

Vena

Vena for Beyond Planning

Beyond Your Expectations

Anything Excel can do, Vena can do better.

Vena's analytical and integrated growth engine gives you the power to plan and manage anything with intention. Unify your processes across your business with Vena's Beyond Planning configuration, and gain the visibility you need to move your business forward.

Automate and accelerate any of your complex business processes, from inventory management to annual marketing plans end-to-end with Vena. Discover efficiencies and maintain data integrity and security, so you can save time and focus on amplifying your complete business performance.

We're going to show you some of the things you can do with Vena. But it doesn't stop there. If you can put it in Excel, you can accelerate it with Vena.

“ Usually with flexibility, you get complexity. And with simplicity, you get rigidity. With Vena, you can have both flexibility and simplicity in one platform.

Excel Further

Vena isn't just for finance. Companies use Vena cross functionally to make the decisions that drive their value, from marketing plans to project management to inventory planning.

We don't believe in one-size-fits-all. You can create any collaborative process you need in Vena, regardless of your industry. Making industry-specific workflows for your critical organizational functions is simple with our workflow tools.

Take a look at some of the innovative ways people are using Vena across their businesses. What can we create together?

“ I can look at any data source and say ‘I wonder how I can pull that together in Vena.’ Systematically, one by one, it was like ‘wow’.

Hit the Ground Growing

Vena is built for complex planning and management processes across your business. The same features that make Vena the perfect choice for managing and handling your financial data work together to streamline your processes across the organization.

Vena's driver-based planning gives you the power to plan based on what matters, regardless of the department, process or KPI. Our user delineations assign permissions for reviewers, approvers, and submitters, so you can keep your chain of command and your data intact. Cascading, validation rules and drill-down keep your data clean and manageable, whether you're working for HR, IT, or Legal. If you can dream it in Excel, you can achieve it in Vena.
