

Akurateco Payment Orchestration Platform

2026

akurateco.com

One Platform to Connect Multiple Payment Providers, Optimize Transactions, & Expand Into New Markets Faster

Boost Your Payment Performance

Maximize approval rates and minimize costs with built-in smart routing, cascading, and automatic updates.

Gain Full Control Over Your Payment Flow

Take charge of every transaction. Expand to new markets, set your own rules, and scale without building infrastructure from scratch.

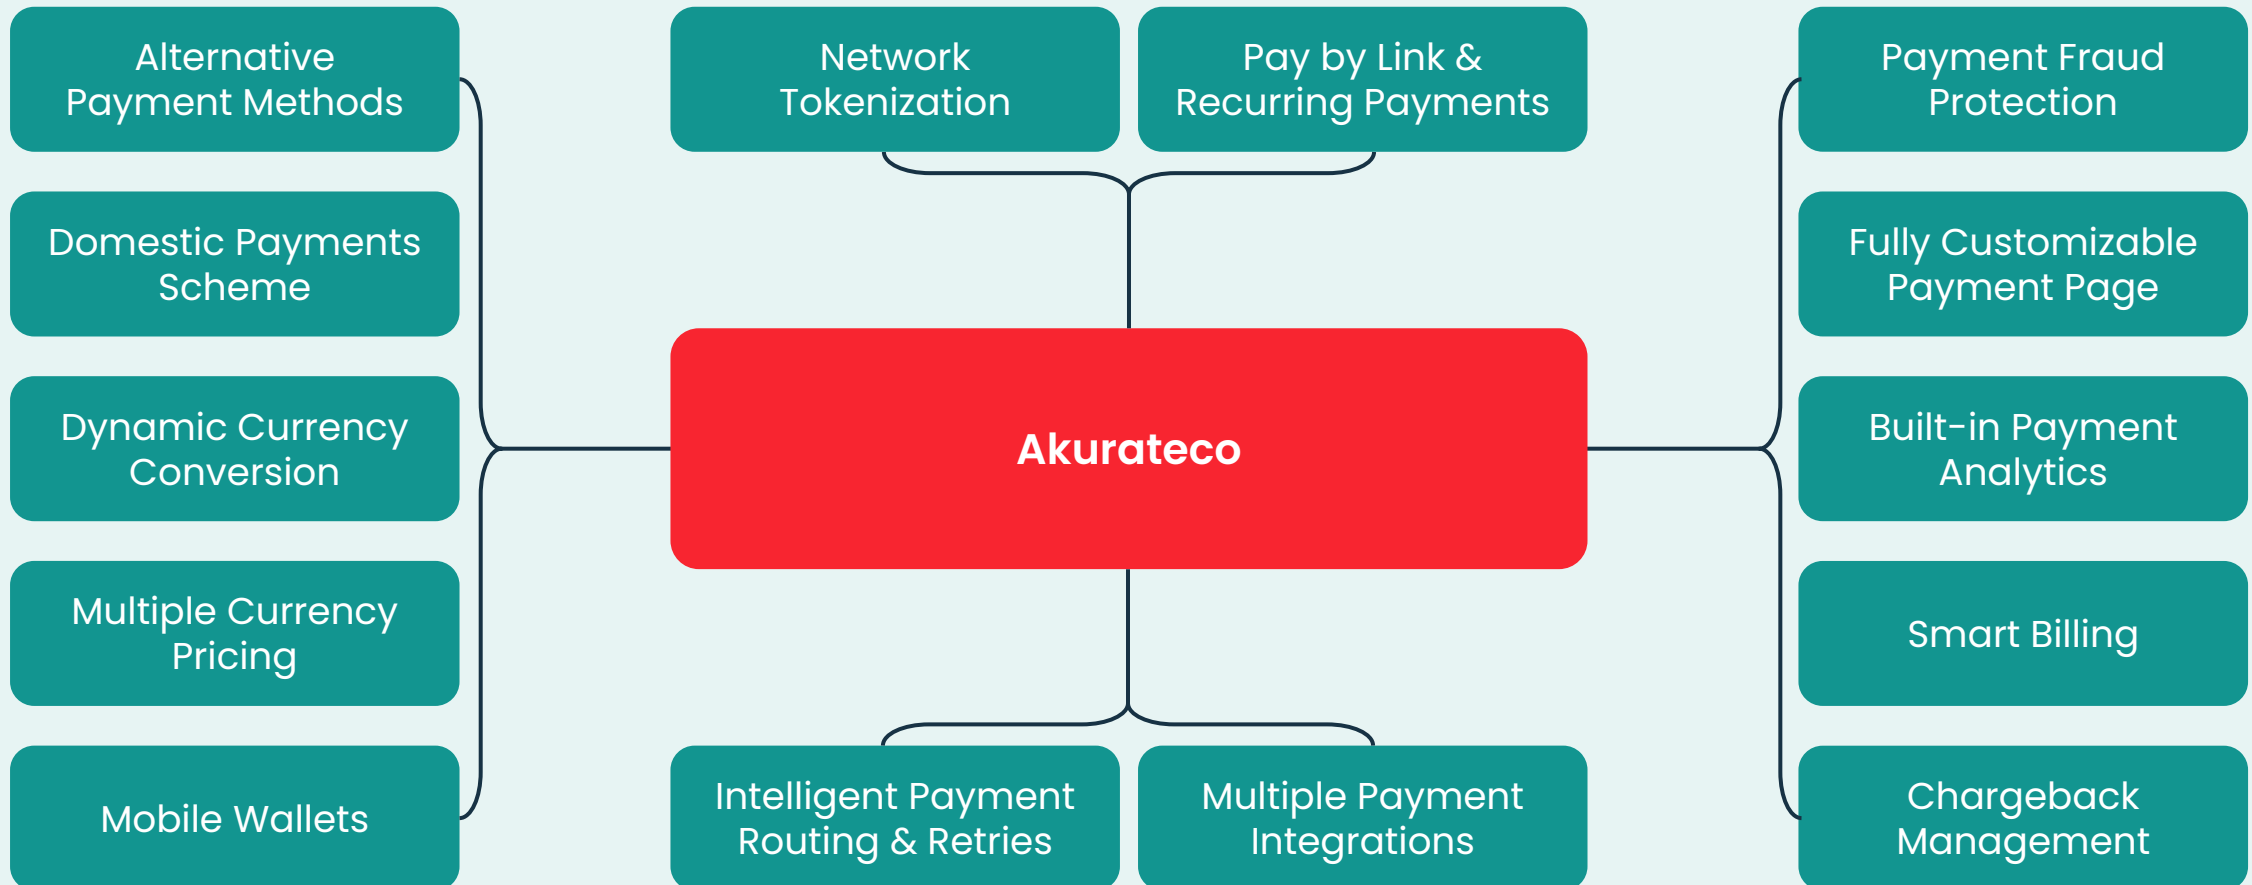

Access Global Payment Coverage

Leverage 700+ integrations with banks, acquirers, APMs, and local providers worldwide via one integration to the platform.

Akurateco at a Glance

Akurateco is a PCI DSS Level 1-certified payment orchestration platform for businesses that want to take control of their payments.

