

# PleaseReview's ROI puts Life Science companies ahead of the competition

Developing a new drug or medical device can be a lengthy endeavour and cost billions of dollars. When it takes an average of 12 years to progress a drug from discovery to market, you do not want slow and outdated processes to be the reason your competitors beat you to the finish line. With life science companies now turning to SaaS solutions to improve auditability, data management, and document collaboration, take a look at how PleaseReview can help you accelerate your time to market.

In response to the COVID-19 crisis, the world's **top five leading pharmaceutical companies** used Ideagen's cloud-based collaboration solution to support the development of an effective vaccine in record time.

## Top benefits

Collaboration

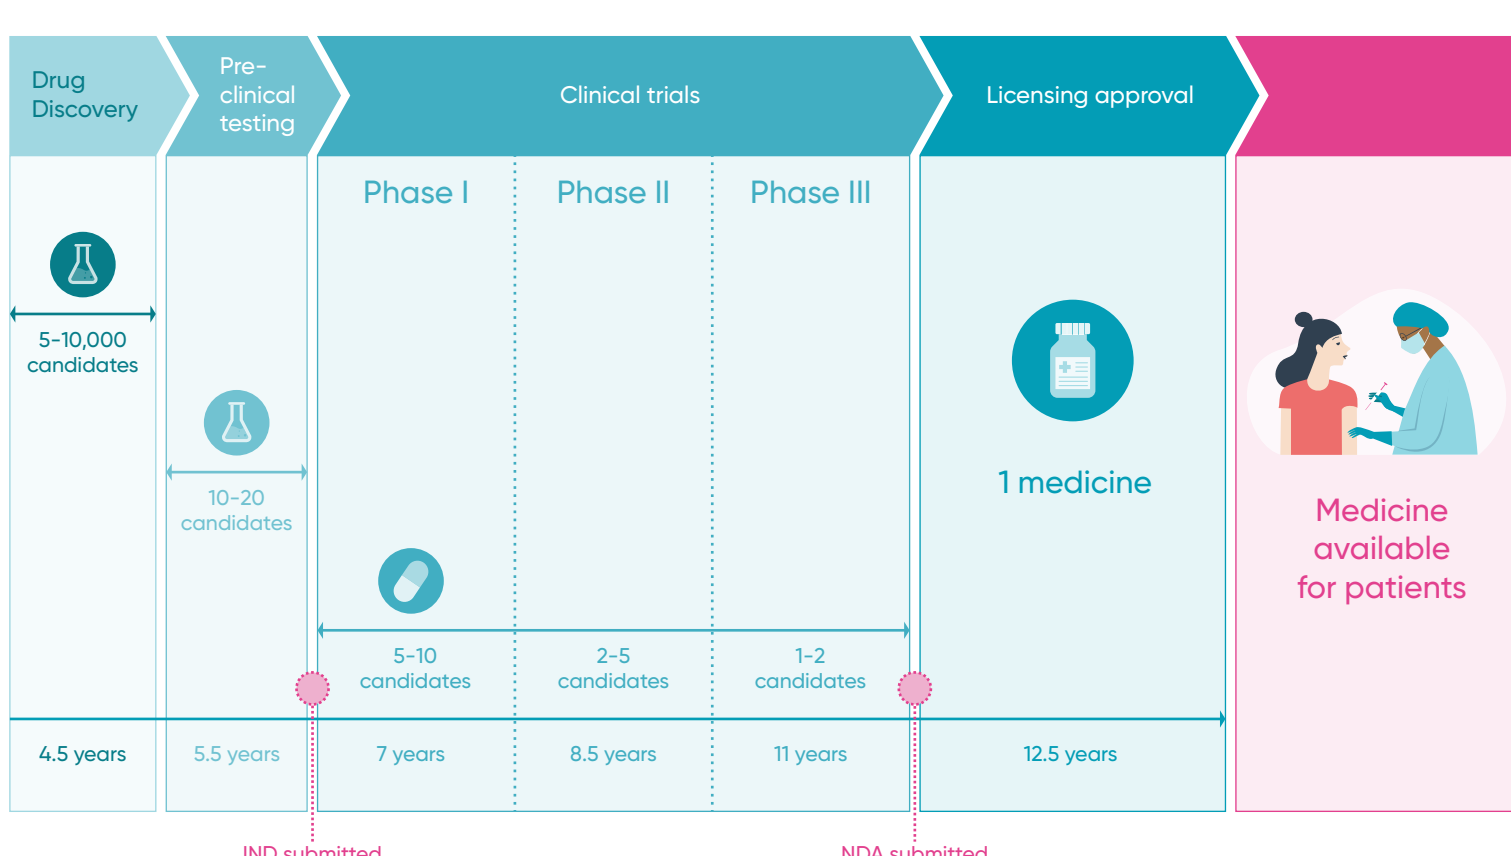

Controlled review process

Audit ready

## Drug and device development process

Timeline and development stages for a pharmaceutical product (industry average)

## Time savings
