

So Many Ways to Use InfoReady

InfoReady is a flexible and versatile submission and application workflow platform. Originally developed to help research offices manage limited submissions and internal funding opportunities, InfoReady is now used in over 100 different ways across higher ed campuses.

In a recent survey of our clients, **76%** said they used InfoReady for 2 or more types of applications and forms, with an average of 3 ways. Once administrators see the power of the InfoReady platform to collect, track, route, and report, they quickly begin exploring creative and innovative ways to utilize it.

InfoReady can be used to eliminate most paper forms, digitize processes, collect reference letters and automate workflows to save hours of administrative staff time. With unlimited competitions, applicants and reviewers, there is no limit to the ways a team can use InfoReady.

Choose InfoReady for one use and you'll soon discover how useful it can be. Contact sales@inforeadycorp.com to learn how InfoReady can be used to make your work better.

78% Internal funding opportunities

39% Undergraduate student & research programs

29% Recognition awards & nominations

56% Limited submission competitions

34% Graduate student & research programs

25% Fellowships

"Anytime a piece of paper comes across my desk, and I recognize that's the fifth or sixth time I've seen that piece of paper, I'm in InfoReady trying to figure out if I can move it. I really look to InfoReady to get rid of a lot of paper."

Carol Wicks, Associate Dean, Graduate School, Louisiana State University

One Tool. Many Uses.

Here are some of the ways InfoReady is used across campus to streamline application, review, selection and approval workflows.
