

Smart eLearning Content

Empower your training team to focus on delivering high standards of employee education.

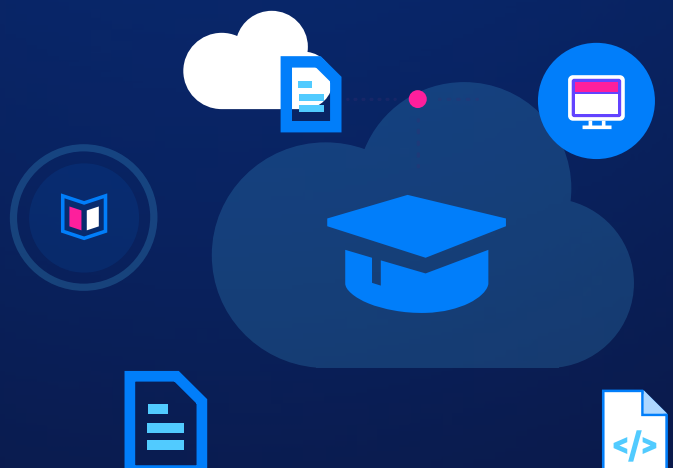

Problem

Your employees, whether in-house, remote or global, need trustworthy training content on everything they need to know to be successful. Separating the company's eLearning platform from their documentation means redundant content will be rife in the LMS, creating inefficiency and risk. Make sure your business-critical training and education content is always up-to-date and speaks from a single source of truth - in any language.

Solution

Technical content is the heart of product knowledge transfer and policy and procedure training. By using the Paligo CCMS for eLearning output, training departments can trust in the accuracy of their content and consistency in their learning materials, all the while creating engaging interactive learning experiences.

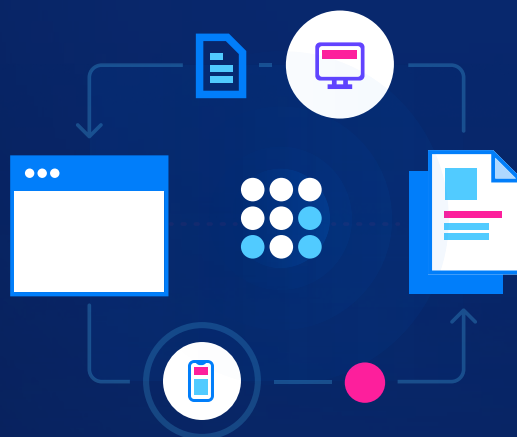

Benefit: Team

The Paligo CCMS supports multimedia eLearning content, quizzes, and progress tracking. Publish multilingual on-demand training content with confidence, leveraging Paligo's top-rated content reuse, filtering, branching and variables capabilities.

Benefit: Business

By producing and reusing content from Paligo, and publishing to an open eLearning standard (like SCORM), learning & development content is future proof and portable to any learning platform, now or in the future.

"Paligo has everything I was looking for in choosing an authoring tool. Lots of publishing integrations and options for customization, structured authoring, great content re-use features, variables, etc. There are a lot of ways to set things up, and you're not limited to doing thing one way because of the tool. There are many paths to success with Paligo, and you can really find many ways to fit what you need."
