

All the insight you need... without the usual cost and complexity.

By unlocking the operational data your business creates every day, our smart, hospitality specific dashboards provide a single version of the truth and turn information into insight. This helps you make better decisions and maintain competitive advantage.

And this isn't just information from Fourth solutions. With a wide range of integrations to other third party data providers, its open architecture enables data to flow to and from the Fourth solution to improve performance, reduce errors and provide deeper analysis.

Fourth Analytics

Save time with all HR, scheduling, payroll, purchasing, inventory and POS data in one place plus third party data including social media sentiment, customer reviews and mystery diner.

- Eliminate hours of work and remove human error with automatic creation of reports and dashboards.
- Identify efficiency gains and draw meaningful conclusions more easily with graphical dashboards.
- Get a much better understanding of costs, sales and profits with more data to interrogate in a single place.
- Allow managers to act quickly with automatic and timely delivery of key performance indicators to the operation.
- Make better decisions and increase profits with smart data filters that enable you to see as much or as little data as you need.
- Get the industry's most accurate and extensive demand forecast, factoring in not just sales data from the last few weeks, but also year-on-year trends, notable days, local and national events, and weather.

Point Of Sale Integration

Get meaningful insights from every transaction via full POS data integration.

- Get transaction details as granular as you need them.
- Maximise profit by focusing on the least profitable day parts, with timeslot analysis by 15-minute interval.
- Slice intelligence into sales, margins and labour.
- Analyse staff behaviour including upsells, voids and discounts.
- Get greater insight into revenue and margin with basket analysis that reveals customer preferences and ordering habits.

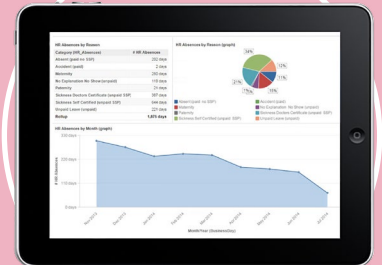

Workforce, Purchasing, and Inventory Analytics

Powerful analytics to give you a 360-degree view of labour performance, and keep you on top of recipes purchasing, inventory and suppliers.

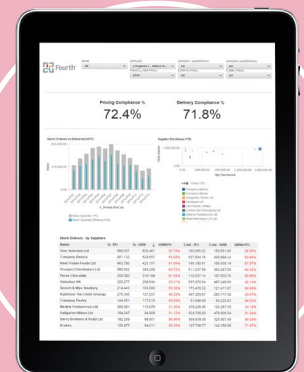

Workforce Management

- Keep track of starters, leavers, training, paid time off and absences with smart charts and graphs that show you the trends.
- Get the right people in the right place at the right time with a highly accurate, automated forecast.
- Identify labour saving opportunities, adding up to 2% to the bottom line.
- See how the teams are really performing with Employee Balanced Scorecards – at-a-glance views of absenteeism, upsell performance, progress against goals, etc.

Purchase-to-Pay and Inventory

- Understand the true effectiveness of your purchasing process and where compliance, cost savings and efficiency can be improved.
- Reduce waste by analysing the quality of your inventory management.
- Fully understand the profitability of recipes and menus, the impact of cost rises and where savings can be made.
- See your best – and worst – suppliers with Vendor Balanced Scorecards.
- Get your menu availability back on track with the right inventory at the right time to meet demand.

Third Party Data

Connect your systems to improve performance, reduce errors and get deeper analysis.

- Get a complete picture of your business to make better decisions by connecting systems simply and reliably.
- Incorporate feeds from anywhere, including mystery diner, review sites, social media, environmental health and kitchen display systems.
- Manage workflow better and eliminate errors by letting data flow through connected solutions.
- Save hours of time through by automatic creation of dashboards that would previously need to be manually compiled.
- Easily connect systems with our existing Application Programming Interfaces (APIs) or via Fourth Connect – designed to speed up and simplify the process of integrating our solutions with your in-house system or third-party solution.
