

The AI-Powered SecOps Platform

While others are still detecting, we have already responded. AgileBlue is an AI-powered SecOps platform, built to detect and stop cyberattacks.

We combine intelligent automation with real human analysts to protect your endpoints, cloud, and network 24/7.

AgileBlue's combines **eight critical security modules, in one platform**— built to detect faster and with precision, so you can go from reactive to proactive defense.

SecOps Reimagined, Powered By AI

Sapphire AI Insights

Sapphire, the brain of our platform, delivers 98%+ accurate autonomous investigations, decisions, and responses.

Cloud Security

CDR tackles cloud attacks; CSPM secures configurations with full visibility.

Vulnerability Scanning

Continuous vulnerability management, real-time protection, and rapid remediation.

Sapphire SOC Analyst

Sapphire automates 90% of Level 1 and 2 tasks, boosting SOC efficiency and collaboration.

Elastic SIEM

AI-powered SIEM optimizes threat detection, investigation, and response.

M365 Security Module

Identifies Microsoft 365 misconfigurations with prioritized remediation plans.

Cerulean XDR Agent

Serves specific areas or provinces with localized products and services.

Cyber Risk & Posture Scoring

Identify gaps, monitor risks, and reduce cyber threats by 75%.

Powered by AI, our platform delivers:

70%

Reduction in analyst time to investigate benign cases

48%

Reduction in analyst time to investigate, decision, and auto-respond to malicious attacks

90%

Automation of level 1 and level 2 triage and decisioning for SOC analysts

What You Deserve from a Cybersecurity Partner

You're not just looking for alerts—you need actionable insights, clear direction, and a reliable partner who understands your unique challenges. One that's purpose-built for your environment, not weighed down by enterprise complexity.

Before you even notice the threat, we've already acted.

When every second counts, slow tools leave you vulnerable. AgileBlue's AI and expert analysts **reduce false alerts by 99%** and **accelerate threat response by 48%** through automated triage. **While others are still detecting, we've already acted.**

One Platform. Total Coverage.

Stop juggling disconnected tools and vendors. AgileBlue unifies **8 critical modules**—SIEM, SOAR, EDR/XDR, and more—**into one platform** with over **300+ integrations**, giving you full visibility and control.

Security That Feels Like Part of Your Team

Most vendors disappear after onboarding. AgileBlue gives you **24/7 support, a dedicated SOC team**, and expert guidance whenever you need it. The power of AI and human expertise **keeps 96% of our clients around.**

Enterprise-Grade Protection Without the Enterprise Price

Built for mid-sized organizations, AgileBlue **delivers flat-rate pricing, fast onboarding, and a fully managed SOC**—so you get **big-league protection without the big-budget hassle.**

Rest Easy—We've Got You Covered 24/7.

Get clarity, control, and a reliable partner who shows up.
