

**No-code Workflow and Cognitive
Automation Platform**

**Create High Impact Enterprise Applications with
Workflows, AI, Bots & Mobile, in Days**

Table of Index

01 Introduction

What is Zvolv ? What is Workflow Automation ?

02 Workflow Process

Get to know about process we follow to execute particular workflow and how does it work

03 Product Features

Exclusive product/tool features and specifications to escalate the process

04 Zvolv Advantages

What advantages are provided while serving the purpose of this tools

05 Industries

What all industries are we serving through this workflow automation tool

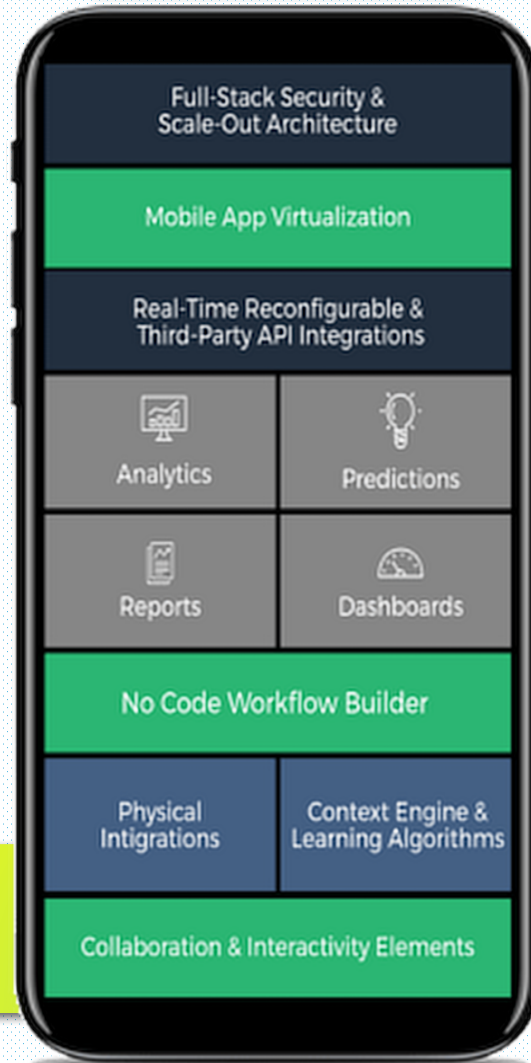

06 Sample Use Cases

Know more on sample use cases for other segments like IIOT, New Store Opening tools etc.

OI.Introduction : Zvolv

Zvolv Platform automates and adds structure to chaotic people/data centric collaboration processes, helping drive organizational efficiency and faster time to market. Whether its opening new outlets/stores, launching new products, distributed data collection and business intelligence, or machine data driven workflows

Catch the Enterprise AI Wave.

Smarter Decisions + Faster Execution

Intelligent, Personalized Workflow Automation Apps In Days.

Amplifying Individual Impact, Empowering Decision Making

02. Workflow Process

IMPLEMENT

With a single click, Zvolv translates your processes and workflows into projects and tasks with built in forms, notifications, escalations and more. Knowledge and collaboration hubs, relevant dashboards and feeds for individuals and teams are automatically created. The Zvolv process optimizer helps identify areas of improvement.

EXECUTE

Your Zvolv apps will drive execution across your process with virtualized mobile apps and web portals. It will prioritize between activities and ensure focused collaboration through real time visibility, intelligent alerts and contextual access to information, documents and conversations relevant to roles and tasks.

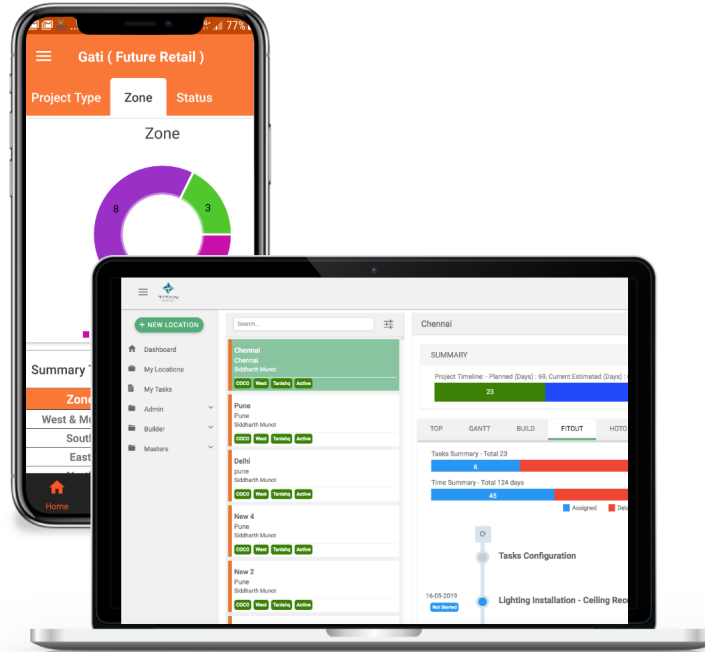

IDEATE

Capture the steps your business process requires into Zvolv's intuitive GUI or simple templates. Zvolv gives you the power to define dependencies, approvals, structure data and documents shared during execution, metrics used to measure each step, check lists and more at a granular level.

SCALE

Zvolv couples the scale of well defined processes with the agility of quick changes. Make your Zvolv apps intelligent and more impactful by configuring automation bots to tackle repetitive or error-prone tasks, configure the AI Analytics driven dashboards to derive insights on high impact opportunities for improvement. Your apps now evolve as fast as your business.