through provider
optimization

Up to 25%

lower processing
costs through smarter
routing

99.95%

platform availability
with automatic
failover

700+

payment integrations
via one integration to
the platform

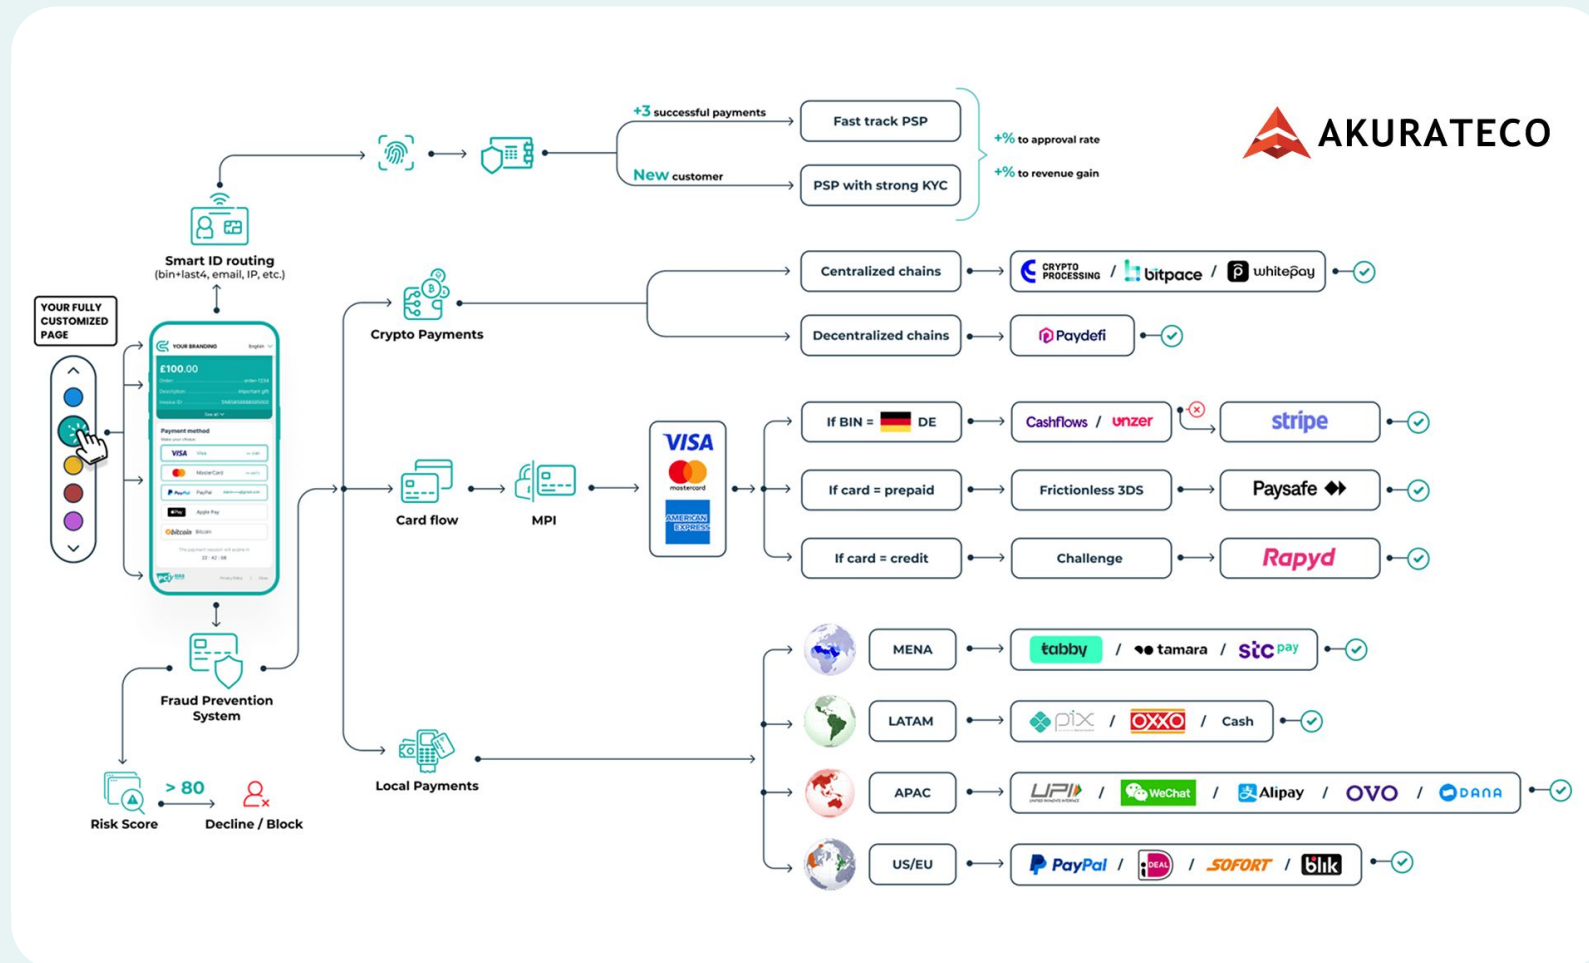

5-7 days

to launch a PSP
under your own brand

Smart Routing & Retries

Send each transaction through the payment route most likely to succeed.

Routing can be based on:

- Card brand
- Payment method
- Card BIN / issuing bank
- Transaction amount

Akurateco also monitors:

- Conversion rate
- Chargeback rate
- Response time
- Number of payment attempts

Result:

- Better approval rates
- Lower costs
- Fewer lost transactions
- Less dependency on 1 provider

Global Coverage & Local Payment Choice

Launch new payment methods and regions faster through 700+ ready-to-use integrations.

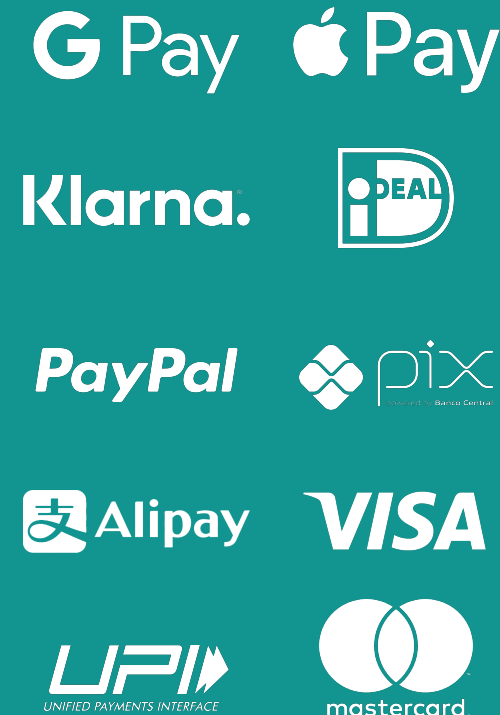

Connectors:

Acquiring Banks:

Payment Methods:

Anti-Fraud Providers:

Your Own Payment Team as a Service

Free your internal team to focus on business growth while our dedicated account managers handle complex challenges across your entire payment stack.

Strategic Alignment

We translate your business goals into a scalable payment strategy that supports growth, expansion, and profitability.

