using the Prescriber's NPI, DEA, First Name, Last Name, State License and much more.

Claim Transmission (Powered by Relay Health, Emdeon & Rx-Linc): Be it a Medicare Part B, Part D, Medicaid, Private or a commercial insurance plan, we have got your back. Keeping the downtime in mind, due to the claim rejections and other issues at a pharmacy, we have integrated AdvancedRx with top three industry leading Claim Transmission Service Companies i.e. Relay Health, Emdeon (E-RX), RX Linc. Our team make sure that no technical issue should stop a pharmacy operations. AdvancedRx offers an affordable price of 6 to 7 cents per claim depending on the company you choose.

Pay by Text (Powered by Everyware): Everyware offers simple billing solutions for organizations in a wide variety of industries. Get paid and get paid fast. Everyware is the most straightforward Pay by Text platform. It's easy to get started, scalable across all platforms, and works alongside your existing system with easy integration. Medical practices of any size can collect patient bills and co-pays through our HIPAA secure platform. Save money on paper billing and receive your payments faster than ever before.

We are very happy to announce that both of the above mentioned services offered by Everyware are completely integrated with AdvancedRx Pharmacy Management Software. User Interface is extremely easy to use and a built in feature of AdvancedRx, so that a user does

not have to shift from AdvancedRx to Everyware Web App anytime during rush hours at the pharmacy.

Online Drug Search & Database (Powered by Medispan): AdvancedRx Pharmacy Management Software is fully integrated with the industry leading, Medispan & Lexi Database, enjoy the time saving feature of searching a drug right from the Drug Master in AdvancedRx, powered by Medi-span. Not just that, Medi-Span drug databases provide drug vocabularies, attributes, and clinical screening modules integrated into EMRs, pharmacy systems, and other healthcare applications to aid in decision support. They are trusted worldwide to help elevate quality, reduce costs, and improve patient outcomes.

On-Demand Ready Integrations

On Demand Prescription Kiosk by MedifriedRx: MedifriendRx® is a healthcare technology company that simplifies the prescription delivery and pick-up process by providing a state-of-the-art self-serve pharmacy kiosk at local clinics and doctor's offices around the country. Our automatic dispensing machines are small, conveniently located and help you maintain regulatory compliance while providing the smoothest delivery of prescription drugs to your patients when they need it most.

Immediate access to prescriptions at the initial point of entry is an invaluable asset to any medical practice, and the small footprint and advanced technology of the MedifriendRx prescription kiosk workstations make it especially prudent for establishments serving a wide prescriber-base.

With the help of MedifriendRx full-fledged integration, AdvancedRx can automate the prescription process to reduce Rx processing costs and increase patient satisfaction by decreasing wait times, additionally allowing pharmacy to capture first fills.

Order Management by Order Insite: Our integrated solutions with Order Insite, provide workflow tools and advanced reporting to help pharmacy user significantly improve processes for overall inventory management:

- ✓ **OI Replenish:** Applying consistent data driven methodologies that easily integrate into existing technologies and workflow will help address these issues getting inventory levels back in line and improving both customer service and margins. Most pharmacies lack the tools and visibility to accurately manage their inventory and instead rely on inconsistent methods of setting quantities and re-order points. This can have significant impacts on a pharmacy's profits and customer service levels.
- ✓ **OI Exchange:** To fully optimize their investment and responsiveness to customers, pharmacies need to have a full chain wide view of their prescription drug inventory. Too many times, pharmacies lack this visibility and, as a consequence, carry excess inventory or miss opportunities to fill prescriptions with existing inventory and instead place

another order with their supplier. Excess inventory levels unnecessarily reduce cash flow and lead to excessive product expirations.

✓ **OI Count:** Accurate on hand quantities are critical to fully optimize your inventory investment. Yet, due to the potential disruption in day-to-day business, pharmacies do not consistently perform physical inventory counts across all stores. Not having a process to regularly perform physical counts can lead to inaccurate levels of inventory in your system, but can also hide inappropriate activities such as drug diversion.

✓ **OI Analyze:** The demand for internal and external reporting within pharmacies is growing dramatically. Pressure on profitability and productivity are forcing pharmacies to be more focused on the data that drives their business. The demands from external sources, such as audits and government reporting, are also increasing with no end in sight. Many pharmacies need tools to address these increasing reporting needs but lack the resources to build advanced analytic tools.

