DigiQure

Digital Healthcare Ecosystem

Say Hello to Digital Health !

DigiQure is an integrated Health-Tech platform to digitalize the clinic and hospital management experience.

Go Paperless

Automate, avoid errors, avoid data loss
Don't search through pile of papers, just click

Increase Your Digital Footprint

Build digital presence & Practice without borders.
Connect with patients far away from your clinic.

Clinic Performance Analysis

Track & Monitor patient footfall, follow-ups, revenue collection and much more

Automated Reminders & Promotional SMS:

Enhance follow-up visits and reduce no-shows
Engage with patients through promotional messages

Data Security & Secure Cloud Backup

Data security is our highest priority. High level data encryption and secure cloud data backup keeps your data safe from unauthorized access

DigiQure

Salient Features of DigiQure CMS

Runs smoothly on all devices

DigiQure CMS is a fully responsive web app which works perfectly on all devices. So you are in-charge of all your clinic activities. Anytime, anywhere.

Digital Health Records

Securely Store and access all the patient data, prescriptions and medical records on the go Now access your old cases with just a click.

Appointment & Billing Management

Managing appointments & Billing has never been easier. Now add your customized procedure charges along with consultation fee in a seemless way.

Cash Flow Report

Stop the Revenue Leakages. Easily monitor cash flow, patient dues & advance payments. Collect exact amount from the cash counter.

Upload & Share case documents with Patient

Upload case documents instantly by either taking photos through the in-app camera feature or browse and upload later at your convenience.
