How it Works

Sign-up with BKP365

- Customer enters its details and creates an account on BKP365 Connect

Configure your account

- Download the setup from your login and you are done. Customer or the support team create users, create backup policies, set privileges and deploy backup software and you are ready to start the backup.

Initiating automatic backup

- BKP365 Connect initiates automatic backup from all devices. All the data is stored with AES 256 bit encryption based and military grade security.

Indexing & Analysis of the data

- BKP365 automatically creates logical index of the data stored via its backup software for fast & intelligent discovery.

Discover / Restore and Relax

- BKP365 Connect offers complete peace of mind by offering easy and no time discoverability of the data along with easy restoration of data from various versions. So now you can be worried about anything in business, but not about data backup and business continuity.

Key Technology Features

- Instant remote configuration
- Bulk User creation
- User admin accounts setup
- Automatic backup on connecting
- Backup reports and alerts on email
- Create your own backup policies
- Remote restoration on authorized agents
- PC/Laptop/Servers/Mobile/ Tablet support
- Backup external drives / NAS / Network storage devices
- Comprehensive audit trail
- Active directory support
- Create data retention plans
- Take incremental backups
- Import / export directly to data centres
- Hot / Cold data storage
- Search backed up content
- Run OCR / Play Media files
- Multi-lingual / Multi-country support

Backup, Restore and Relax using BKP365 Connect

Why BKP365 Connect

Files Discovery

You can use intelligent indexes or media items. This is especially helpful in searching for video / audio and pictures.

Military grade encryption

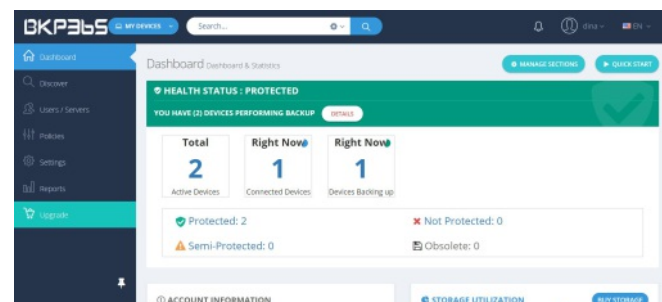

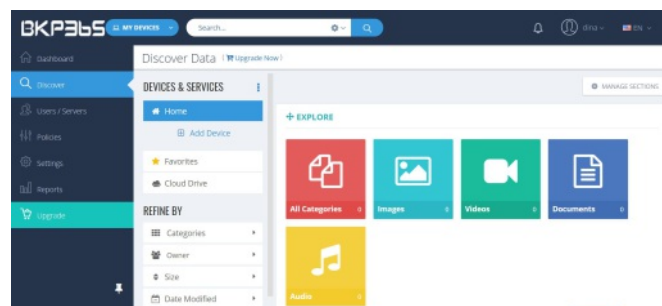

BKP365 Connect uses 256 bit AES encryption to store your data on backup cloud servers. This means the highest level of data security protocols used even by military organizations. Your data is always stored in encrypted format to avoid any mis-use by any third party or hackers.

Drastic reduction in backup operations costs

BKP365 Connect cloud data storage starts as low as Rs. 1.9 / GB / month that is highly effective when it comes to saving on the backup operational costs. Options of Deep Archive also available.

Incremental / automatic updates

BKP365 Connect uses an intelligent internal algorithm to detect the need to backup in every backup and you can take incremental backup every 30 minutes or as per your user defined backup policies. Data is saved in various versions which make life easier in case of any disaster recovery situation.

Why BKP365 Connect

Data security via comprehensive audit trail

BKP365 Connect provides data security via comprehensive recording of each and every action in its logs and audit trails. You are able to see changes, time and source of action beyond just IP recording.

Media Items Preview

You can easily backup, index, preview, stream and share on demand for any video / audio content. There is no limitations of the files size and there is always an instant stream without any interruptions. (Sold as an Optional Module)

Remote access via authorized agents and mobile devices

With BKP365 Connect you can easily restore and access your content on authorized agents and mobile devices.
