

On-demand Remote Proctoring for Business

Whether you need to validate the critical competencies of employees or job candidates or protect the integrity of your certification exam, you can trust Honorlock with all your corporate proctoring needs.

Validate Competency Assessments

When you're measuring employee proficiency levels against job requirements or the skillsets of interview candidates, you need a way to validate assessment results. Remote proctoring by Honorlock levels the playing field by ensuring test-takers are following your test rules and accessing only allowed resources during assessments.

Scale Globally

Expand your training and certification programs by reaching online learners across the globe. With Honorlock's remote proctoring solution, you eliminate the need for a testing center and learners have the ability to take your proctored assessment entirely online at their convenience.

Protect Your Content

Leaked exam questions can be detrimental to the validity of your exam. Our online proctoring software provides an additional layer of test protection to help deter test-takers from sharing proprietary content and compromising the integrity of your exam.

Provide Flexibility and Convenience

Today's workers have busy schedules that call for the ability to test when and where they want. With Honorlock's on-demand solution, employees and customers take their exams on their own time with zero scheduling requirements.

Mitigate Risk

Validating test-taker identity and monitoring engagement during tests are controls you can put into place with Honorlock to ensure assigned employees are present, engaged, and applying concepts delivered in training programs.

Increase Efficiency

With Honorlock's 24/7/365 US-based support, test-takers and administrators get their issues solved and promptly return to the task at hand. From integration to exam set-up, our clear step-by-step instructions, and support team makes Honorlock online proctoring simple easy and human.
