

Training Management Solution

SimplerQMS training management software streamlines your employee training processes. It automates training activities such as data collection, routing, reminders, and generation of training certificates, minimizing the lack of compliance due to employee training.

Key Benefits

1 Enhanced Productivity

Ensuring that your employee training is effective, well-documented, and compliant is time-consuming and prone to human error. Work more efficiently by automating training activities from routing and tracking status to notifications, and escalation of overdue activities.

2 Connected Processes

Avoid the risk of employees performing activities based on outdated SOPs, documents, and instructions. Connect documents to training and notify every time new trainable material is released.

3 Readiness for Audits and Inspections

Prevent compliance issues by ensuring that your employee training activities comply with the current good manufacturing practice (cGMP), are well-documented, data is stored in one place, and can be easily retrieved.

- ✓ ISO, FDA, GxP Compliant
- ✓ Pre-Validated eQMS
- ✓ Microsoft Office Integration
- ✓ Azure Cloud Hosting

Key Features

"Using SimplerQMS, when we onboard new employees, we just assign them a role and it will automatically tell the new employee which procedures and templates he or she is responsible for."

- Jacob E. Nielsen, Co-Founder and CPO, Cortrium

1 Automated Workflows

Ensures that all the relevant employees receive training activities based on their job roles, and get reminded every time a new trainable material is released. Automatically notify managers and employees in due time before certificates expire.

2 Dashboards and Automated Reporting

In SimplerQMS you get a real-time overview of your organization's training activities. With the built-in dashboards, you can review training activities by process, department, person, or document.

3 Encrypted and GDPR-Compliant Solution

Storing sensitive and confidential personal records in file sharing solutions, such as Dropbox can cause compliance issues. SimplerQMS allows you to handle sensitive and confidential personal records in our encrypted and GDPR-compliant solution.

4 Self-Learning and Train-By-Trainer

SimplerQMS supports a combination of self-learning and train-by-trainer activities. Easily carry out training events with trainable material and release signed training certificates to participating employees.
