FIEX Software

FlexiAnalysis

FlexiAnalysis is a reporting and analysis tool that provides accountants and financial analysts insight into your business, and it does so with a simple to use interface and leverages a familiar tool: Excel. A self-service BI tool designed for **Accounting Power Users**, and not BI architects or developers FlexiAnalysis gives finance users the ability to create graphs and analytical pivots with a simple **drag and drop** interface. It comes **out of the box connected** to various FlexiFinancials modules, such as FlexiPayables, FlexiReceivables, FlexiLedger, FlexiAssets and FlexiProjects, and removes complexity and mystery of how data is stored within the application's database.

You no longer need to ask your IT resources to build yet another report or data extract and then troubleshoot it for weeks. You can create sophisticated data tables, **interactive charts and graphs** all by using Excel while being connected to **live data** in your accounting system. Slicers, filters, drilldowns and different presentation forms gives you the flexibility to interact with your data in an intuitive way. You can always save your work for future reference and update it with new data at any time with a single click.

Create Reports Quickly and Easily

- Preconfigured connections to Flexi data use references friendly for business users
- Predefined templates around common business processes gets you started quickly
- Simple drag and drop interface allows power users to create new reports in minutes.
- Create visually appealing analytic models that combine various formats and charts and graphs
- Leverage your existing knowledge of Excel resulting in an easy learning curve
- Personalize your report format using standard Excel formatting
- No dependence on IT to build a data model for you

About Our Technology

Flexi's open, non-proprietary architecture is based on the latest Microsoft standards and tools. It supports industry standard databases such as Oracle and Microsoft SQL Server and allows for easy integration through Web services. The Flexi applications utilize Microsoft SharePoint to provide browser based, enterprise-wide content portal and workflow capabilities.

About Flexi Software

Founded in 1992, Flexi develops, markets, and supports FlexiFinancials, workflow-driven enterprise accounting solutions for companies in select industries including Banking, Insurance, and Financial Services. Flexi distributes its products directly and through strategic partnership agreements. Through many successful deployments Flexi has a proven track record of low cost of ownership, ease of use and improved business processes.