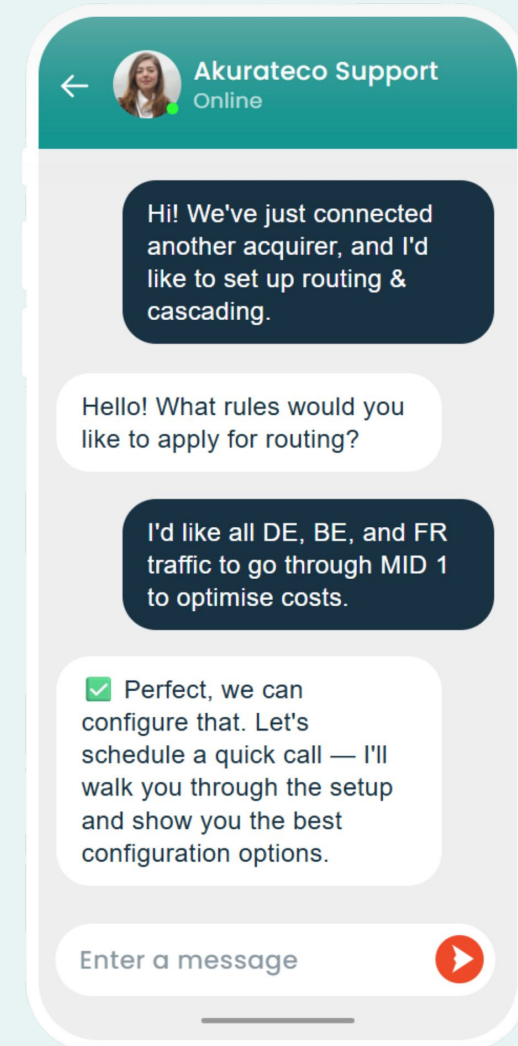

Expertise-Driven Team

Backed by 15+ years of hands-on payment industry experience, we keep your payment flows stable, compliant, and optimised.

