

TRAINING A NEW CHECKLIST IN DUTCH

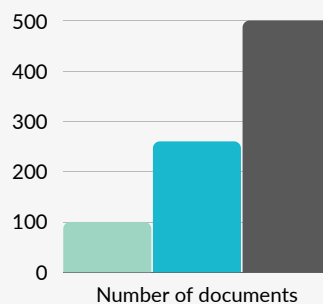

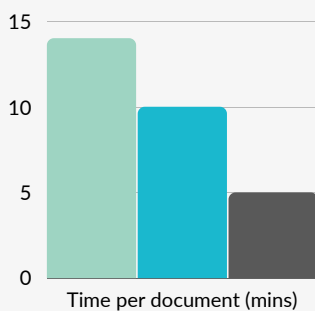

SUMMARY

A next-generation legal service provider with its head office in Amsterdam, were looking for better alternatives for handling legal work for their clients but they wanted to find a solution that did not break the bank. They were struggling with the current offerings on the legal tech market because they needed a solution which allowed them to review contracts quickly, accurately and most importantly, in Dutch.

They did not have the time or budget to train an AI tool in a new language from scratch; they needed a solution that required minimal training and therefore was cheaper to implement. They wanted to use AI technology with advanced language modelling capabilities to speed up the review process of 900 contracts, specifically leases and commercial contracts.

“ Even with the small sample (900 docs), **the AI review with Della was around 4 times as fast** while performing slightly better than the manual review.

- Peter Schepens, Manager Corporate & Innovation, Legadex

THE RESULTS*

Using Della, the company was able to review documents in Dutch **4 x faster than manual review**.

Phase 1:

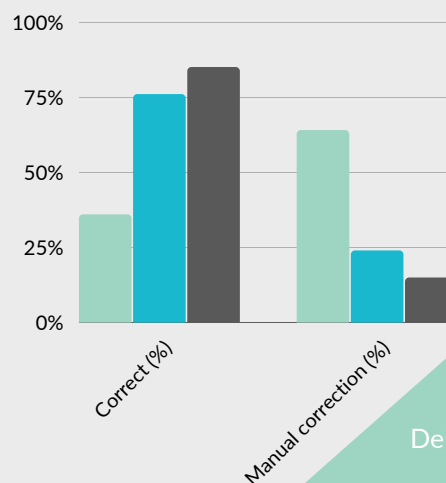

36% questions answered correctly

Phase 2

76% questions answered correctly

Phase 3

85% questions answered correctly

PHASE 1

Legadex created a checklist of 12 Dutch questions to look for the information they needed.

The questions dealt with parties, dates, renewal conditions, termination date and so on.

PHASE 2

Legadex uploaded 100 Dutch contracts onto the Della Platform and applied their checklist of questions.

PHASE 3

Della's language model was updated and improved based on the feedback from Legadex in the initial review.

PHASE 4

The language model was updated for the second time based on the feedback from the second review, speeding up the process even more and the remaining contracts were reviewed against the same checklist.

Della is a legal tech startup that will help you review your documents 4 x faster than manual review.
