

Unified Remote Monitoring & Management (RMM) Platform

ninjaOne®

Reduce costs. Improve service delivery. Enhance efficiency.

////////

NinjaOne helps MSPs run leaner, more profitable businesses by consolidating endpoint management, automation, and security into a unified, automated platform. Greater operational visibility, faster service, and easy onboarding mean you can manage more clients with fewer resources. Fewer tools and more extensive automations mean you have more time and budget for organizational priorities.

Control and predict costs

Tool sprawl can lead to hidden fees and license overlaps. NinjaOne enables MSPs to replace four or more tools. Not only does this reduce friction, it eliminates redundant licensing and enables more predictable billing that aligns with budget cycles.

Maximize ROI

With the NinjaOne unified platform, you can seamlessly onboard new clients and scale services across all accounts from a single dashboard. Maximize ROI while ensuring client data security and driving sustainable business growth.

Security and compliance

NinjaOne consolidates endpoint visibility, security, and control into one platform — simplifying operations and cutting costs. Active monitoring and proactive remediation help identify and resolve issues before they impact end-users, reducing ticket volumes and strengthening overall security.

Data analysis and insights

NinjaOne supports actionable intelligence for capital allocation. With data aggregation, MSPs can identify cost-saving trends in hardware lifecycles and cloud provisioning to optimize profit without sacrificing customer satisfaction.

NinjaOne customers report:

71%

of customers replace 4+ tools with NinjaOne¹

NinjaOne customers enjoy

3x efficiency over peers.

Unify IT to simplify work.

The NinjaOne Unified IT Operations Platform delivers endpoint management, autonomous patching, backup, and remote access in a single console to cut spend, increase resilience, and improve efficiency. The platform eliminates IT complexity by bringing these capabilities together in an intuitive interface that teams can easily master. By automating routine work and reducing tool sprawl, organizations gain rapid time to value and deliver a better technology experience for employees. NinjaOne remains committed to customer success and has maintained a 98 percent satisfaction score for more than five years.
