Success Stories

“ One of the largest global pharmaceutical organisations is using ConnektHub for publishing its more than 100,000 customer specific catalogues using OCI punch outs. It's making sourcing and procurement easy for customers. ”

“ A leading grocery manufacturing and processing conglomerate governs its more than 200,000 MRO items with our MDO governance solution on Cloud in Australia and USA. The solution is used by around 400 data stewards with unlimited requestors. ”

“ One of the largest mining companies in the world partnered with Prospecta to implement mobile asset management accross mines in Australia and facilities in the US. ”

“ Prospecta partnered with Australia's most innovative energy experts to build and host a mobile application to support staff and contractors install solar systems. ”

About Us

Prospecta Software Australia is an Australian company established in 2002 in Sydney. Our Founders were working for KPMG and were quick to understand a gap in the Industry for niche and innovative solutions.

We have both products and services and have been delivering solutions to various organisations in and outside Australia. Our solutions, which are quick to deploy and get started, cater for both large and small companies.

Our solutions and services provide immediate benefits and a greater return on investment.

We have an energetic team of young achievers who are technically adept and have a sound business acumen to understand the requirements of different types of organisations and deliver a quality solution which has a direct impact on the ROI of the enterprise.

Fast Facts

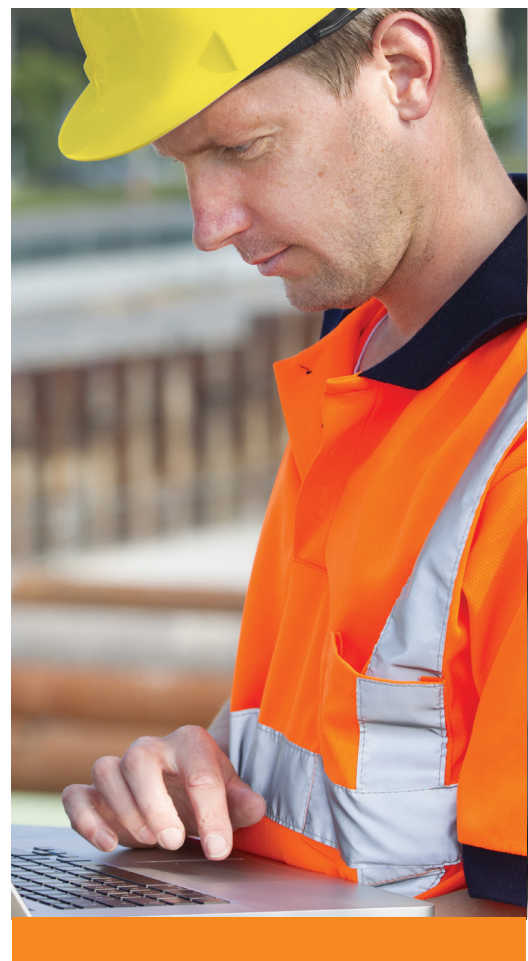

- Niche cloud based solutions
- SAP Service Partner since 2004
- Expertise in cloud integration
- Intuitive and user friendly mobile apps
- Value for money

Products

Prospecta offers software solutions which are available both on cloud and on premise. All our solutions are focussed on usability and packaged to implement the best practices available in the industry. All solutions are also mobile enabled resulting in greater acceptance from users across the organisation. Each of our products has the ability to integrate with on premise and cloud systems.

“ One of the Australia’s largest electricity generator companies improved its Occupational Health & Safety processes to deal with workplace incidents by implementing WorkSafeOnline (WSO). ”

Master Data Online (MDO)

is a web-based tool that manages the governance and standardisation of all types of master data across your business. It allows business users to easily create information with standardised business rules, workflows and approval processes. We have predefined industry best practices master data templates to help implement the solution within weeks. The solution is available both on-premise and on cloud.

ConnektHub

is a cloud collaboration platform for buyers and suppliers to perform various B2B and internal procurement processes. The solution is flexible and can be used by small and large businesses across any industry.

eBuy – Automate both upstream and downstream processes which includes Sourcing and Procure to Pay processes.

eSell – Manage your catalogue, scan and pack and be compliant with B2B standards of your buyers.

Work Safe Online (WSO)

is a cloud solution to manage occupational health and safety risks by enabling business users to manage standard business rules, workflows, approvals, and escalations to promote accountability and minimise risk throughout the business.

WSO helps drive safety throughout your business and eliminates spreadsheets, manual forms and disparate databases into a single safety management system.

“ A leading Integrated Services and Facility Management company uses MDO to govern its more than 60,000 materials and 14,000 suppliers to streamline supply chain processes. The solution is used by 2,000 users in 467 different locations in Australia & New Zealand. ”

Services

Prospecta has been known primarily for our system integration services. We also provide other services in the areas of data services and mobility. We have worked across various leading organisations in Australia and successfully delivered in our areas of expertise. Our services have been primarily focussed around SAP and we have been an SAP partner since 2004.

Cloud Integration

We had individual systems first, then we had the ERP's such as SAP and now have the introduction of cloud solutions. The only difference is; these solutions are in the cloud and we have complex environments where we need to integrate between the cloud and on premise.

Prospecta System Integration Services include helping organisations to architect, deliver and support all integration requirements. We have a strong understanding of SAP and cloud solutions including PI and various other cloud middleware.

SAP HANA

Prospecta has formed the SAP HANA team and are working closely with SAP on various Hana initiatives. Prospecta is also a tenant in the SAP HANA cloud Platform developing solutions focussed on usability by the use of Fiori and native mobile applications.

Data Cleansing

The data cleansing team in Prospecta has both the expertise and the tools to cleanse and standardise data. We work closely with your business to ensure we provide quality data based on rules defined by your respective business areas.

Mobility

Prospecta helps customers to go 'mobile' by transforming the way they do business with our suite of innovative solutions and products. These allow employees and customers to work together from anywhere at anytime with ease and total security. We have teams working on various platforms including Fiori and SMP and have a strong capability to build native apps in Android and iOS.
