

Visitor Management with Gate Pass

We keep you informed of every check-in at your premise.
Go Digital with seamless Web, Android & iOS App

The Scenario

Vizlan

- || Every organization has Manual Registers with 10+ fields to record. This filling is really cumbersome task. Moreover all the data in those registers is neither searchable nor analytical.
- || Also, there is scope for human errors and manipulation of data in those registers.
- || There is no real-time data sharing and alert system available.
- || No tracking of people with restricted or bounded access

About the Product

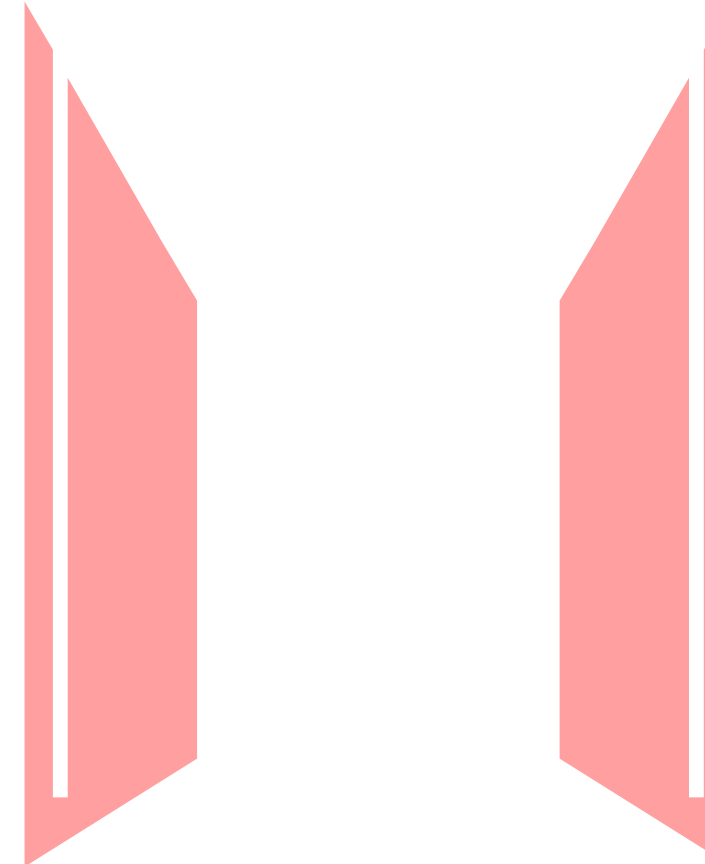

VizMan provides a way to effectively control, record & track Visitors at your Office and Factory. It helps you prevent the entry of any unauthorized or unwanted person in the premises.

Blacklisted Guest / People having Restrictive Entries may be rejected from the check-in point with notification alert to the concerned authority

