# DocuTrack®

Streamline Your Workflow

Pharmacy Workflow Software

The right pharmacy workflow solution can make a world of difference. DocuTrack is a comprehensive, customizable pharmacy workflow software that organizes and stores all the documents and media that keep your long-term care pharmacy running smoothly.

"I just did an audit in two minutes flat! Thank you, DocuTrack! Normally that would have been a 30-60-minute task. Oh, how I love this system even more than I already did!"

Billing Coordinator

Cut Down on Manual Tasks

DocuTrack helps your pharmacy work more efficiently, cutting down on wasteful and potentially expensive errors. The ability to access orders instantly means quick, accurate answers to customers' questions and elevated staff productivity. Reports provide monitoring of your pharmacy's productivity in real time.

Tailored for Your Pharmacy

DocuTrack's editable workflow and import rules allow you to mirror your current pharmacy processes for seamless adoption. Customize user roles and monitor staff or work remotely.

No Longer Live in Fear of Audits

DocuTrack's Audit Assist will quickly process and build all the documentation needed to fulfill a pharmacy audit. An advanced content management system, each document has a complete audit history for every action taken.

Faster Processing with Automation

Reduce triage staff. Automated features with barcoding, custom routing rules, and ePrescribing integration allow for streamlined pharmacy workflow and faster order processing. For example, STAT orders can be automatically assigned to the correct handler.
