Maximise your mobile workforce productivity by connecting them via the Joblogic mobile app. With access to job information, customer history and compliance workflows, everything they need to complete a job is fully accessible via a smartphone or tablet.

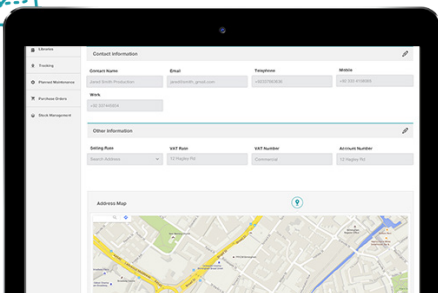

MAXIMISE YOUR PRODUCTIVITY

Communicate in real time with your mobile workforce to eliminate unnecessary visits to the office, and decrease the number of time consuming phone calls. With efficient communication technology, you will see your first time fix metrics rapidly increase, and the number of completed jobs per day improve almost instantly. Collect all job information including parts, times and signatures to ensure your invoices can leave the office on the same day.

JOB INFORMATION IN THE PALM OF YOUR HAND

Joblogic mobile provides your engineers with instant access to important information to help them complete a job, such as the last time an asset was serviced, or the last time an emergency repair was completed. With a fully integrated offline, mobile solution for both Android and iOS devices, your engineers can carry on working even without signal.

GPS TRACKING

Joblogic Mobile's Google Maps integration allows you to track your mobile workforce to help you to assign jobs to the most suitable person based on their current location. Each status change is GPS stamped allowing you to easily verify the electronic timesheets that are captured via the app. Joblogic Mobile records all travel and labour times for each job, which means that timesheets are fully integrated with job costing for accurate profit and invoice analysis.

GET COMPLIANT

Joblogic Mobile comes complete with a suite of industry standard compliance forms such as risk assessments and trade specific workflows. Do you have a bespoke workflow or report that you need to fill in on site? No problem, we'll create a completely electronic version exclusively for your use on our app.

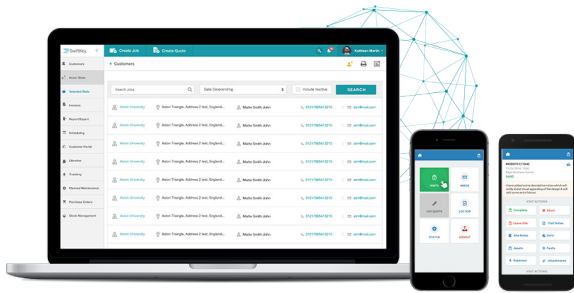

Training

To ensure your business gets the most out of Joblogic, we offer interactive training sessions at our offices in Birmingham or we can visit you at your premises. To help you out along the way we have a dedicated help centre on our website with access to user guides and webinars.

With everything stored and backed up securely on the cloud, Joblogic ensures you have 24/7 access to your data from anywhere around the world. Minimise paperwork, maximise workplace positivity and increase productivity.

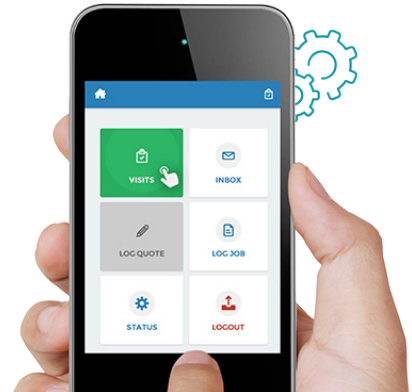

CENTRALISE YOUR DATA

Get all of your customers, jobs, invoices and purchase orders into a single centralised system. With powerful tools such as Google Places integration, creating records for customers and suppliers is quicker than ever. Log all reactive repairs, turn quotes for installs or projects into jobs and set up all of your planned maintenance schedules.

EASY TO USE

We've designed our system to make sense to the people that work in the building, services and maintenance industry. Drawing on our extensive industry knowledge we've built powerful features into simple screens to help your back office team to become more efficient than ever.

BACKUP AND SECURITY

As Joblogic is completely cloud based, you don't need to worry about purchasing servers or other expensive hardware as everything is looked after by us. So whilst you get on with growing your service company, we'll take care of the technical side to allow you to run and maintain your business from anywhere.

INTEGRATION

Need a link to your accounts software? No problem, we have standard links to Sage, Quickbooks, Xero, KashFlow and FreeAgent. Need to link to another accounts package or other 3rd party system? We're experts in integration, so talk to us and we'll have you covered.

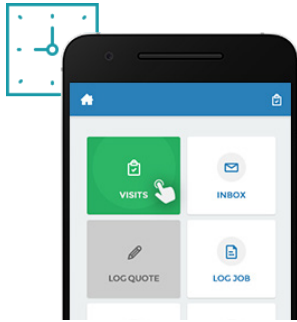

Free Support

Our support team are always happy to help with any technical issues or to answer any questions you might have. This service allows you to call, email or live chat with one of our representatives completely free of charge!

With Joblogic's simple job costing and billing process your cash flow will be dramatically improved. Your clients will not only be impressed by the quality of your work, but also the whole experience from logging their call through to receiving your invoice.