Global Compliance

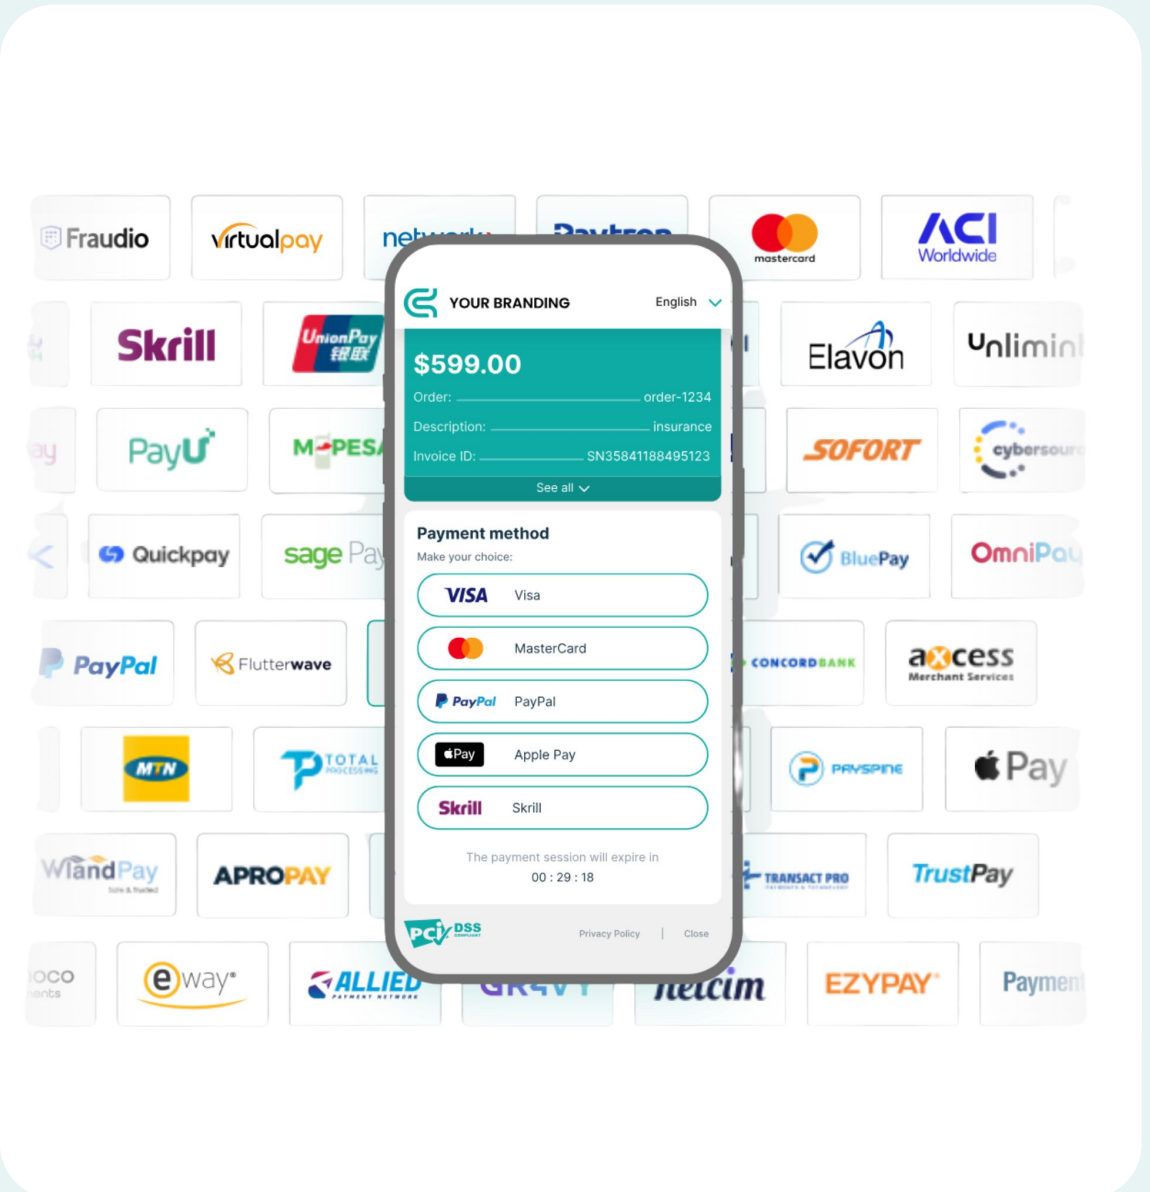

Stay ahead of regulatory changes with experts who understand international standards and local market requirements across regions.

Customizable Checkout Experience

Choose the checkout setup that fits your brand, customer journey, and technical needs.

