

Edgenexus Virtual Load Balancer

For Fast, Scalable,
Resilient Applications

“

We were looking for a robust yet easy to use solution that would fit in with our virtualisation policy and ensure high availability for our email services. SDL

“

Edgenexus is simple to use, extremely scalable and comes at the right price point, all of which make it a great fit for us. COLT

Mitigate the Risk of Downtime and Optimise Application Delivery

Edgenexus load balancers improve the performance, scalability and reliability of applications for a superb end user experience.

Our powerful virtual load balancer is feature-rich yet cost-effective, giving you the comprehensive tool-set you need to overcome real-world application delivery challenges.

Powerful, Cost Effective Virtual Load Balancing

Edgenexus is available as a Virtual Appliance for VMware, Hyper-V and Citrix XenServer, eliminating the need for dedicated hardware, decreasing operating costs and reducing deployment time.

About Edgenexus

We are passionate about building good value, high performing load balancers that are incredibly easy to use and deliver real results.

We take great pride in supporting our load balancing deployments around the world.

Improve the Performance of your Business Applications

Edgenexus has experience across a broad range of applications and an understanding of their unique requirements. From household names such as MS Exchange and Lync, to self service websites and browser based services, through to specialist applications like Electronic Patient Record Systems or E-Learning platforms like Moodle and Blackboard.
