PortaOne

PortaBilling

BSS & OCS Platform

Simplify your business processes with an all-in-one, convergent billing solution for a complete range of telecommunication services.

What's included

PortaBilling

A comprehensive cloud-based billing and charging system for CSPs

- Customer management
- Service provisioning
- Billing and online charging

Why over 500 telecom operators and CSPs have chosen PortaBilling

Instant deployment

Typical deployment time: Just 24 hours to start managing your billing in the cloud

No additional costs

Add customers, products, and seats at no charge thanks to an unlimited perpetual license

Flexible scalability

Choose your ideal processing capacity and increase it on demand at any time

porta.one/portabilling

Deployed by over 500 customers in 100+ countries

Visit **portaone.com** for more information

Uninterrupted service

Clustering and geo-redundancy provide high-availability configuration and zero downtime for updates

Clear cost structure

All features are included in one easy-to-understand subscription fee based on concurrent calls and number of billable events

Our customers love these features!

- Voice, Video, IoT/M2M, SMS, Data, VAS, IPTV, MVNO/E

- Real-time rating, bundles, discounts, recurring charges, invoicing

- Add-on Mart: a cloud VAS marketplace for telco apps
