

Professional **plan advantages**

Evolve your business managing emails and shared calendars
in a professional way.

WORK WITH YOUR TEAM

Access your email, contacts and company calendars at any time, even when you work remotely.

MAIL

With the Mail module you always have access – via computer, smartphone or tablet - to the information you need and you can share it with your colleagues, to stay up to date.

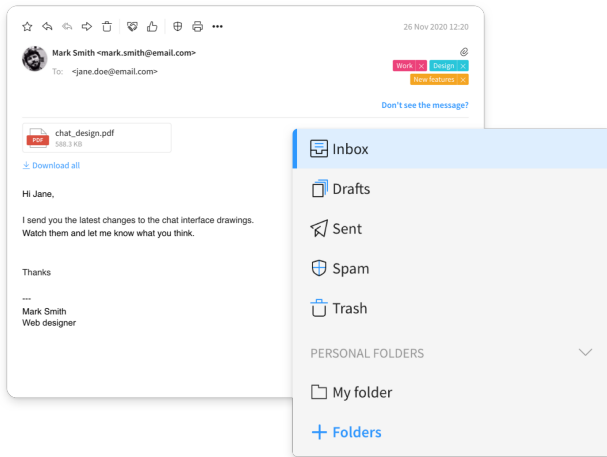

CONTACTS

With the Contacts module you create personal address books and organize your contacts in the best possible way, collaborating quickly and easily with your colleagues thanks to the possibility of sharing address books and contacts.

CALENDARS

With the Calendar you will have a simple tool to increase productivity, without missing any events and always keep an eye on your team's commitments.

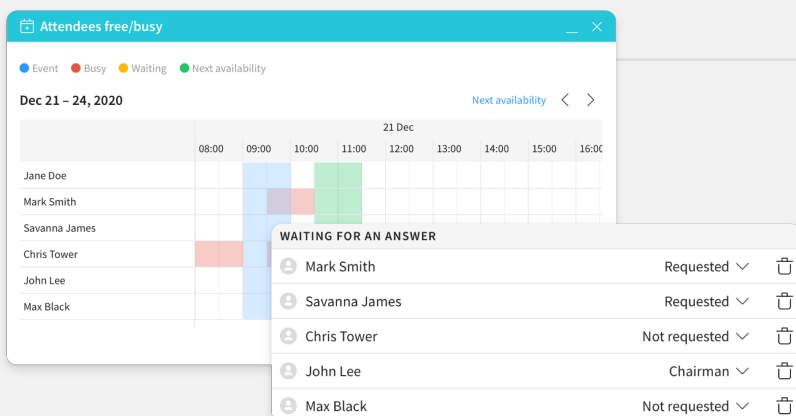

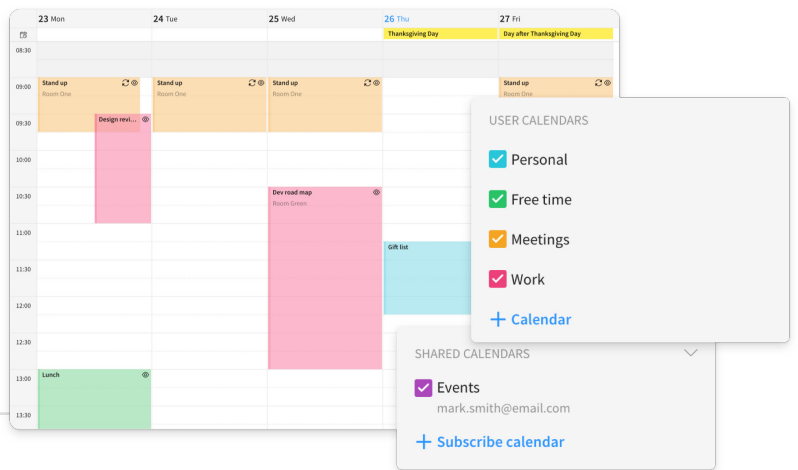

Mailboxes up to 50GB

You will be able to activate mailboxes of 8 GB, 25 GB and 50 GB. It is not necessary to have all mailboxes of the same size.

