

# Sigma: The Only Analytics & BI Tool Built for Snowflake

Unlock data insights housed inside Snowflake's Data Cloud in record time

Teams are handling a bigger volume and variety of data than ever before, and rapidly investing in Snowflake's Data Cloud to scalably store, centralize, secure, and access this information.

The problem? Most analytics and BI tools fail to deliver a human connection to data. Gleaning insights from BI tools has required coding expertise, forcing business teams to rely on data experts for the answers they need. Report request queues delay decision making and drive business experts to extract data to spreadsheets, which causes governance issues.

Sigma has transformed the data analysis experience by giving everyone direct, governed access to the Data Cloud. Sigma's familiar spreadsheet UI empowers teams to analyze billions of rows of live data and quickly uncover insights that drive business outcomes.

## Purpose-built for Snowflake

- ✔ Say goodbye to stale, risky data extracts and access live data directly from Snowflake
- ✔ Easily query the ever-expanding universe of data sources and types, including JSON
- ✔ Explore raw tables with no modeling required, and curate endorsed, reusable datasets for business teams

## Spreadsheet UI

- ✔ Empower teams to independently do complex, iterative analysis in a UI they know and love: the spreadsheet
- ✔ Give business users the full power of SQL without having to write a single line of code
- ✔ Allow teams to go beyond the dashboard and dig into the underlying data to answer follow-up questions

## Unlimited Scale

- ✔ Take advantage of the scale and speed of the cloud — Sigma auto-generates SQL and pushes it to Snowflake
- ✔ Query billions of rows of live data with dozens of joins and get answers in seconds
- ✔ Analyze live data at the lowest level of detail — no summaries, reduced extracts, or aggregates required

**“With the combined compute speed and analytics capabilities of Sigma and Snowflake, we reduced our **time to data insight by 93%.**”**

**Jessica Nielsen**  
Data Analytics Manager,  
The E.W. / Company
