

Case Study: Bradford City Council

We have always achieved the highest level of security, audit and compliance; thanks to Access Rights Manager we can now achieve these goals faster, more securely and with a greater depth of information.

Yunus MayatEnterprise Architect andInformation Manager

ABOUT BRADFORD

Bradford City Council employs approximately 11,000 employees who look after the needs and requirements of a residential population of over 522,000.

BUSINESS CHALLENGES

The level of security, audit, and compliance at Bradford City Council was already unparalleled; the challenge was to bring in a system that would retain this integrity while cost-effectively streamlining operations and adding additional functionality and efficiencies.

SOLUTION

SolarWinds Access Rights Manager

THE PRODUCT

SolarWinds® Access Rights Manager (ARM) is an access rights management solution for Active Directory®, file server, SharePoint®, and Exchange™. ARM is designed to show you who has access to a resource in order to give you the ability to remove or grant access permission. Instead of a simple discovery and administrative solution, ARM has a wide range of features to help companies incorporate workflows, best practices, and policy to help ensure problems with access privileges do not occur.

Customers use ARM for a wide range of reasons: to restrict access rights strictly on a need-to-know basis, to meet stringent compliance standards, to use IT resources more efficiently, to institute security policy, and more. Simply put, ARM saves you time and effort while allowing you to manage your resources along best practice guidelines.

SOLARWINDS ACCESS RIGHTS MANAGER

SolarWinds® Access Rights Manager (ARM) is designed to assist IT and security admins to quickly and easily provision, deprovision, manage and audit user access rights to systems, data, and files so they can help protect their organizations from the potential risks of data loss and data breaches. By analyzing user authorizations and access permission you get visualization of who has access to what and when they accessed it. With just a few clicks, customized reports can be generated to demonstrate compliance with most regulatory requirements. Provision and deprovision users using role-specific templates to help assure conformity of access privilege delegation in alignment with security policies.

KEY BENEFITS

- » With ARM, you can quickly analyze and identify who has access to which resources in your IT environment.
- » ARM documents every change in rights of access across various technologies and environments, and displays this information in one intuitive interface.
- » ARM helps enable the certification for important current legal and regulatory guidelines (e.g., BSI, SOX, ISO, PCI DSS).
