Built for Government. Backed by Experience.

Modernizing Benefits Administration

Bentek helped Fond du Lac School District modernize and streamline its entire benefits administration by replacing manual, paper-based processes with a fully digital platform. Through automation, system integrations, and dedicated support, the district significantly reduced administrative burden, improved data accuracy, and enhanced the overall efficiency and experience of managing benefits for over 1,200 employees.

*“Smoothest implementation ever.” – Michael Gerlach,
Chief of Finance and Operations*

The Power of Seamless Benefits Integration

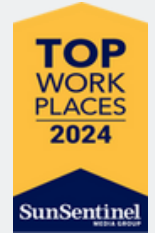

The City of Beaumont faced mounting frustration with manual payroll processes and delayed vendor support that often left critical issues unresolved for days. Bentek delivered a clear solution—integrating directly with payroll to cut processing time to under 30 minutes and providing near-instant support, with phone response times under a minute. The result: faster, more accurate administration and an HR team empowered to focus on strategic priorities instead of troubleshooting systems.

“Sometimes it’s so easy that it doesn’t seem possible that it’s right!” - Susan Krystofiak, Benefits Administrator

One System, 60 Agencies, Zero Discrepancies

The U.S. Virgin Islands government faced thousands of eligibility discrepancies across 60 agencies, disrupting benefits for over 27,000 members. Bentek led a full-system audit, integrated with payroll and retirement systems, and implemented automated checks. In just four months, the territory achieved accurate, real-time eligibility, clean billing, and a reliable system of record for the first time in over a decade.

*“We are thankful to the management and staff at Bentek for your professionalism, attention to detail, and steadfast commitment.”
- Valerie P Daley Chief, GHI, U.S. Virgin Islands*
