

Sirion Agentic CLM

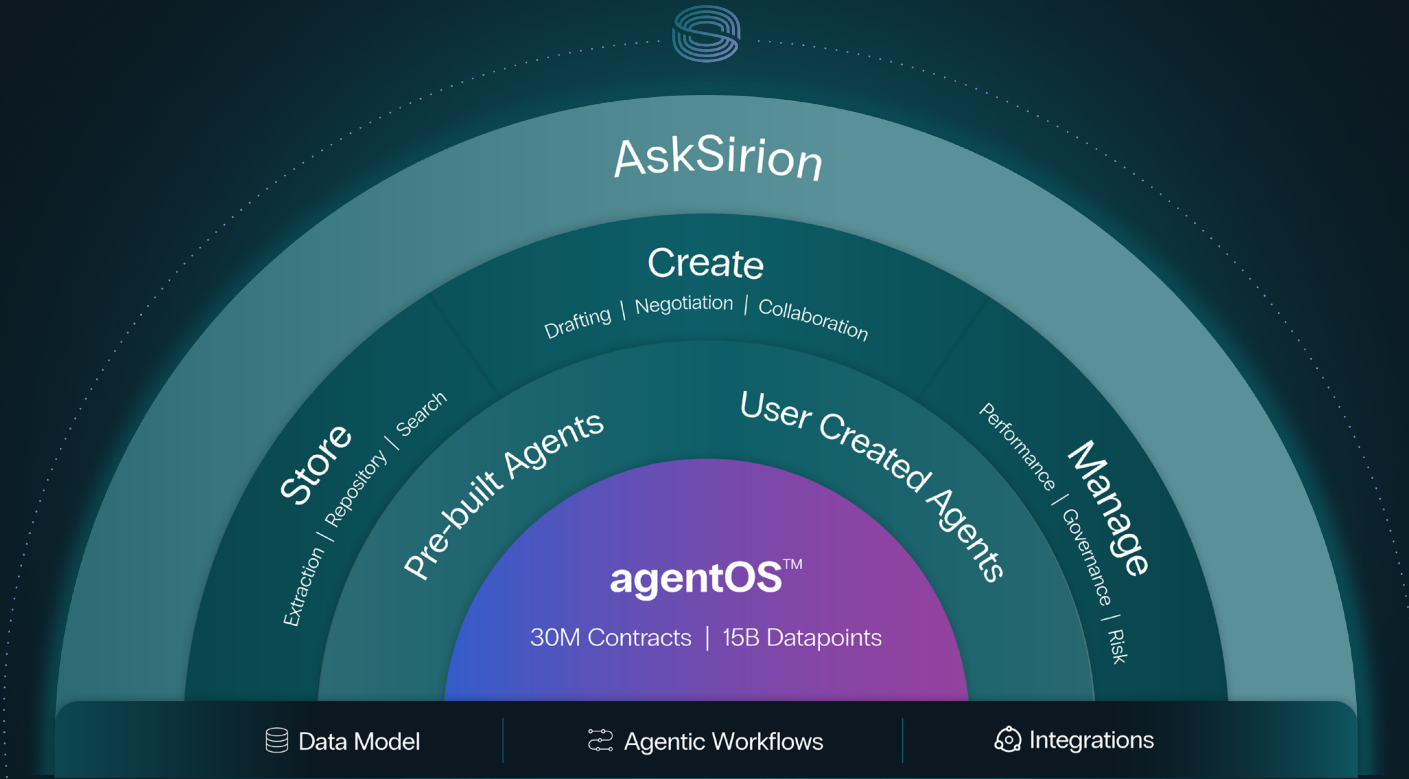

Sirion

Conversational. Agentic. Enterprise-ready.

Contracts are more than passive records – with the right platform to manage them, enterprises have the opportunity to turn them into active levers for business performance.

Sirion represents a new contract infrastructure – an agentic CLM platform. Rather than merely storing data or surfacing insights, the platform’s purpose-built agents execute tasks with practitioner-grade precision – draft, review, analyze – in seconds and without heavy setup. Through AskSirion’s 360 Conversational Contracting, users converse in plain language, while the platform orchestrates the right agents to provide explainable, source-linked reasoning. The result: a dynamic decision layer that understands your enterprise context and orchestrates complex workflows to drive results.