WIN AND RETAIN CONTRACTS

By giving your customers access to a portal you'll put yourselves ahead of the competition. They'll be able to log in 24/7 and see their jobs progress in real time. The dashboard reporting, asset register and document store will create a genuine wow factor. We can even send a snippet of code to your website developer so that they can add a client login button to your own website in minutes.

REDUCE PHONE CALLS & WIN MORE BUSINESS

Our specially designed portal is a proven tool for increasing customer confidence in your services, by improving your customer's overall experience and enhancing your company image. From logging jobs and quotes to reviewing job information, your customers will have 24/7 access to their business profile.

BRANDING AND IDENTITY

Whilst Joblogic is off-the-shelf software we recognise that you need to put your own stamp on the documentation that the system generates. You can upload your company branding onto quotes, invoices and purchase orders along with any other customer facing documentation. The system enables you to standardise your documents and create a professional image to impress new and existing customers.

Industries

 Plumbing & Heating	 HVAC	 Property Maintenance	 Facilities Management	 Electrical Maintenance
 Fire Safety	 Drainage	 Roofing	 Water Treatment	 Security Equipment
 Catering Equipment	 Automatic Door	 Specialist Equipment		

Invoicing

Why Joblogic?

- ✓ Single system - Connect your office, mobile engineers and customers
- ✓ World class mobile app for iOS & Android - works fully offline
- ✓ Do more jobs per day and invoice quicker
- ✓ Go paperless - we will convert your paper forms to digital
- ✓ No installation, no server, access from anywhere on any device

Is Joblogic difficult to use?

We've designed our system to make sense to the people that work in the building maintenance industry. Drawing on ongoing feedback and extensive industry knowledge, we've built powerful features into simple screens. Joblogic will help your back office team do their job better than ever before. And it will not require any special IT skills. Moreover, we offer free* training that we tailor to your business to make sure all of our users are confident to use Joblogic.

How will my mobile engineers benefit from Joblogic?

Joblogic is designed to maximise your mobile workforce productivity by connecting office and field engineers via the Joblogic Mobile App which they can access on their tablets or smartphones. Give your engineers job information, customer history and compliance workflows without the need to return to office after each job completion and save their time by not having to deal with old-fashioned paperwork.

How will Joblogic improve customer service of my business?

With Joblogic's simple job costing and billing process your cash flow will be dramatically improved. Your clients will not only be impressed by the quality of your work, but also the whole experience from logging their calls by themselves, through to receiving your branded invoices.

What does 'everything in a single system' mean?

Joblogic is a tool that centralises data - it enables you to keep all your customers, assets, jobs, quotes, invoices and purchases in a single system. With powerful features such as Google Places integration, creating customers and suppliers is rapid. Log all reactive repairs, turn quotes for installs or projects into jobs, and set up all of your planned maintenance schedules. With Joblogic, you no longer have to complicate things by using and paying for a variety of systems.

Will Joblogic change the way we manage jobs in our office?

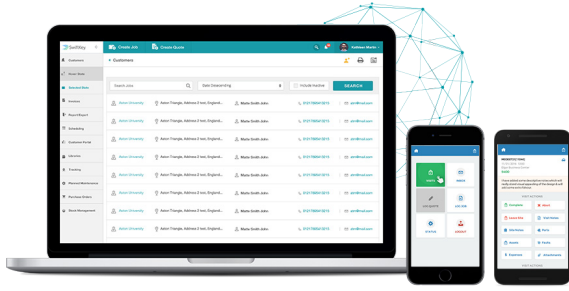

Joblogic will minimise paperwork. All your company data will be kept in one place, backed up and securely stored in the cloud, whilst being accessible 24/7. As a result, your office will become more productive by not having to chase your mobile workforce and waste time on paperwork.

How secure is Joblogic? Does it provide backup?

Joblogic is completely safe as it works in the cloud, so you can let us worry about securing your data and backing it up whilst you get on with growing your service company! You don't need a server or other expensive hardware. Simply use the internet to connect and run your business from anywhere.

Does Joblogic integrate with third party accounts software?

Do you need a link to your accounts software? No problem, we have standard links to Sage, Quickbooks, Xero, KashFlow and FreeAgent. Need to link to another accounts package or other 3rd party system? We're experts in integration so talk to us and we'll have you covered.

After consistently delivering intelligent solutions to service companies, we have gained an impeccable reputation in the industry. Our rapidly growing client base is a testimony to the trust being given to our solutions by established and small service companies. Joblogic enables you to take the next step towards better efficiency, productivity and profitability.

Explore the system by yourself and sign up for a

No card details. No spam.

This way you can see how you can improve your job management process and save money with Joblogic.

Don't hesitate to **contact us** with any enquiries, and our consultants will be more than glad to be at your service. We also offer a **free demo** session where a member of our team will introduce Joblogic in the context of your business.

“ We were originally using excel spreadsheets and other customer systems to book jobs. When we started using Joblogic, it gave us the facility to log our own jobs and we noticed we were becoming more and more efficient over time. ”

Rob Messore

IT Infrastructure Manager
Three Nations Limited

“ The biggest benefit is the maintenance management system where you can plan your maintenance visits and Joblogic will automatically generate your jobs for you. It's really improved the way we used to work compared to the traditional T-Card system which had become hard to manage. ”

Nick Oxtoby

Operations Director
