

Jint for SharePoint

The intranet that works, engages, and connects.

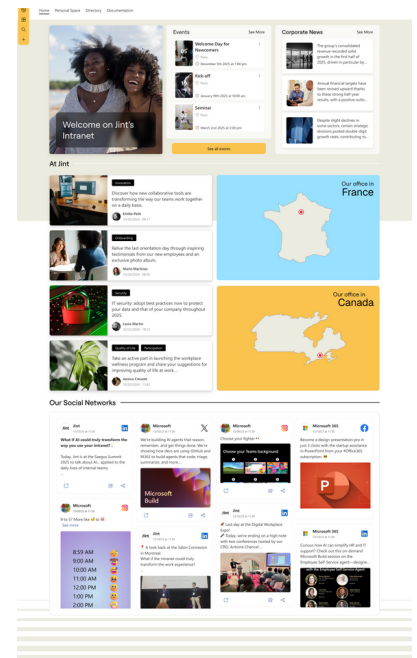

Directly in M365.

Why Jint?

Personalize. Simplify. Accelerate.

With Jint, SharePoint becomes more than just an intranet. Design a powerful and intuitive Digital Workplace made to streamline communication, boost collaboration, simplify knowledge access, and reconnect every team across your organization.

Key Benefits

Reflects your identity

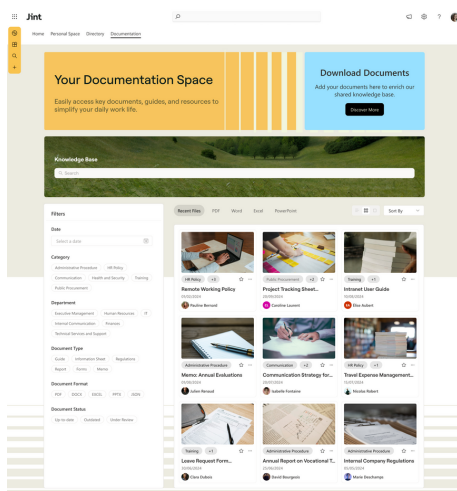

A customizable design that mirrors your brand and drives adoption.

Scales your platform

Over 60 ready-to-use web parts to create, adapt, and evolve your business spaces.

A Microsoft add-in

100% integrated with M365. Your data stays secure, within your tenant.

What You Achieve with Jint

Engage your employees

Deliver the right message to the right person, at the right time. All in an intuitive, visually engaging environment.

Find information instantly

With smart search and contextual filters, your teams get what they need in seconds. No wasted time.

Collaborate without friction

Give your teams a single, unified workspace where they can work faster, smarter, and with greater impact.

Reconnect your frontline teams

Offer on-site or mobile employees easy, instant access to essential information.

Built for your internal resources

Internal Communication Maximize message reach and craft an engaging digital experience.

Human Resources Simplify onboarding, strengthen company culture, and centralize HR resources.

IT Services Deploy a 100% Microsoft-based solution quickly, easily, and securely.

"The available components are of great quality and far beyond what's native to SharePoint. It allowed us to design an intranet that looks and feels like a real website."

Fanny Verchère - Communication Director
