

Cloud-based fax service for secure delivery

Transmit documents at volume to anywhere in the world, while adhering to global data security standards.

Get scalable cloud fax with a flexible API and seamless integrations.

Use enterprise-grade fax from anywhere.

Send and receive faxes online through your email, the native web interface, mobile, and other scanning devices.

- OCR, convert, classify, and extract data from faxes and index them
- Enable powerful workflow tools to automate fax routing, reception, and delivery

Integrate cloud fax into your IT environment.

Use our developer fax API to fully integrate secure, auditable cloud fax, with no up-front investment or ongoing maintenance.

- Integrate with leading CRM, ERP, EMR/EHR, and email platforms, including MS Outlook, Salesforce, SAP R/3, and more
- Tailor to a variety of development environments such as REST, SOAP, and PHP

Enterprise-ready, right out of the box

Transition from on-premise fax to fully hosted cloud fax quickly and smoothly and get immediate access to the robust capabilities your business demands.

Robust security and encryption

- Compliance with global data sovereignty laws

Flexible controls

- Customizable fax headers and cover pages
- Granular user credentials and permissions
- Delivery confirmation policies
- Automatic retry attempt settings

Additional capture features

- Automated data extraction and indexing
- OCR, conversion, and compression
- Scanning device enablement
- Customizable document workflows

Advanced fax features

- Mail merge features for lists and personalization
- Multiple destinations and deferred transmission
- Document resolution
- InterFAX Salesforce API
- Print to fax driver
- Cover page templates
- Bulk message downloads
- Custom dashboard with home page widgets

Online fax solutions built to industry standards

Our secure, auditable cloud fax meets complex document distribution needs and adheres to demanding compliance standards.

Meet rigorous industry compliance standards.

InterFAX is HIPAA and PHIPA compliant, ISO 27001 accredited, and the first cloud fax provider to be PCI DSS Level 1 certified.

Empower your remote workforce.

Allow users to safely access secure online fax from any desktop or mobile device whether they're in the office, in the field, or working from home.

Reduce your IT burden and scale with confidence.

Our fully hosted solution offers guaranteed continuity and unlimited scalability—no hardware installation, software licensing, or additional phone lines required.

InterFAX's team of experts will help you define the appropriate approach for your digital transfer needs, ensuring our technology aligns with your current workflows and future goals.

Ready to get things done?