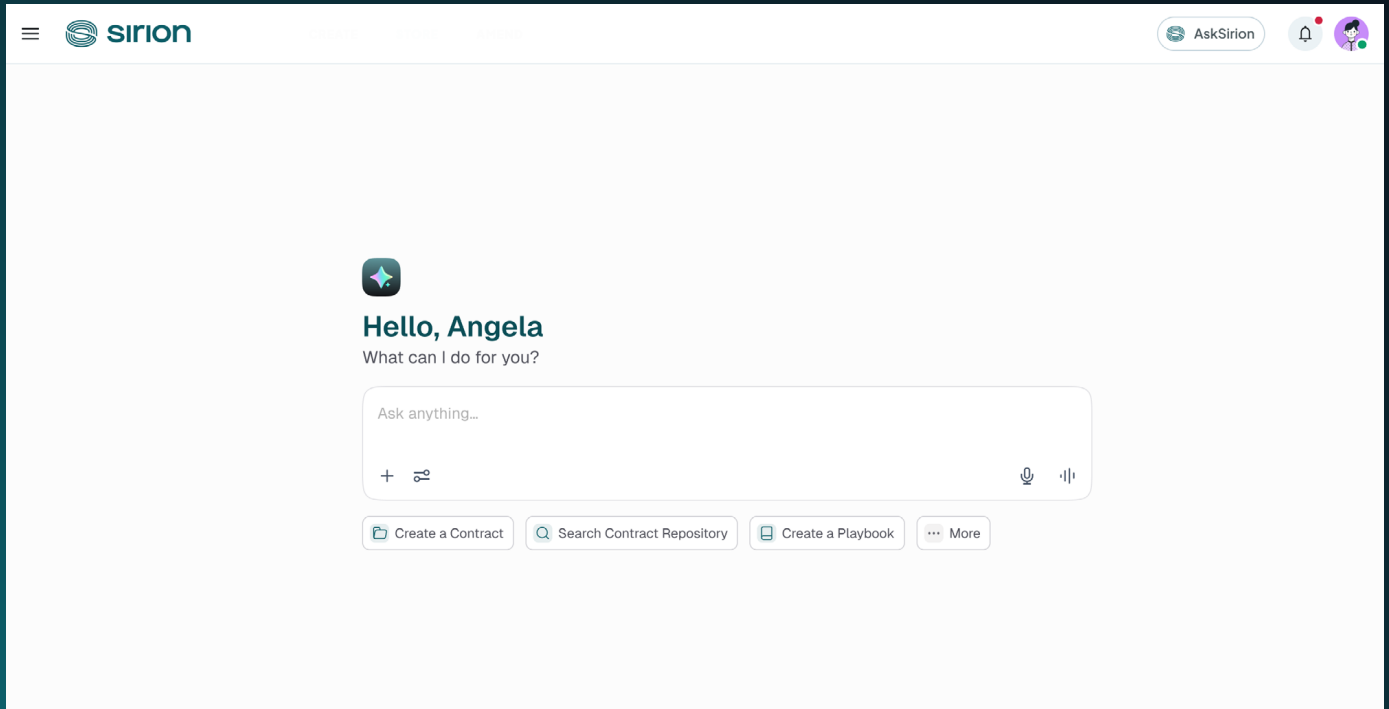

This isn’t just innovation. It’s the future of CLM.

Introducing AskSirion

Your Conversational Gateway to Agentic Contracting

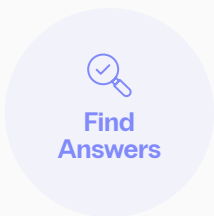

AskSirion brings your agentic experience to life - where conversational AI orchestrates a squad of adaptable agents that handle everything from contract extraction to drafting and negotiations. Just ask.

**Centralize

compliance**

Track obligations tied directly to financial impact.

**Build
Agents**

**70% faster agentic
automation**

Build, connect, deploy and orchestrate custom agents with agentOS.

One Platform to Store, Create and Manage Every Contract

Store

Instantly extract and organize every contract, then get answers with plain-language questions. Sirion's agents turn unstructured data into trusted insights and give you portfolio-wide visibility from one searchable repository

Create

Ask and generate compliant first drafts in seconds, then negotiate smarter with AI-powered redlines. Sirion's agents capture your playbooks, surface risks instantly, and streamline collaboration.

Manage

Conversationally track obligations, monitor service levels, and address risks before they escalate. Sirion keeps contracts on track with proactive alerts and enterprise-grade oversight.

Extraction

Agents read every clause, table, or signature and turn them into structured data. Continuously learns and adapts to enterprise needs

Repository

A secure, connected repository with full visibility, role-based access, and audit-ready compliance across versions and relationships.

Search

Ask in plain language and get instant, cited answers with summaries, clarifications, and risk insights - no filters, no forms.

Drafting

Generate contracts through plain language. Agents assemble playbook-aligned drafts instantly with rules, clauses, and context applied.

Negotiation

Issue-detection agents flag risks in context; redline agents make surgical edits with rationale and audit-traceability built in.

Collaboration

Keep teams and counterparties in sync with agent-driven reviews, approvals, and signatures, embedded where you already work.

Performance

Agents measure obligations, SLAs, and entitlements automatically, surfacing underperformance early and linking metrics to outcomes.

Governance

Automate compliance monitoring, delegation of authority, and audit trails while ensuring collaboration across complex hierarchies.

Risk

Agents scan contracts and live performance to detect risks, flag disputes, and recommend actions in plain language with cited evidence.

Purpose Built Agents For End-to-End Contracting

Deploy pre-built agents that handle your core contract operations immediately with minimal setup and training. These purpose-built agents deliver expert-level capabilities across the lifecycle - no setup, no training, just results.

Search Agent

Talk to any contract or your entire repository and get explainable, source-linked answers you can act on.

Draft Agent

Produces negotiation-ready drafts from your enterprise data and playbooks.

Issue Detection Agent

Analyzes full context, instantly spotting clause level issues others routinely overlook.

Redline Agent

Surgically revises clauses, fixing deviations with precise, policy-backed, explainable changes.

Playbook Agent

Transforms policies into smart templates, guaranteeing drafts start flawlessly aligned.

Extraction Agent

Pulls structured data, populating systems with reliable, ready-to-use contract intelligence.

Obligations Agent

Tracks and monitors every commitment, surfacing missed or at-risk obligations before they impact compliance or performance.

Invoice Agent

Reconciles invoices against contract terms, detecting mismatches and ensuring every payment aligns with agreed value.

...and many more

70+ specialized agents

that work out-of-the-box to streamline contracting and unlock measurable outcomes.

Built for Trust, Designed for Contracts

Explainable

Sirion's AI agents offer direct source links for every recommendation, accompanied by clear and concise explanations – giving you the confidence to verify authenticity with ease.

Precise

Sirion's multi-model AI framework chooses the best model for each task – whether an LLM or a smaller, focused AI model – ensuring you get consistent & accurate results.

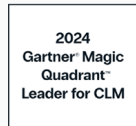

Adaptable

You can finetune the AI agents using your company's unique content, policies, and risk appetite so that every recommendation is aligned to your unique needs.
