Build Mobile Apps, Web Apps and everything in and around them.

Delivered over 700+ projects and worked with 500+ clients.

Around 50+ Open-source contributions.

30+ free and premium Tech Products and Solutions

Host and attend conferences and meetups on a global scale.

What We Do

Our Journey

Started in 2006.
Rebranded in 2011

Grew from a living room idea
to a full-scale organization

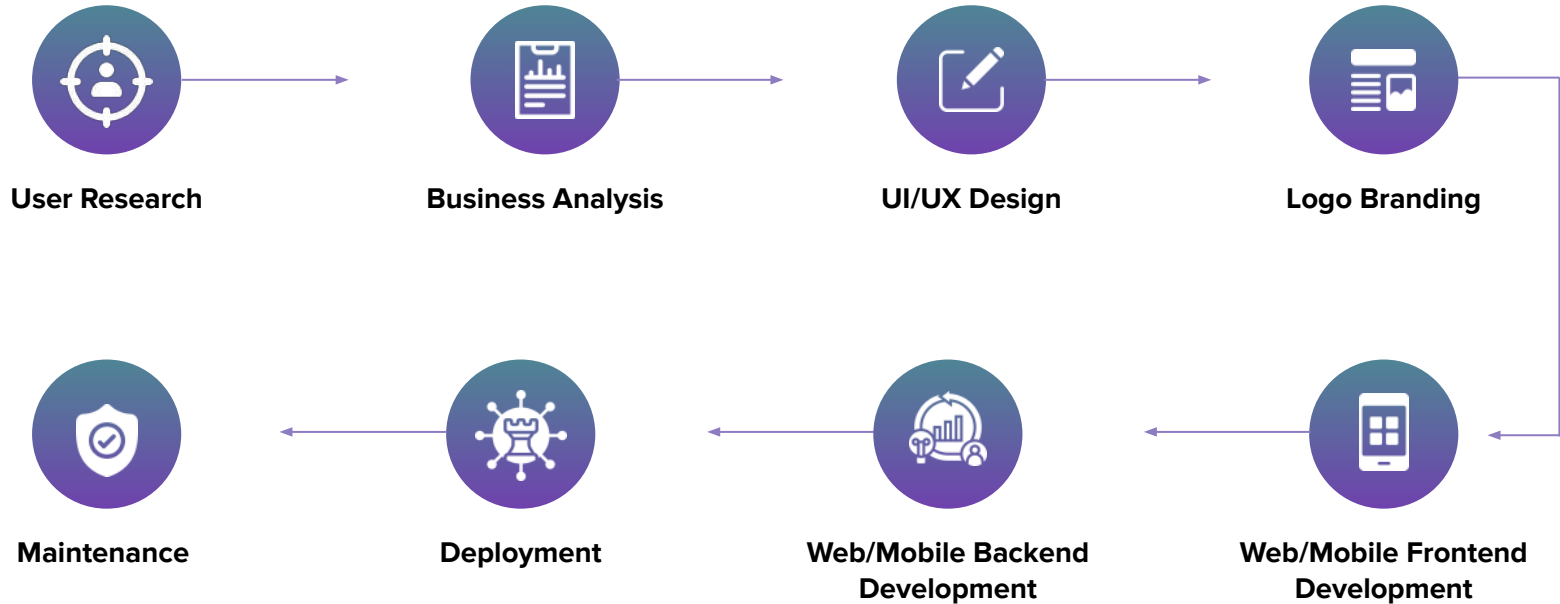

Started with 6 employees.
Now more than 400.