Personal and Shared Calendars

You can create more calendars in addition to the standard ones and choose whether to share them with your colleagues based on how you want to manage the organization in your company.

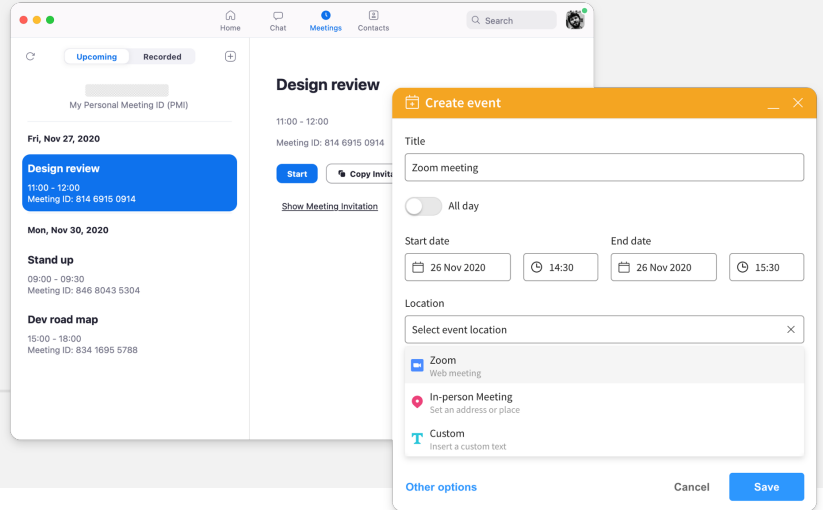

Meetings in one click

Find the perfect time for a meeting with the Free / Busy function. See immediately the time when everyone is available, and send and receive notifications automatically in case of changes.

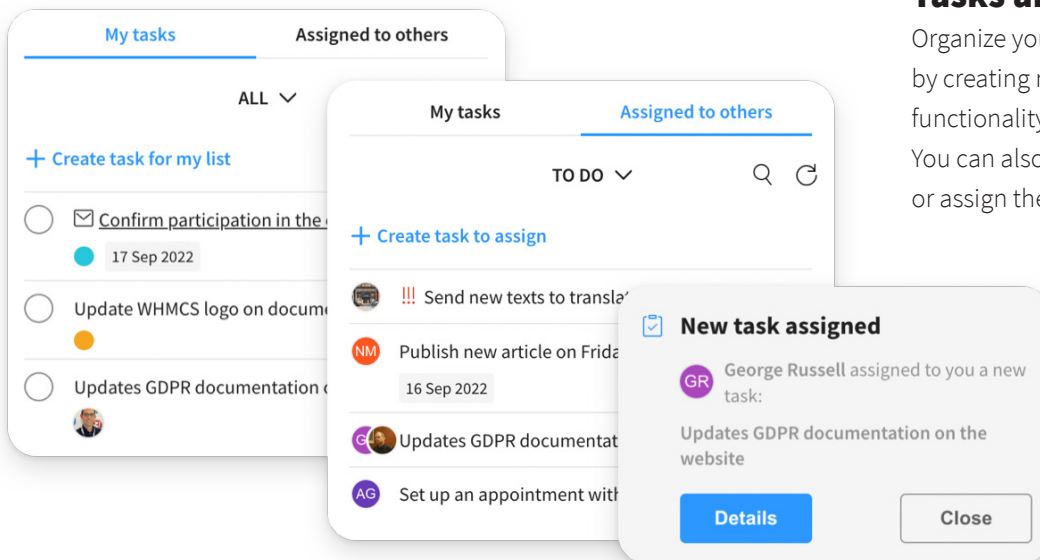

Integration with Zoom

By connecting your Webmail with your Zoom account, you can schedule meetings with colleagues, suppliers, customers or other users by simply selecting the Zoom item as event location.

