

# Workfront Dynamic Calendar

The Workfront calendar view is powered by your work—easy, powerful, and beautiful.

If you're a normal human being, you're probably used to a project calendar that you have to manually maintain. It's disconnected from the work, disorganized, and painful. The Workfront Calendar View builds itself and stays built, connecting your world to the work you do. Fire and forget.

## How Does Workfront Dynamic Calendar Work For My Team?

### From high maintenance calendaring...

Your calendar today has more to do with last week than the future. Your calendars are manually maintained, disconnected, out of date, and siloed. In fact, your calendars are more like artifacts than works of art.

### Set and go

The Workfront Calendar View builds itself and stays built. Just tell the filter builder what projects, what tasks, and what colors. Built on your work, it shows your work, automatically.

### A view for every need

Create a calendar for you, for your team, for your execs, for your clients, even for your customers. As easy to build as clicking a few buttons; create all the calendar views you need in seconds.

### Share the latest without worrying if it's the latest

Workfront Calendar Views dynamically represent your data, so they are always up to date. Never wonder if your audience is seeing the latest thing again.
