sonatype

Run Anywhere

Sonatype Deployment Models

Sonatype is the only Application Security Testing (AST) and Software Composition Analysis (SCA) tool flexible enough to run wherever you need. Simplify software supply chain management with a choice of three deployment options: **Cloud | Self-hosted | Air-Gapped environment**
Cloud

Get enterprise-grade security.
Our SOC and ISO 27001 certifications mean that security is built into every layer of our Cloud deployment.

Maximum benefit with minimal effort.
Let Sonatype Cloud take care of maintenance and infrastructure.

Self-Hosted

Host it your way.
Use Sonatype's platform with granular user control and host our tools under your preferred conditions.

Air-Gapped

For your most sensitive environments.
Our disconnected deployments are cut off from the public internet and are compatible with air-gapped environments.

Sonatype is the software supply chain management company. We empower developers and security professionals with intelligent tools to innovate more securely at scale. Our platform addresses every element of an organization's entire software development life cycle, including third-party open source code, first-party source code, and containerized code. Sonatype identifies critical security vulnerabilities and code quality issues and reports results directly to developers when they can most effectively fix them. This helps organizations develop consistently high-quality, secure software which fully meets their business needs and those of their end-customers and partners. More than 2,000 organizations, including 70% of the Fortune 100, and 15 million software developers already rely on our tools and guidance to help them deliver and maintain exceptional and secure software.
