Peace of mind starts with
security you can trust

Your trust is too valuable to be given: **it deserves to be earned.** Budgyt takes extensive security measures to ensure your data is always protected—and only accessible to those you permit.

Cloud storage puts you in full control

▸ Eliminate file sharing risks and accidental exposure of sensitive information

▸ Empower users to access their budgets and analyze variances from anywhere at any time

▸ Ensure sensitive and confidential information is **selectively hidden** when collaborating

▸ Easily recover any accidental deletions with rolling 30 day back ups