**Why do we call ourselves a
Product Studio?**

Our Product cycle

Our Services

User research/ interviews

Business Analysis

UI/UX Design

Logo/ branding, Design system

Web/ mobile frontend Development

Deployment

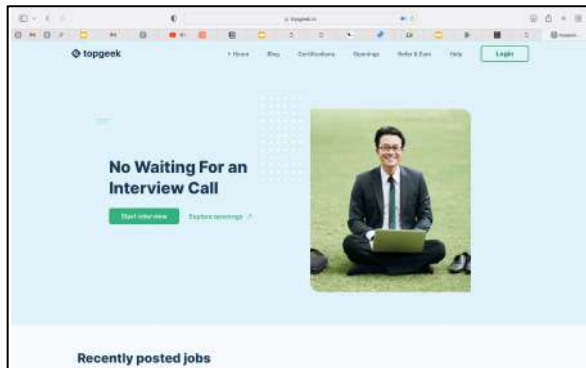

Maintenance and support

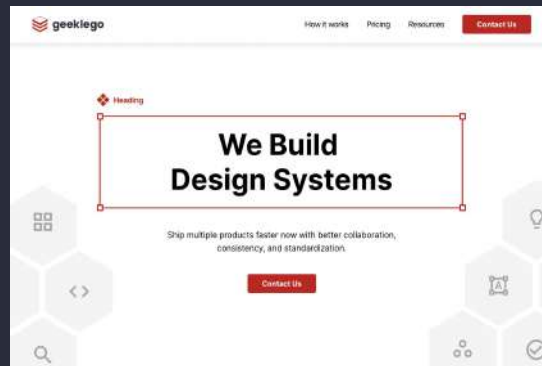

Productized services

An automated hiring tool created to help recruits and recruiters across various platforms take interviews with behavioural AI & ML techniques, making it asynchronous for both interviewers and recruiters

Automates the part of design building system process for building design components and provides the flexibility to customize assets, components and ship over website or documents.

Our Products and Open-Source contributions

NativeBase

The most popular open-source UI component library for React Native today.

Current standing at more than 15,000+ GitHub Stars also 3 Million downloads and counting.

The official technology behind the official Paralympic 2018 App.

With NativeBase, we have come up with UI kit which has 100+ responsive, accessible, dark mode compatible production-ready UI screens that work on web and native platforms.

More From The Authors

React Native Aria

React Native Aria brings the support of React Aria to React Native (Web, Android & iOS)

SyncState

A state management library for React & JS apps, based on JSON patches.

Formst

Model-driven Form library for React. It is based on MobX-State-Tree to validate & structure forms in React.

React Pluggable

A plugin system for JS & React apps. It pushes you to a feature mindset instead of a component mindset.

Flutter Starter

A Flutter starter-kit for production-level apps with Style guides, API calls, state management and much more!

pub.dev

A video player for flutter, the plugin gives low level access for the video playback

**Featured as a 'Top Development
Company' on many popular platforms like..**

Our Global Presence

We have open platforms like GeekCast, Live Streams, Twitter spaces for GeekyAnts personnel or external speakers to share their experiences. GeekSpeak is an internal event held weekly for all GeekyAnts members to driver the techtalks.

Proud hosts of React Native, Flutter, Angular, Svelte meetups in the Bangalore region, now fully remote due to the pandemic.

Attendees and speakers at international conferences such as: **Frontend Love, Amsterdam, Flutter London, Chain React, Portland** and more...

Events & Meetups

GeekyAnts has always been very active in the community with meetups, conferences etc and all of these became remote due to the pandemic but did not stop.

We started podcasts, live streams and much more to keep our devs engaged.

We host Live sessions and Meet-ups on YouTube, Twitter Spaces and Clubhouse nowadays to engage the community.

Our work With You!

How We Engage With You

MANAGED SERVICES

Fixed Scope Model (Estimate based)

A model opted when the scope is short-term and the project requirements and goal are clear. This works with the method of fixed sprints given on a fixed estimate before the work starts.

Agile or Scrum Model

A model for long term projects with a detailed road map, supported by product owners, business analysts, scrum master along with a scrum team. Usually opted when the project duration is more than 1 year.

UNMANAGED SERVICES

Resource Augmentation

Dedicated developers from the GeekyAnts team can work along with your team if you already have an execution strategy set and the project management taken care of.

Documentation & Association

Non-Disclosure Agreement

A document that protects your proprietary information and IP rights.

Master Service Agreement

Eases the process of decision making and offers a flexible system to complete projects.

Scope of Work

A document describing the details of the work to be performed.