Customized Intelligent Collaboration Platform

“ Power of AI and machine learning enables optimizations to existing workflows ; empowers management to drive efficient planning and execution ”

03. Product Features

01

Structured workflows

The no-code platform abstracts the complexity of software development from the end user. With a unique combination of cognitive automation and structured workflows

02

Task & Resource Management

Intelligently manage your people's task assignments, sequence and prioritize their activities, and provide contextual information on what needs to be done. With a single click, you can transform your processes and workflows into projects & tasks with super cool built-in forms, rule-based and AI driven assignments, Gantt visualizations

03

Cognitive Automation Bots

Zvolv's Cognitive Automation bots help prioritize tasks, streamline decision-making and speed up processes with contextual access to information - freeing up bandwidth for higher value work

04

Real Time Data Driven Decision

Whether it's opening new outlets/stores, launching new products, distributed data collection and business intelligence, or machine data-driven workflows - Zvolv applications can be created in a matter of days

Other Premium

Features

- **No Developer Dependence**
Revision (Evaluation) in matter of minutes, with no developer dependence
- **Exact Business Process**
Mobile enabled, Customized (configured) to exact business process (nothing more, nothing less)
- **Customizable AI**
Built in customizable AI based prediction, analytics & dashboards

04. Zvolv Advantages

Amplifying
Individual Impact,
Empowering
Decision Making

Efficiency

Zvolv eliminates waste in the form of unnecessary meetings, chaotic collaboration, unpredictable dependencies and lack of accountability. Zvolv combines real-time collaboration and visibility, distributed project, task, resource, data and document management into a unified mobile-first work management solution.

Cognizance

Too little information is bad, too much is worse. Zvolv's Contextual Knowledge Hub provides just the right amount of information by task and role when it's needed, where it's needed. Zvolv's Cognitive Automation prioritizes, streamlines and speeds-up processes - freeing up bandwidth for higher value work.

Agility

The truth in business is that once a bottleneck is addressed another one takes its place. Zvolv's AI driven Process Optimization and Analytics Engine continuously identifies the current weakest link and the No code Workflow Platform enables you to keep innovating fast. Zvolv Apps evolve with your business needs.

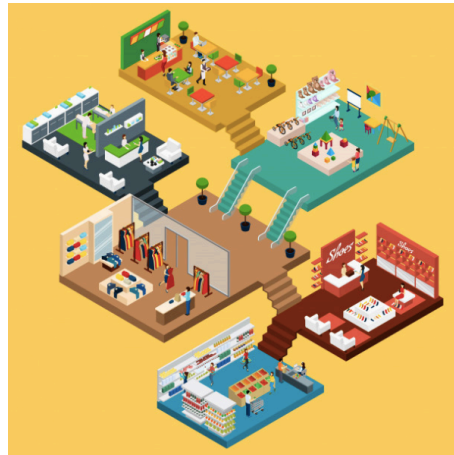

05. Industries

FMCG

Zvolv apps delivered 30% reduction in Time to Market for new products by optimizing and structuring collaboration processes across the New Product Development teams.

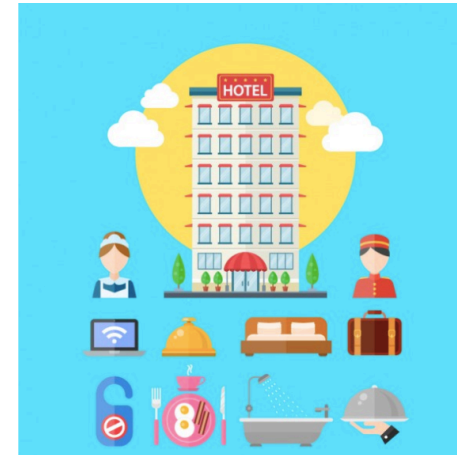

Client: India's top FMCG player with INR 1K Cr+ (US\$ 200MN) in Annual Revenue

RETAIL

Zvolv apps helped optimize launch processes for new stores with structured workflows, data collection, approvals and real-time visibility across execution teams.

Client: Multi-Brand, Multi-Format Retailer, INR 10K Cr+ (US\$ 2BN) in Annual Revenue

HOSPITALITY

Zvolv apps helped drive 45% reduction in time from site identification to handoff for new restaurants by formalizing the workflow, driving on-time execution and adding accountability and visibility across the teams.

Client: Quick Service Restaurant Chain, INR 2K Cr+ (USD 400MN) in Annual Revenue

BUSINESS SERVICES

Zvolv apps drive the entire business, from a customer facing app for memberships, payments and engagement, to internal workflow apps to manage distribution logistics and CRM.

Client: On-demand and subscription based organic produce delivery start-up.

06. Sample Use cases

O1

New Store Opening – Retail Process Management

Product Features:

- Smart Site Selection and Acquisition
- On-time Execution with Efficient Resource Utilization
- Great Customer Experience
- Real Time Data Driven Decision Making

URL : <https://zvolv.com/nso.html>

End to end process applications - customized to your Retail and Hospitality enterprise needs.

Connect your Machines, People and Processes with intelligent data-triggered workflow automation apps, in a matter of days.

O2

Intelligent Data Driven Workflow Automation Apps for Industrial IOT

Product Features:

- Machine Integration
- Training and Service
- Document Management
- Smart Triggers
- AI Driven Dashboards
- Cognitive Automation Bots
- Task and Resource Management
