

CoreAchieve is a content and learning management solution that has been developed to maximize usability and affordability with wide-spread distribution. It features an intuitive interface that allows for speedy and accurate loading, distribution and management of content to meet learning and other objectives. With CoreAchieve, you will enjoy easy and complete control over your content, its distribution and performance.

Functionality

- Upload files, videos and audio from a variety of standard formats
- Create, define and edit courses and quizzes
- Easy to install, easy to use, and inexpensive to operate
- Quick & Advanced Searching controls to easily find courses and playlists of interest
- Define and assign access of content to users and groups
- Add and define content by assigning titles, topic categories, descriptions and tags
- Executive Dashboard
- Easily customizable

- **Develop and Manage Course Content:** CoreAchieve provides an easy to use interface to upload and organize course materials, build quizzes to test the knowledge and monitor progress for each user or entire user group.
- **Profile:** One place to find all of your training materials, playlists and courses. Start exactly where you left off.
- **Responsive Design:** Learning that is accessible on all platforms and devices!
- **Integrations:** Easily integrate via powerful API's that connect, plug-in and integrate with other solutions to ensure your LMS is even more functional!
- **Analytics, Reporting & Communication:** Powerful reporting, analytics and dashboards provide the insight you need to ensure your employee/student is up-to-date with their training program. Manage communication feeds through a news list to share information and solicit feedback
- **Document Management:** Upload and manage documents containing curricular content.
- **Multiple device access:** Delivery of course content over web-based interfaces such as desktops, phones or tablets.
- **Distributed instructor and student base:** Remote participation by the instructor or pupil allows courseware to feature multiple teachers or experts from across the globe.
- **Student Engagement:** Interaction between and among students through discussion boards.
- **Assessment and testing:** Creation of varied knowledge retention exercises such as short quizzes and comprehensive exams
- **Grading and Scoring:** Advanced tracking and charting of student performance over time.
