

PRODUCT OVERVIEW

Inventory, production and lot traceability for batch manufacturers

One system of record for food, beverage, supplement, cosmetics and chemical producers who have outgrown spreadsheets, without a months-long ERP project.

THE PROBLEM

Most small and mid-sized batch producers track lots across spreadsheets, paper travelers and accounting software. When a customer audit or recall request arrives, reconstructing **where a lot came from and where it went** can take days.

HOW ZELVIQ SOLVES IT

Every receipt, production run and shipment is recorded **by lot as the work happens**. Tracing any lot forward to customers or backward to suppliers becomes a lookup, not an investigation. This supports the lot-level recordkeeping FSMA Section 204 requires.

Inventory & Lot Control

- Real-time stock by lot, location and expiry date
- FEFO / FIFO draw policies applied at picking
- Quality holds block quarantined lots
- Counts, transfers and a full inventory ledger

Production

- Versioned recipes and bills of materials
- Work orders with lot-level ingredient consumption
- Automatic unit-of-measure conversions
- Actual vs planned yield, with supervisor sign-off on over-limit usage

Traceability & Recalls

- One-up / one-back lot genealogy
- Forward and backward trace maps from any lot
- Mock and actual recall runs with affected lots, customers and shipments
- PDF recall reports for auditors

Purchasing & Sales

- Purchase orders with vendor lot capture at receiving
- Landed cost and purchase price variance
- Sales orders with lot allocation, picking and shipping
- GS1 barcode label printing

INTEGRATIONS

QuickBooks Online

Shopify

WooCommerce

BigCommerce

Metric

LeafLink

Plus a REST API and outbound webhooks for custom integrations.

SECURITY & DATA

Isolated database per customer. Role-based access with multi-factor authentication that can be enforced per company. Activity history and a complete inventory ledger for audits.

Food

Expiry, allergens, supplier COAs

Beverage

Blends, UOM conversions, yield

Supplements

Batch records, formulation history

Cosmetics

Formula versions, ingredient trace

Chemicals

Lot ledger, unit conversions