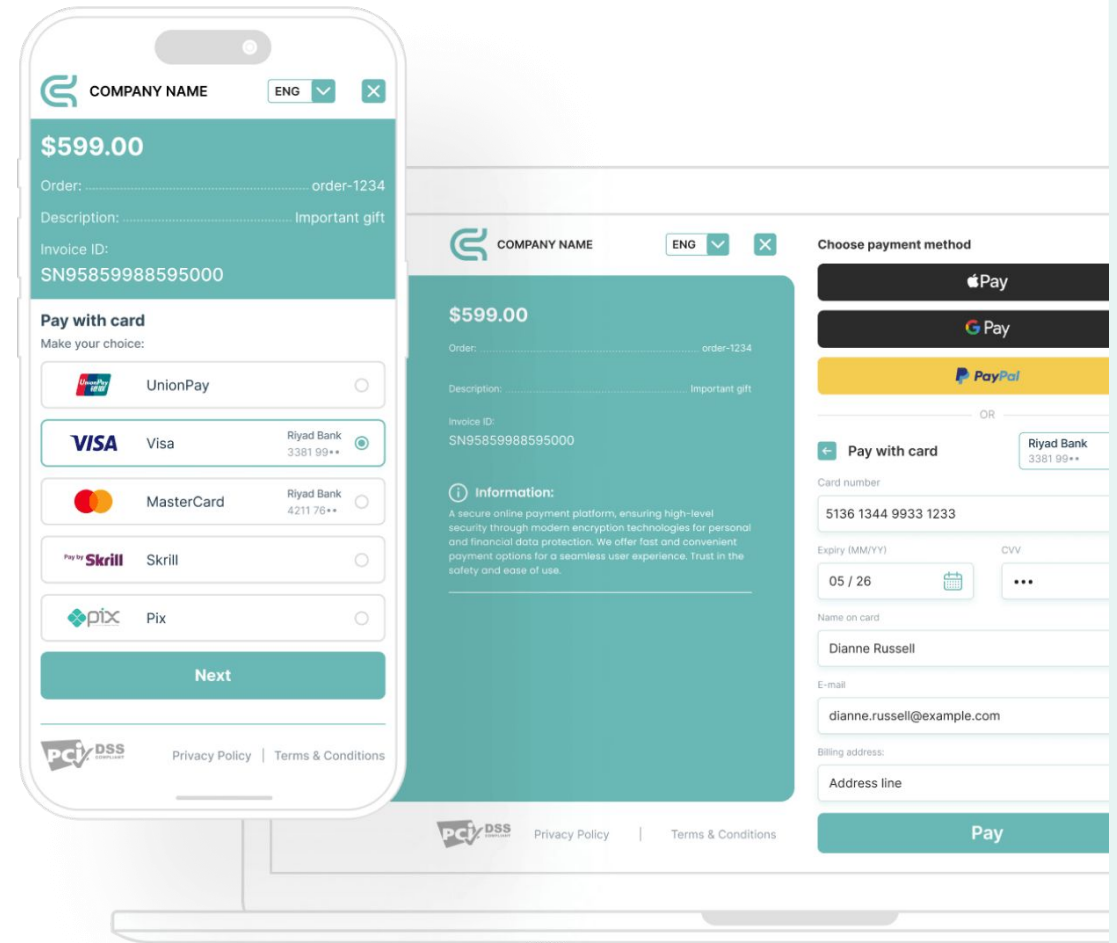

- Hosted payment page with full branding and localization
- Payment fields embedded into your website or payment page
- Checkout SDK for a fully custom checkout design
- Over 25 languages and 700+ payment methods
- Mobile wallet support, real-time card validation, and responsive design

