

The ULTIMATE Inventory Guide

Having a leading inventory management system can help you *maintain inventory accuracy and visibility* as well as *improve customer satisfaction*. At STORIS, we have over 30 years of expertise helping home furnishings retailers successfully manage their inventory.

As a home furnishings retailer, your **most important tangible asset** is your ***inventory***.

Below, we reveal a **step-by-step guide** to our retailers' best tips for inventory excellence.

In fact, we help retailers achieve 99% **inventory accuracy**, **reduce broken promises** to customers, and run overall **efficient operations**.

99%

START with your team

Set Standards

Maintaining a clean and organized warehouse sets high standards and keeps your employees accountable.

Train for Success

Utilize technology to build user-friendly menus to access daily workflows and create reports to track completed tasks.

Minimize Shrinkage

As a manager, easily monitor your team's performance and utilize audit logs to help your team develop good habits.

the ESSENTIALS

Track with Precision

Maintain real-time updates for your entire inventory including quantities and statuses to help make strategic business decisions.

Consolidate Across Channels

Integrate your inventory across channels from a single database. This helps provide accurate product data to meet customer expectations.

Make Important Adjustments

Your processes to adjust quantities, product statuses, prices, discounts, transfers, write-offs, vendor charge-backs, and special order details should be user-friendly and efficient.

Maintain with Ease

Import hundreds of new inventory items into your system and make continuous updates using conversion spreadsheets.

Go Mobile

Provide your in-store sales team with instant access to data via a Mobile POS. This enables them to help customers without leaving their side.

Did You Know?

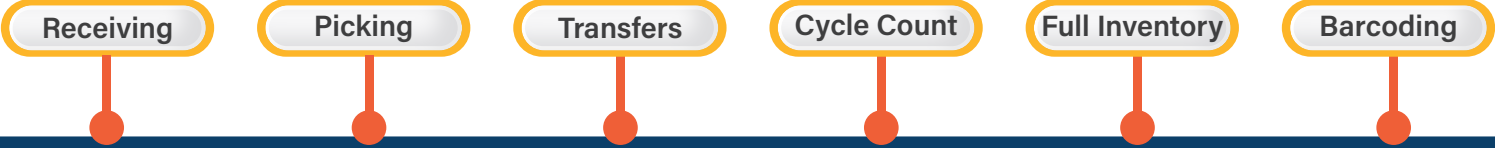

Home furnishings retailers carry about **\$1.43 in inventory** for every **\$1 of sales**.

- Capterra

Did You Know?

57% of retailers believe that supply chain management gives them a competitive edge. - Zipra, 2022

DAILY processes

WAREHOUSE productivity

Organize Your Warehouse Structure

Save valuable time and effort by organizing your warehouse using a mask 01-A-01 code representing the aisle, level, and the row.

Maximize Storage Capacity

Utilize a Directed Putaway tool to help position merchandise in your warehouse in a manner that improves space utilization.

Advanced Warehouse Management

Optimize your day-to-day business processes by automatically assigning, prioritizing, and sending daily assignments directly to your team’s RF barcode scanners.

Branding with Forms Designer

Utilize a Forms Designer tool to make unique branded showroom floor tags, POS labels, inventory barcodes, receipts, and documents.

Set Up Prepping Stations

Prep inventory for delivery by having clearly designated areas and teams assigned to each stage of the process.

Implement Cross Docking

Specify dock space that you can use to transfer incoming shipments directly to outbound transportation with little storage time in between.

Streamline Fulfillment

Help your delivery team by adding as much detail as needed with comments and delivery instructions on each Sales Order.

optimize FLOW

Capitalize on Best Sellers

Identify top-selling items with integrated reporting capabilities to gain insights into which products or categories are making the most revenue.

Use the Just-In-Time Method

Optimize replenishment based on stock levels and customer demand with just-in-time inventory management.

Advanced Inventory Replenishment

Utilize flexible tools to set desired minimum or safety stock levels per product and calculate all available supply for effective reordering of products.

Manage Multifacettet Fulfillments

Conveniently schedule different delivery dates, from different fulfillment locations, and to different addresses from within a single Sales Order.

Utilize Third-Party Delivery Routing

Integrate to certified third-party routing partners to map the most efficient routes while enabling your customers to track their deliveries.