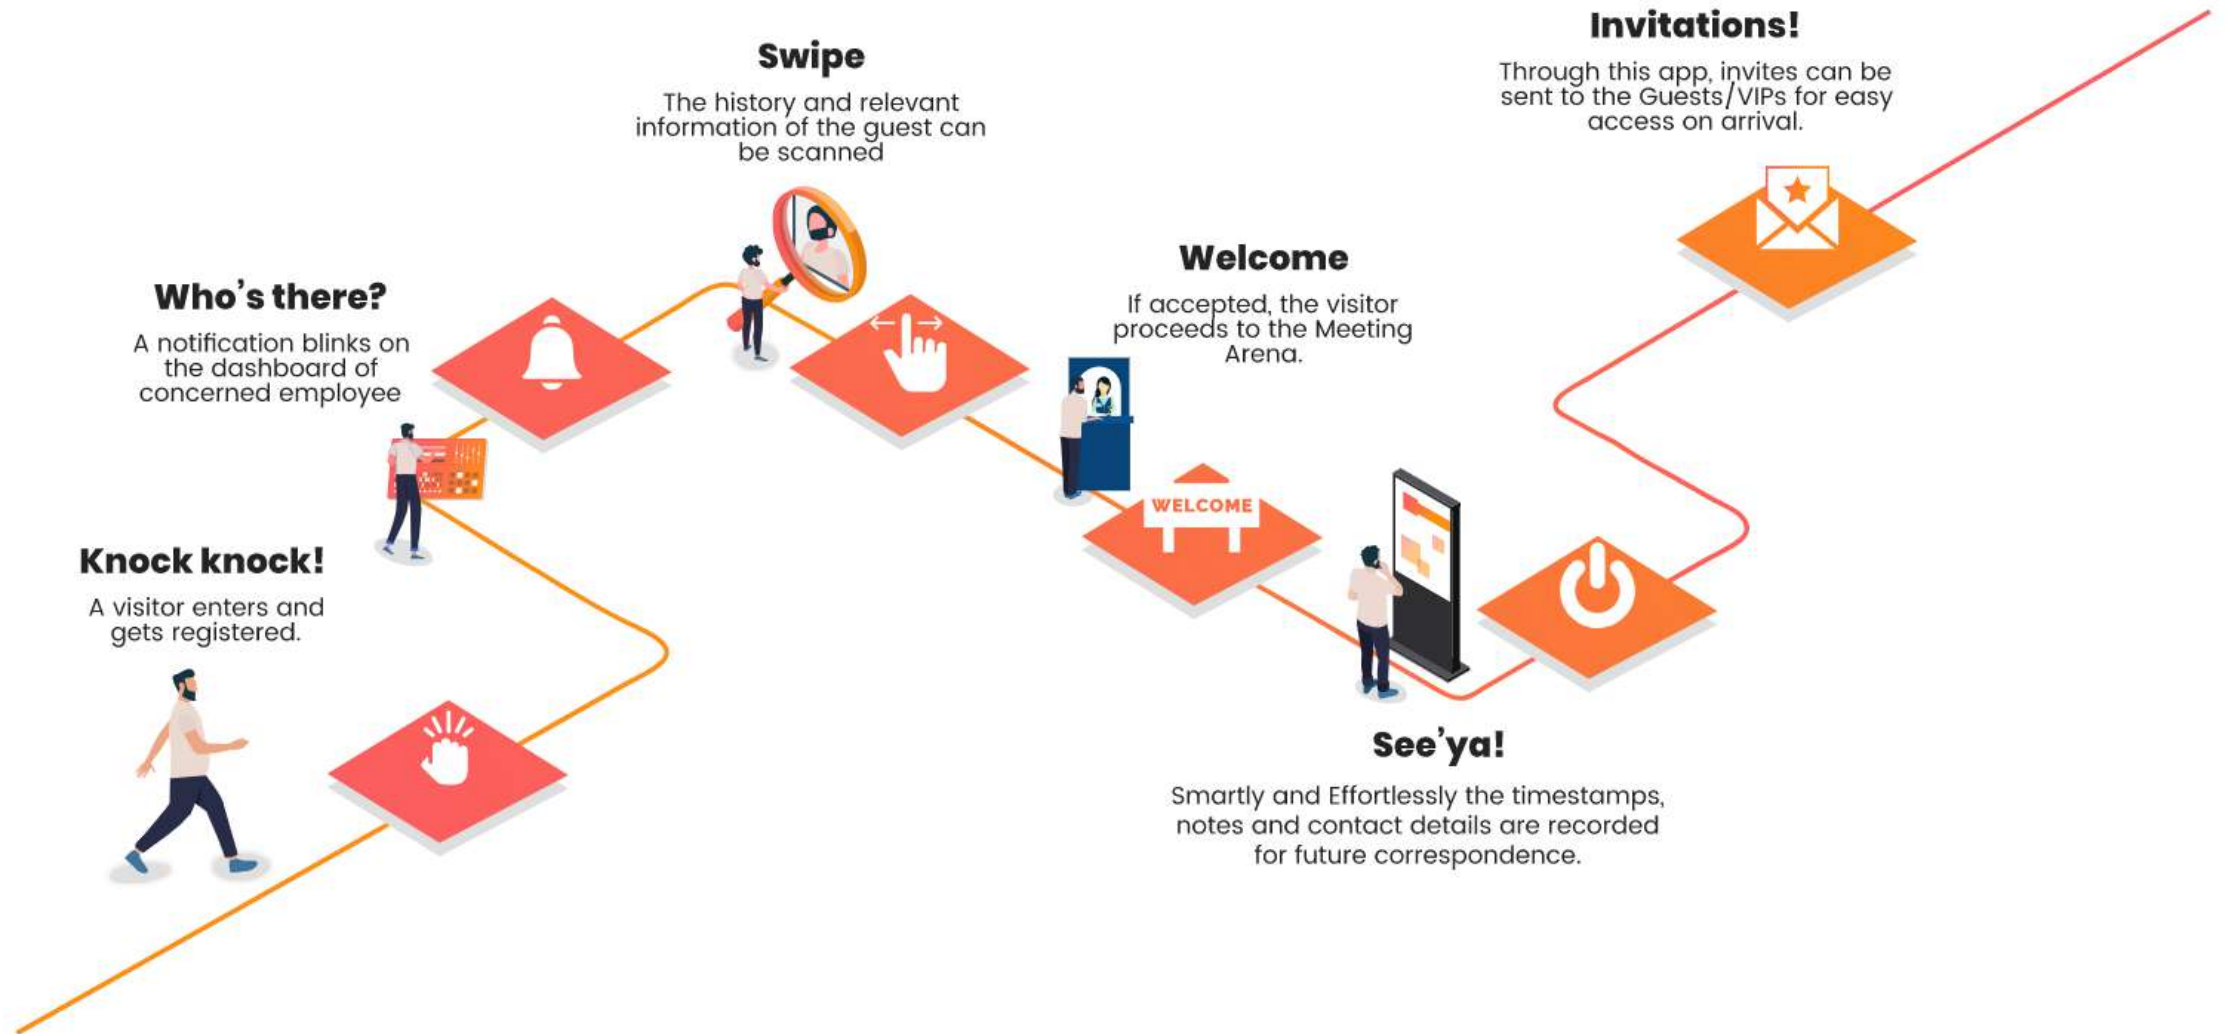

The enterprise version can be Integrated with various hardwares like web-cam, fingerprint scanner, RFid Scanner & printers.

Email/SMS/popup alerts of guests and any notification to the guests is easily functional.