Subscription Engine

Manage recurring payments, billing cycles, and subscription-based revenue from one platform.

- Create and manage recurring payment flows
- Support tokenized repeat payments
- Configure billing cycles and payment schedules
- Automate retries for failed recurring payments
- Monitor subscription payments and transaction status

Tokenization & Payment Security

Secure payment data and support repeat payments with tokenization and PCI DSS Level 1-certified infrastructure.

- Network tokenization support
- Secure vaulting for stored credentials
- Proprietary tokens for recurring flows
- Reduced exposure of sensitive payment data
- Support for tokenized mobile wallet payments

Fraud Prevention & Risk Control

Control fraud and chargebacks without blocking good customers.

- Fraud filters and velocity checks
- Risk-based routing rules
- Provider-level risk insights
- Chargeback and decline reason management
- Real-time transaction monitoring

Reporting, Reconciliation & Settlement

One dashboard for transaction visibility, provider performance, settlement, and reconciliation.

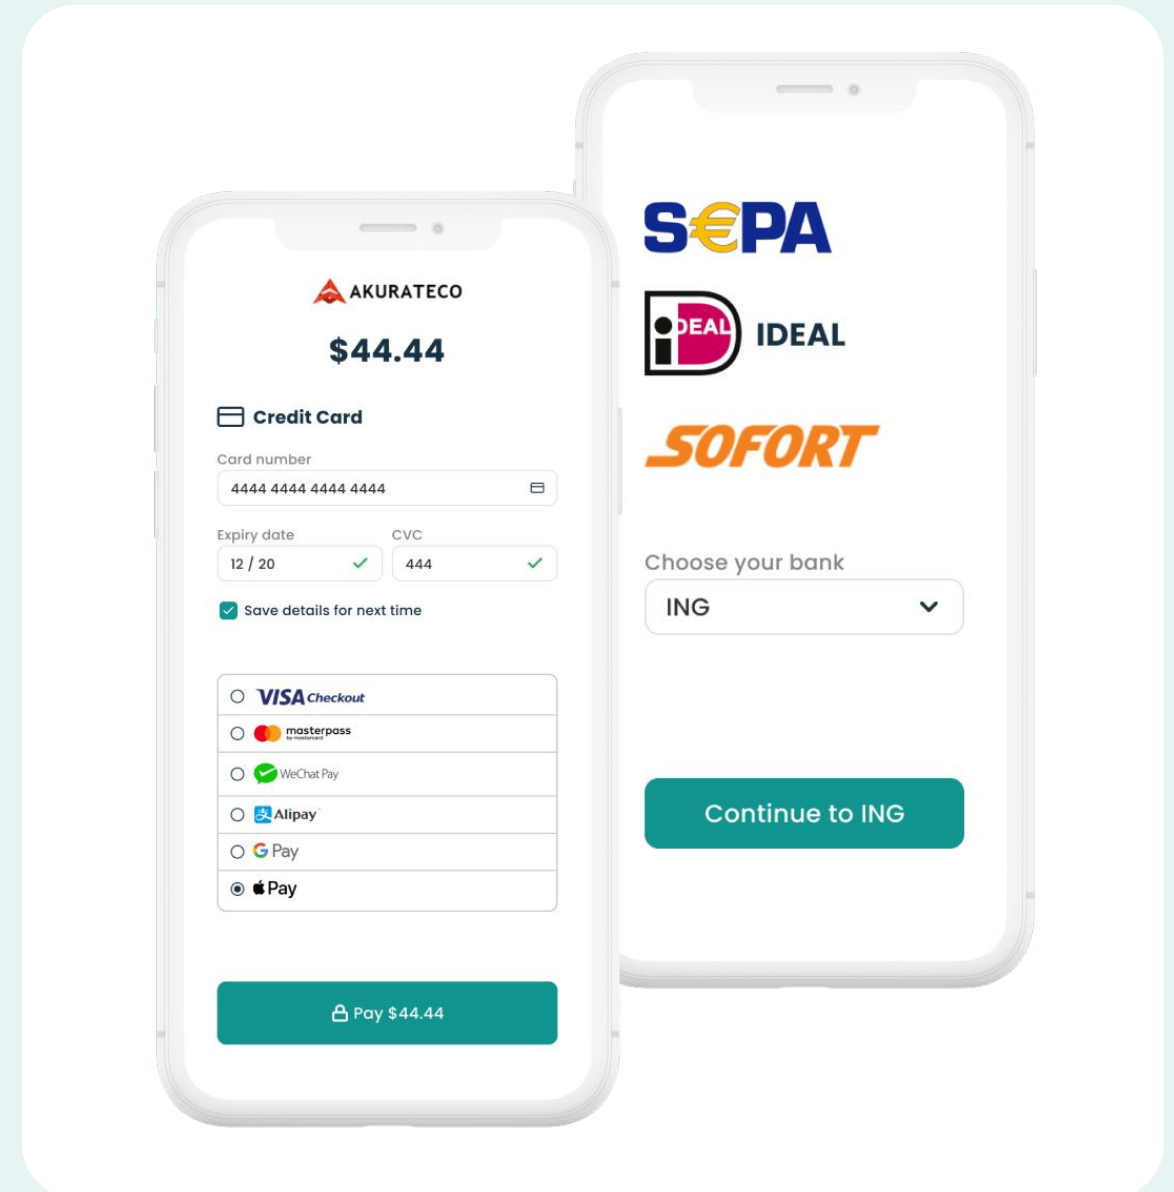

- Unified transaction monitoring
- Provider and payment method analytics
- Settlement and reconciliation tools
- Smart billing and invoicing
- Custom reports for payment teams

	Count	Fee	Total
Success	30578	0,05	1528,9
Decline	1224	0,05	61,2
Refund	305	0,5	152,5
Chargeback	3	35	105
Subtotal			1847,6
Setup fee			-500
Monthly fee			-200
Subtotal			-700
Total			1147,6

Pay by Link & Remote Payment Flows

Accept payments outside the standard checkout.

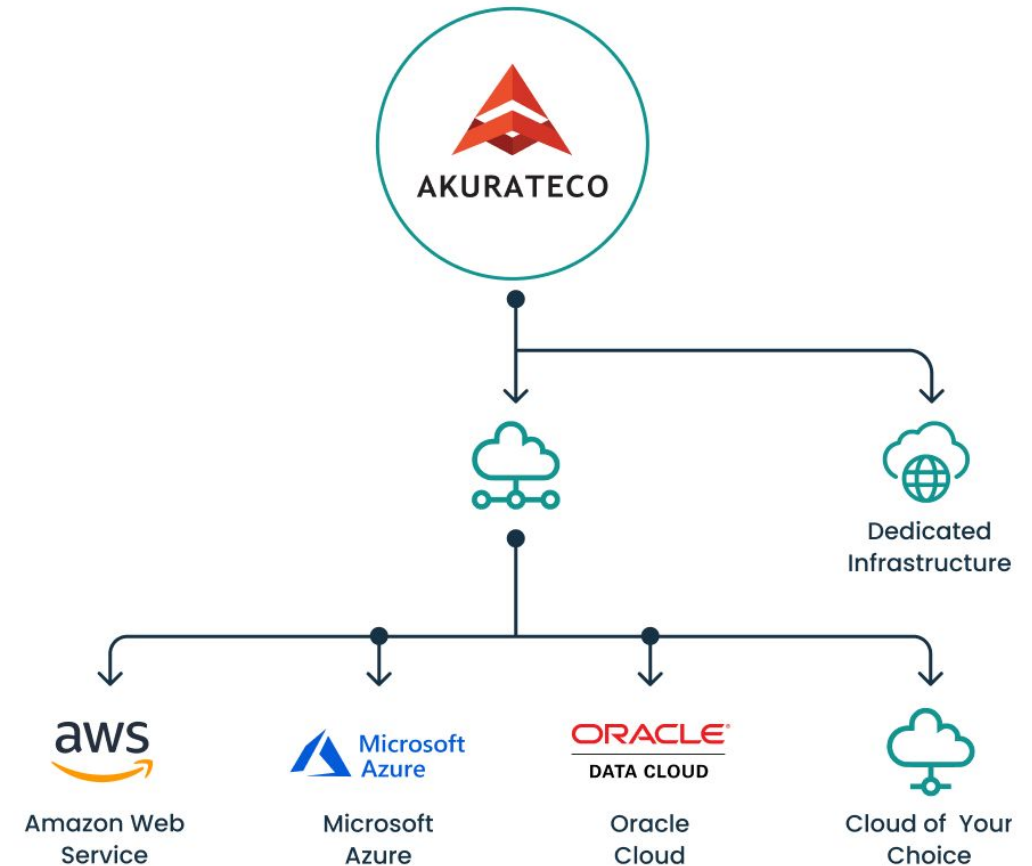

- Secure payment links
- One-time and recurring invoices
- Sales- or support-assisted payments
- Remote and out-of-session collection

Flexible Deployment & Integration

Choose the setup that fits your business, security, and regulatory requirements.

