Lawyers and litigation support professionals expect ediscovery technology to make their lives easier. But many have been disappointed with the reality of slow, complex systems that are expensive to manage and maintain.

DISCO’s ediscovery software-as-a-service changes all that by delivering anytime, anywhere cloud transfer, processing, review, search, and production capabilities that set a new industry benchmark for performance, ease of use, and value.

“After testing a number of options, we chose DISCO as our preferred processing and review platform due to predictable pricing, advanced features, stability and ease of use for our end users.”

— James Rosenthal, Director of Litigation Services

DISCO offers an all-in-one ediscovery solution that gives law firms, corporations, and government agencies total control over their data, workflows, and costs. With a managed turnkey infrastructure delivery model that requires no upfront investment in software or services, we can ensure you meet your goals.

Compared to legacy solutions, our users report on average a 23% improvement in review throughput, a substantial improvement in reported case team satisfaction, and up to a 30% reduction in total spend over the life of a case.

Founded in Houston, Texas in 2012, we provide legal technology and services to more than 400 law firms, corporations, and government entities, including 75 of the AmLaw 200 and several prominent litigation boutiques.
Unmatched performance

DISCO provides unmatched performance speeds for transfer, processing, review, and productions. Users experience the fastest document viewing in the industry, with 1/10-second search results and 1/3-second document viewing, regardless of database size or complex file types. The largest case hosted in DISCO is 24 TB with more than 100 concurrent active reviewers and no degradation in performance.

Unmatched ease of use

DISCO offers a clean, seamless, and intuitive user interface with customizable workflows, views, and security that gives you control over your matter. DISCO’s advanced AI works within the flow of normal review (requiring no seed sets or complicated setups) and has been shown to reduce review time by up to 83%. Productions are easily run by using preconfigured templates or creating new templates utilizing an easy three-step process.

Unmatched value

Our simple flat-rate pricing model eliminates surprises and allows for predictability and better budget planning. With DISCO you don’t pay additional costs for things like user licenses, ingestion, processing, or production. And DISCO charges based on pre-expanded data size. Whether you choose our matter-based transactional pricing or one of our yearly subscription models, you get unlimited access to all the capabilities of the product.
