AIRSHIP®

Partner Integration Configuration Tool

Integrate airship into your stack with integration recipes to get marketers up and running — fast.

Your business is as unique as your customers. Quickly integrate Airship and compose the stack you need now. So you can drive success and deliver captivating experiences that create value.

Quickly integrate Airship and compose the stack you need to drive success and deliver incredible experiences that create value.

No-Code Integration

Connect data and orchestrate customer journeys across your entire digital ecosystem in just a few clicks with composable, inbound and outbound, recipe-based integrations.
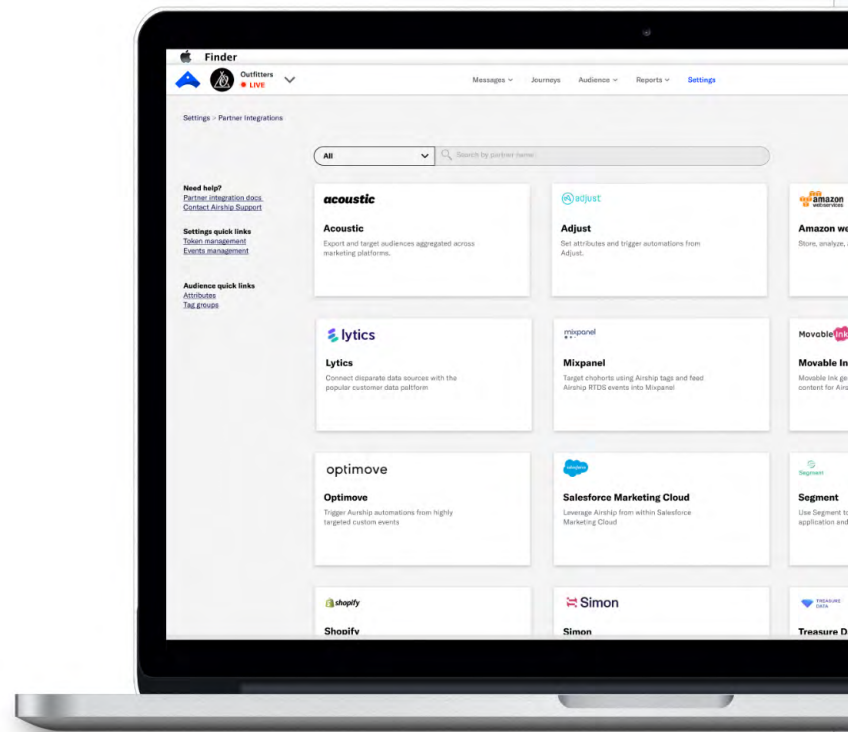

Open APIs

No pre-built integration? No problem. Bi-directionally connect to any system simply, securely and seamlessly with Airship's APIs and Real Time Data Streaming to deliver in-the-moment experiences anywhere.

Unify Your Customer View

Consolidate your customer knowledge from any source or endpoint in Airship. Or simply integrate Airship with your data warehouse or customer data platform. Either way, gain a comprehensive customer view for deeper, more personalized and contextual engagement.

Never Miss A Beat

Your most valuable source of engagement data is what customers are doing right now. Real Time Data Streaming allows you to understand and better influence outcomes by enabling real-time behavioral data to stream into your stack.