- SaaS for faster launch
- Private cloud for more control
- On-premise for infrastructure-specific needs
- Hosted Payment Page, API, CMS plugins, SDKs
- Custom payment flow configurations

Features That Set Akurateco Apart

User-friendly tools that give you granular control over every payment.

01

In-house antifraud filters

Configure your own fraud rules and velocity checks in-platform — no third-party tool required.

02

Sticky card

Keep each card on the acquirer that first approved it to lift repeat-payment approval rates.

03

Trusted / untrusted traffic routing

Separate vetted traffic from risky traffic and route each down the most suitable path.

04

Smart ID

Recognize returning payers across providers for a smoother, safer checkout experience.

Features That Set Akurateco Apart

More built-in ways to fine-tune approval, flexibility, and branding.

05

Full-control 3DS flow

Decide when to trigger, skip, or enforce 3-D Secure on every single transaction.

06

Custom payment fields

Add your own checkout fields to capture any extra data your business needs.

07

Per-product page branding

Give every product or brand its own fully branded, localized payment page.

08

Decline reason management

Turn raw decline codes into clear, actionable reasons that drive smarter retries.

Why Akurateco?

Akurateco combines global connectivity, payment optimization, flexible deployment, and dedicated expert support.

1

Dedicated account manager to support your growth

30%

Boost in approval rates with intelligent routing

3

Deployment options available: SaaS, On-Premise and Cloud-Agnostic

30%

Reduction in processing costs through optimized transaction flows

5

Days to get payment processing up and running

99.95%

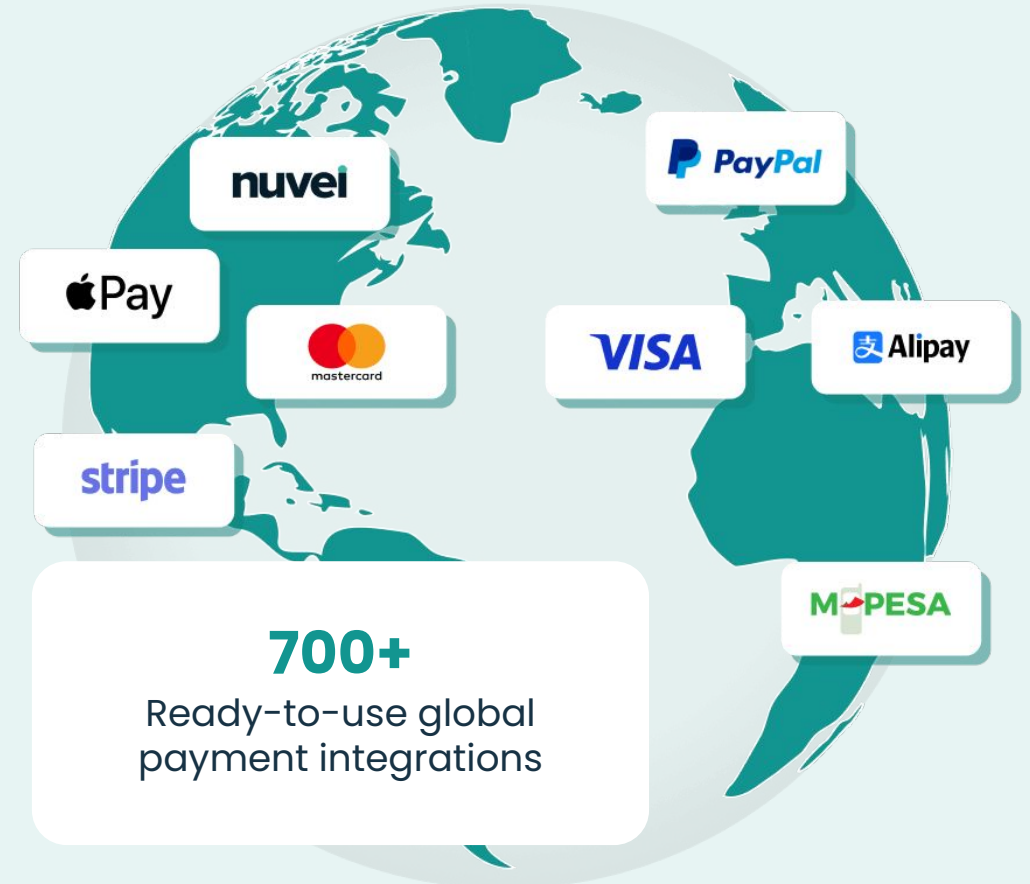

Uptime SLA for uninterrupted payment operations

14

Days to develop and launch new integrations

200+

Currencies and cryptocurrencies supported