ECare Plan: Lack of Interoperability Destroys Patient Care Services Workflow. Successful Practice Implementation and Billing for pharmacist-driven "Clinical" or "Care Management" services is impossible without native clinical or care plan workflows.

Pharmacists cannot successfully engage, intervene, or follow-up with patients when having to use multiple software systems with multiple workflows and multiple patient empanelment's. Essential to the success of the pharmacist is the ability to utilize their chosen clinical documentation system(s) that can interact with multiple care team members and multiple payers using technologies that meets their workflow, practice site, and population needs - serving all of the patients in their practice.

Whether you are a pharmacist in a community-based pharmacy, a primary care clinic, long-term care facility, in the patient's home, or staffing a call center, maintaining a consistent workflow across all of your patients improves the economy and quality of practice that has been heretofore impossible to achieve. Interoperability makes choice of system and workflow possible.

MTM Outcomes: OutcomesMTM® designs MTM services to meet CMS requirements, address quality measures, reduce healthcare costs and improve the outcomes of members' medication therapies. We also work with health plans to design new targeted interventions to meet a specific need. Services are provided face-to-face or by phone, as best suits each member. The following services, when provided and documented appropriately, may be included in an OutcomesMTM program.

✓ **Comprehensive Medication Review**

✓ **Medication Reconciliation (MedRec)**

- ✓ **Patient Adherence Consultations**
- ✓ **Prescriber Consultations**
- ✓ **Condition Management**
- ✓ **Patient Consultations**
- ✓ **Maternal Health**

ScriptPro: ScriptPro seamless integration with AdvancedRx, allows you to operate your entire pharmacy with AdvancedRx Pharmacy Software itself. Automated vial, pouch, and blister pack filling. Powerful integration to control local and central fill operations. Specialized engines for 340B, PBA, and third party management. Intelligent extensions for clinical documentation and case management. Learn More: <https://tinyurl.com/spswithadvrx>

EZScriptRx: EZSCRIPTRx's integration with AdvancedRx is to assist Pharmacies in finding "covered" medication options for their Patients with a copay they can afford, and all but eliminate callbacks between Pharmacy and Provider. All of which serve to dramatically improve medication adherence.

Equally important, the platform provides a workflow that helps Pharmacies avoid "fishing" or "test billing" by providing a solution that quickly displays valuable information about a Patient's benefits. The ONLY transaction in the Pharmacy's PMS, is the adjudication of an approved medication that will be dispensed to the patient. Independent Pharmacies recognized the value of EZScriptRx immediately, and it is already being utilized by Pharmacies large and small, in all 50 states and Puerto Rico. The larger the network becomes, the more valuable the platform becomes to ALL Pharmacy partners, due to the strength and breadth of the data.

- EZSCRIPTRx is a user-friendly cloud-based platform that fits right into your Pharmacy's existing workflow, delivering comprehensive patient-specific medication benefits information in real-time, directly from the patient's benefit plan.
- EZSCRIPTRx optimizes your Pharmacy's operational efficiency by providing a single connection to key information from the largest network of PBMs and health plans in the US. This gives you access to the full benefits landscape at the front end of the process, eliminating the time and cost of re-adjudicating claims to finally reach one that works. If it is there, EZSCRIPTRx will find it for you.
- EZSCRIPTRx arms your pharmacy with the ability to offer patients more cost-effective therapeutic alternatives, lower co-pay options, and faster prescription fulfillment, while at the same time supercharging workflow and profitability. This results in fewer abandoned scripts remaining on shelves.
- EZSCRIPTRx lowers Pharmacy staff's administrative burden, by displaying a wide range of options that are on the formulary with coverage details. This empowers them to make the best choices, without ever having to pick up the phone. Decreasing

prescription abandonment keeps patients healthier and more highly satisfied with their level of care.

- EZSCRIPTRx platform data costs are completely transparent and rolled into one flat monthly charge. No nickel and diming, or added charges. All plans include the support of a full team of specialists, pharmacy professionals, and implementation/technology experts.
- EZSCRIPTRx is the digital equivalent of calling a Payer for patient Benefits Checks. This saves the Pharmacy's staff time, money and other resources.
- EZSCRIPTRx must be used in a bonafide pharmacy setting with an established Patient and Provider, Relationship.
- EZSCRIPTRx uses a unique 12 digit identifier to differentiate itself from a billing software's Rx number and has successfully facilitated millions of transactions with hundreds of pharmacies across all 50 states.