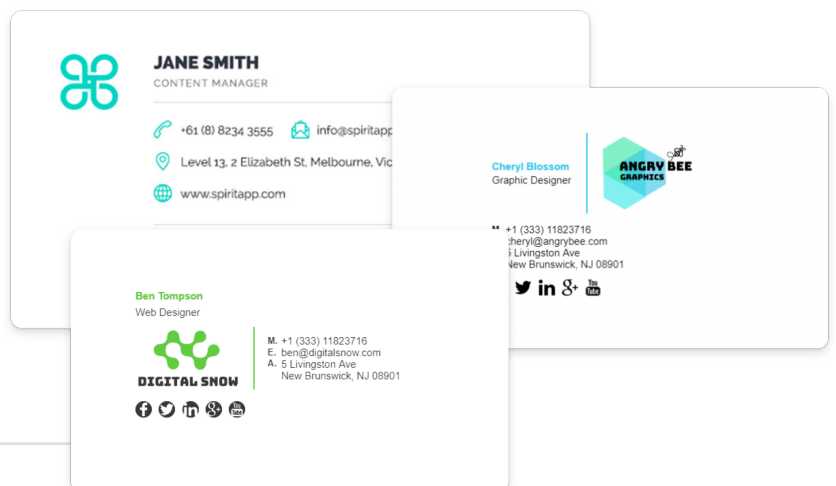

Tasks and reminders

Organize your work in the best possible way by creating reminders and to-do lists with the functionality built into the Webmail. You can also create Tasks linked to an email or assign them to your colleagues.

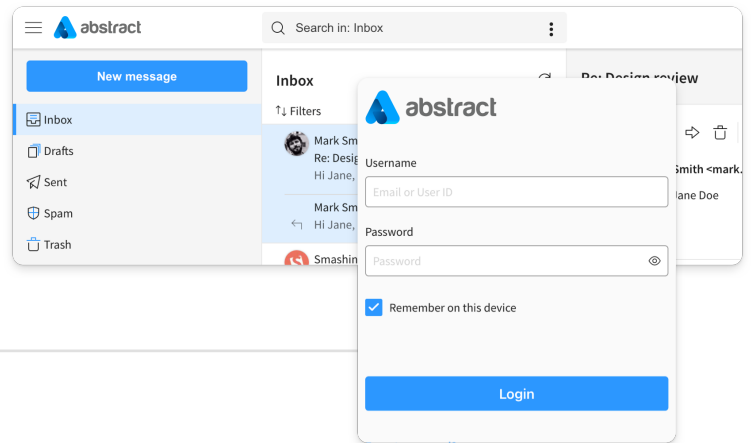

Centralized signature management

Enter, edit or delete all user signatures directly from the Control Panel. You will be able to manage the identities of the accounts and their associated aliases.

Webmail logo customization for domain

From the Panel it will be possible to upload a logo for each domain and this logo will be displayed in the Webmail to all users of that domain.

PRO FEATURES

Full corporate directory

Add all the details of the company components and thus facilitate the search for colleagues, thanks to the company directory which is automatically updated.

Rules

Automatically sort incoming messages into your folders thanks to the creation of special filters.

Advanced security

Increase the security of your accounts with advanced security policies such as:

- disable password recovery
- password expiration
- disable API access

CardDAV and CalDAV protocols

Thanks to these two protocols it is possible to synchronize contacts and calendars with clients or, by downloading an external plugin, even with the smartphone.

Automatic backup

The backup is included in the service and you can access it to recover some messages in case of accidental deletion.

Canned email messages

Set up to 10 canned email messages that you can easily choose when composing your message. It is also possible to save documents attached to the templates.

COMPATIBLE WITH MAJOR EMAIL CLIENTS

Compatible and synchronizable with all your computers, smartphones, tablets and mail clients which supports POP, IMAP, SMTP, CardDAV and CalDAV protocols, such as Outlook, Thunderbird, MacOS, iPhone and Android.
