

## Powering Latin America's cold chain with speed and scalability

### Before: Challenges and opportunities

- Rapid expansion across 11 countries and limited process standardization across regions
- Disparate finance and operational data sources
- Need for real-time temperature and operational visibility
- Growing demand for transparency and collaboration

### Why SAP and SEIDOR

- Scalable cloud ERP to support regional growth
- Flexible system adaptable to evolving business needs.
- Agile implementation with SAP S/4HANA Cloud
- Strong regional support from implementation partner SEIDOR

### After: Value-driven results

- One unified platform for finance and operations
- Real-time access to standardized reports across regions
- Improved cross-country collaboration
- Greater day-to-day operational agility
- Enhanced transparency for customers.

“SAP S/4HANA Cloud gives us the speed, flexibility, and scalability we need. It is the key to success for our future..”

Jimmy Espinosa, IT Manager, Emergent Cold Latin America LLC
