

CanQualify.com

A better way to **qualify**
and **manage** suppliers.

 CanQualify

Providing **contractor management** and **prequalification solutions**.

“*CanQualify is what the prequalification process should be!*”

Personalized	Customized	Simplified	Accessible	Affordable
We provide hands-on, proactive customer service representatives.	We offer customized solutions for each of our hiring clients.	Our platform is easy to use and understandable.	Access meaningful data anytime on mobile or through the online platform.	Fair, honest, and upfront pricing. We only charge for services rendered.

Creating a positive safety culture through best practices.

CanQualify is a cloud-based supplier prequalification company. We help businesses to identify and mitigate risks within their supply chain.

Through our services, hiring clients can rest easy knowing that their contractors, vendors, and suppliers are in compliance with safety and sustainability requirements.

Our platform validates compliance with your existing supplier base. It also connects you with other suppliers within our database. This allows you to streamline the procurement process while also saving time and money.

Clients can manage and compare prequalified suppliers from directly within the platform. The comparison feature enables clients to choose the safest and most-qualified supplier for the task at hand.

Contractor management solutions are delivered through an intuitive cloud-based platform.

Supplier Pre-Qualification

“DocuQual” – A customizable web-based prequalification assessment that validates supplier compliance based on specific hiring client requirements. Includes the collection of policy documents, MSAs, terms & conditions and more.

Safety Data Management

“SafetyQual” – The annual collection & validation of safety stats and data such as incident reports (OHSa, MSHA, DOT, etc.) EMR certs, loss run reports, citation history, etc. Includes the collection of the supplier safety manual.

Insurance Monitoring

“InsureQual” – The collection, validation & tracking of insurance certificates including limits, additional insured and waiver of subrogation.

Supplier Auditing

“AuditQual” – The collection & review of written programs within the safety manual as required by federal, state and local trade regulations.

Employee Management

“EmployeeQual” – The collection & validation of employee-specific training, set forth by the hiring client or regulatory agencies.

Customized Management

“CustomQual” – A custom prequalification form or audit tailored to your specific needs and requirements.

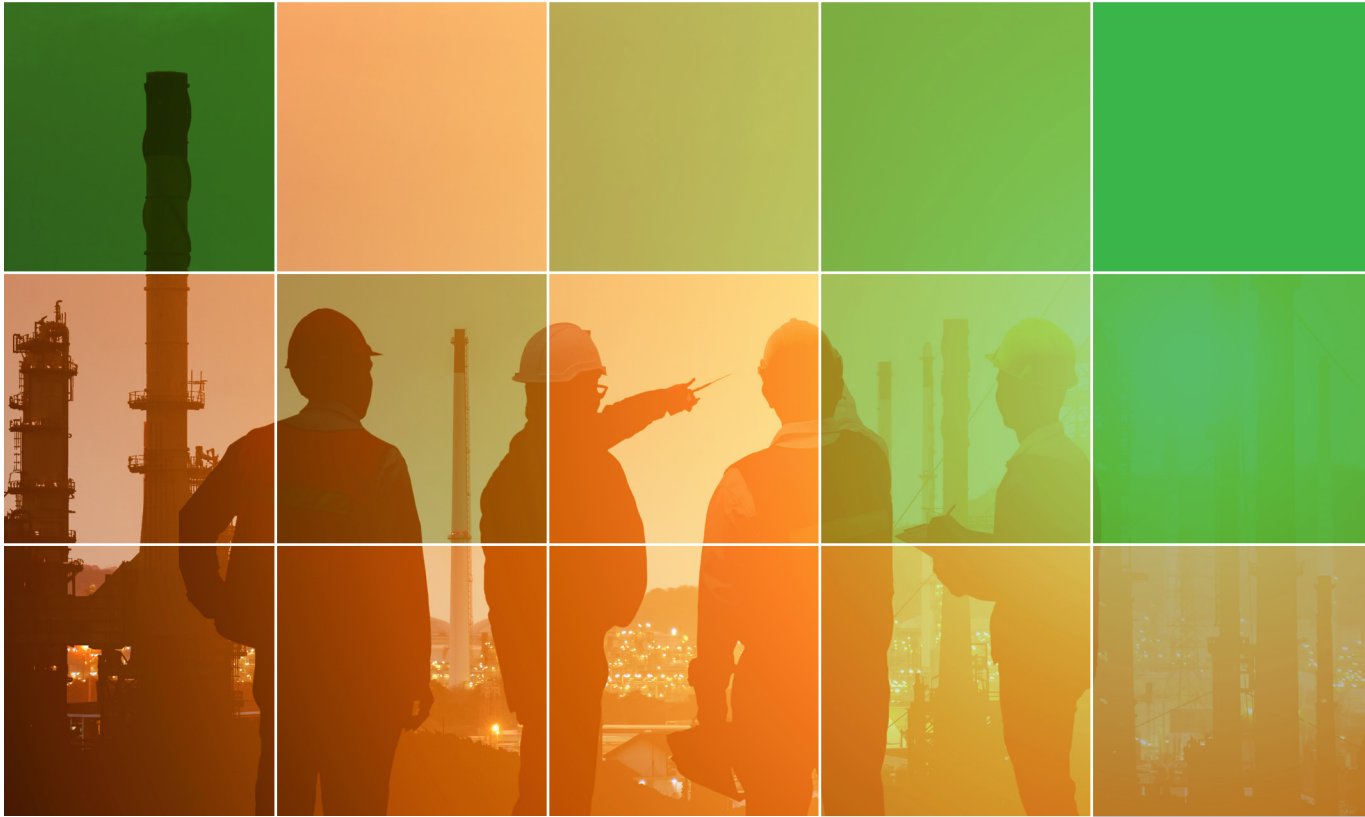

Seamless integration through dedicated support.

Here at CanQualify, we take care of the entire contractor prequalification process reducing the stress and extra work of data collecting off your shoulders.

Dedicated customer service representatives are assigned to each hiring client. They familiarize themselves with the unique requirements of your company and can communicate them effectively to your suppliers.

Partnering with CanQualify allows you to focus your time and efforts on other important aspects of your business.

Benefits of Using Contractor Management Services

- Reduce Costs Across Your Entire Organization
- Save Time by Relieving Your Employees from Administrative Burdens
- Improve Supplier & Client Relationship
- Create a positive safety culture through best practices and contractor awareness
